

Kohsar University

Murree, (KUM), Punjab, Pakistan

Quality Enhancement Cell (QEC)

Dated: 11 August 2025

PREE Implementation Plan (Department of Biotechnology)

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1	Misalignment of Program Vision and Mission Finding: The BS-MLT program's vision and mission are not fully aligned with the Department of Allied Health Sciences or Kohsar University's institutional vision. This disconnect may result in fragmented academic planning and hinder the program's ability to contribute cohesively to the university's strategic objectives. Recommendation: Conduct a structured review involving program leadership, departmental committees, and QEC to revise and harmonize the vision and mission statements. These should clearly reflect the biomedical focus, societal service mandate, and professional standards required under AHPC guidelines.	Revise BS-MLT vision and mission statements in consultation with departmental, QEC, and university authorities to align with institutional mission and AHPC standards; approve through BOS	Tentative period for BOS meeting schedule depends on approvals from the higher authority of KUM	Department	BOS approval
2	Program objectives lack biomedical relevance and research/industry linkage.	Review and revise program objectives to include	BOS approval We will identify potential	Department/ ORIC	Curriculum review under

	Finding: The current BS-MLT program objectives do not adequately emphasize the biomedical focus, research engagement, or industry linkage essential for producing competent and practice-ready graduates. This gap results in limited exposure to scientific inquiry, innovation, and real-world diagnostic laboratory challenges, thereby constraining graduate employability and sectoral contribution. Recommendation: Revise the program objectives through a consultative process involving faculty, QEC, and industry partners to embed biomedical relevance, ethical practice, critical thinking, and applied research skills. Integrate structured research components and formal industry collaborations into the curriculum to align with AHPC standards and contemporary healthcare demands.	biomedical focus, ethical practice, research engagement, and industry collaboration in compliance with AHPC requirements.	partners and actively pursue new MoUs.		AHPC, BOS meetings with industrial members partnership Administrative support, outreach team and travel/meeting budget were required.
3	MLT embedded under Biotechnology department contrary to AHPC standards. Finding: The BS-MLT program is currently housed under the Biotechnology department, which conflicts with AHPC standards requiring MLT to function as an independent academic unit. This structural arrangement dilutes the program's professional identity, limits subject-specific governance, and risks non-compliance with accreditation criteria, ultimately affecting the program's	We are planning to take approvals from higher authority for launching of separate department with dedicated faculty, labs, and governance.	depends on the university administration	Registrar Office VC office Department	Administrative approval, department space allocation

	credibility and student outcomes. Recommendation: Establish the BS-MLT program as a separate department within the Faculty of Allied Health Sciences, with its own dedicated faculty, laboratories, and administrative framework. This structural autonomy will ensure regulatory compliance, strengthen academic oversight, and support targeted growth in diagnostic sciences education and research.				
4	Faculty irrelevancy & shortage (only 2 MLT-qualified faculty). Finding: Out of eight current faculty members in the BS-MLT program, only two possess relevant MLT qualifications, while the rest have academic backgrounds in unrelated disciplines such as Botany, Biotechnology, and Chemical Engineering. This violates AHPC's requirement that at least 70% of faculty teaching in MLT programs must be discipline-relevant and registered with the Council. The shortage of qualified faculty compromises curriculum delivery, clinical training quality, and accreditation readiness. Recommendation: Recruit additional permanent or long-term contractual MLT-qualified faculty to meet AHPC's 70% relevancy threshold. Relocate core and specialized courses exclusively to MLT-qualified instructors and ensure all teaching	The University is requested for hiring permanent faculty with relevancy and also for fall 2025 we have requested HR office for hiring 4 MLT based visiting faculty	Depending on the university hiring procedure	HR, Registrar Office	Recruitment budget, AHPC registration fees

	staff are registered with AHPC. This will strengthen academic quality, enhance clinical competency among students, and safeguard the program's accreditation status.				
5	Specialized subjects assigned to non-MLT faculty. Finding: Several specialized and clinically focused subjects—such as Clinical Laboratory Management, Microbiology, Virology, and Molecular Biology—are currently being taught by faculty without MLT qualifications or relevant clinical laboratory experience. This practice undermines the technical depth, clinical accuracy, and professional applicability of course content, leading to gaps in student competency and misalignment with AHPC's faculty relevancy standards. Recommendation: Reassign all specialized and core clinical courses exclusively to MLT-qualified faculty with demonstrated expertise in the relevant subject areas. Implement a faculty allocation policy aligned with AHPC guidelines to ensure subject faculty relevancy and provide targeted faculty development programs to maintain up-to-date clinical and diagnostic knowledge.	We will assign specialized subjects such as Clinical Lab Management, Microbiology, Virology, and Molecular Biology to qualified MLT faculty and relevant degrees and experience.	Immediate. Starting from Fall 2025	Department	Updated teaching roster, faculty workload adjustment
6	Short-term contracts affect academic stability.	As per university policies, MLT teachers with contract	Depending on the university hiring	Registrar, HR Department	KUM policies

	Finding: A significant proportion of BS-MLT teaching staff are employed on short-term contracts, often less than one year, which disrupts academic continuity, mentorship, and long-term program development. This instability negatively impacts curriculum consistency, student–faculty engagement, and the program’s ability to retain skilled educators. It also falls short of AHPC requirements that faculty be appointed on a permanent basis or on contracts of at least three years for accreditation compliance. Recommendation: Transition all MLT-qualified faculty appointments to permanent positions or minimum three-year contractual terms, in line with AHPC standards. Establish clear retention policies and professional development opportunities to encourage long-term commitment, ensure continuity in teaching quality, and foster stable academic leadership within the program.	have been given one year extension. Further decisions will be taken once posts are advertised.	procedure		
7	Ineffective teaching methods (5-minute classes, student-led presentations without guidance). Finding: Certain specialized courses in the BS-MLT program are delivered through minimal in-class engagement, with some faculty conducting only brief sessions of a few minutes and relying heavily on unguided	On students complains, some teachers were highlighted. Which were taken in serious considerations and teachers have not assigned courses.	Dully checked by the departmental head	Department	Teaching guidelines, monitoring framework

	student presentations. This approach results in inadequate coverage of complex clinical content, inconsistent knowledge depth, and reduced student preparedness for professional practice. Such practices fall short of higher education teaching standards and compromise the integrity of course delivery. Recommendation: Implement structured teaching protocols requiring minimum contact hours, interactive lectures, guided presentations, and clear syllabus coverage. The QEC should regularly monitor teaching quality through class observations and student feedback, while faculty receive training in modern pedagogical strategies to enhance engagement, comprehension, and retention in clinically oriented subjects.				
8	Lack of practical training and industry/laboratory exposure. Finding: The BS-MLT program currently lacks a structured and consistent framework for practical training, with limited opportunities for students to engage in real-world diagnostic laboratory activities. Reports indicate that qualified MLT faculty have been restricted from delivering scheduled hands-on sessions, and there are no formal linkages with hospitals or diagnostic laboratories for industry	Teachers have been given strict instructions to ensure all practical sessions are conducted with relevant courses and we will establish MoUs with diagnostic labs/hospitals for regular visits; implement structured skill-based training schedule.	Monitored by the departmental higher authorities	Department	Lab equipment and transport budget approval need for upcoming F & PC meeting and increased signed MoUs

	exposure. This deficiency hampers skill acquisition reduces clinical competence, and risks non-compliance with AHPC's experiential learning requirements. Recommendation: Develop and enforce a comprehensive practical training schedule conducted exclusively by MLT-qualified faculty. Establish formal Memoranda of Understanding (MoUs) with accredited diagnostic laboratories and hospitals to provide regular industry visits, internships, and skill-based workshops. Incorporating structured, supervised clinical exposure into the curriculum will bridge theory with practice and ensure graduates meet professional competency standards.				
9	Internal restrictions preventing practical delivery by qualified faculty. Finding: Qualified MLT faculty, despite being assigned practical sessions, have reportedly faced internal directives or pressure preventing them from conducting these essential training courses. Such restrictions create an environment of academic obstruction, deprive students of critical hands-on learning opportunities, and undermine the collaborative spirit required in professional education. This internal conflict compromises both program quality and compliance with AHPC's requirement for practical instruction by discipline-	Teacher have been assigned with responsibilities to conduct scheduled practical without obstruction; address internal conflicts through mediation.	Immediate	Department and faculty	Policy directive, administrative oversight

	relevant faculty. Recommendation: Implement a clear institutional policy that safeguards the academic autonomy of assigned faculty to deliver practical sessions without interference. The Dean and HoD should mediate existing conflicts, ensure transparent faculty role assignments, and enforce accountability measures against obstruction of academic duties. Promoting a cooperative, student-centered teaching culture will strengthen skill-based learning and uphold professional standards.				
10	No standardized thesis format or guidelines. Finding: The BS-MLT program lacks an approved, standardized thesis format and formal guidelines for undergraduate research projects. This absence leads to inconsistencies in research quality, formatting, and assessment, and creates uncertainty for both students and supervisors. Without a unified framework, the program risks variability in academic rigor and may fall short of institutional and AHPC expectations for structured scholarly work. Recommendation: Develop, approve, and disseminate a standardized thesis format and comprehensive research guidelines through departmental and QEC oversight. Publish	The students of BS MLT have not yet reached to start their Final year projects, through BoS formats and credit hours related all matters of FYP have been approved and will be religiously followed.	From Fall 2025	Department	Thesis templates, policy approval by KUM

	these resources on the university's website and integrate orientation sessions for students and supervisors. This will promote uniformity, enhance research quality, and align undergraduate projects with national academic and professional standards.				
11	Capstone projects supervised by non-MLT faculty. Finding: Capstone projects, which serve as a critical component of applied learning in the BS-MLT program, are in some cases supervised by faculty without MLT qualifications. This misalignment between supervisor expertise and project scope risks compromising the technical accuracy, clinical relevance, and diagnostic applicability of student research. It also detracts from the intended purpose of capstone work as a demonstration of professional competence in laboratory medicine. Recommendation: Assign all capstone and final-year projects exclusively to MLT-qualified faculty with expertise in the relevant diagnostic discipline. Establish clear supervisory guidelines, assessment rubrics, and topic approval processes to ensure that projects align with clinical laboratory standards, AHPC requirements, and emerging trends in medical diagnostics.	Till now students have reached to 6 th semester and no student has yet strated Capstone or Final year projects. This point was probably confused with other departments.	Will be assigned to qualified faculty	Head of the department	approvals

12	Inadequate classrooms and facilities. Finding: The BS-MLT program suffers from a shortage of classrooms and inadequate learning spaces, with existing facilities lacking proper ventilation, seating capacity, and multimedia resources. These limitations hinder effective teaching, student engagement, and comfort, especially during peak academic periods. Recommendation: Expand and upgrade classroom infrastructure to meet student enrollment demands, ensuring ergonomic seating, adequate lighting, ventilation, and modern teaching aids. Prioritize these improvements in line with HEC and AHPC facility standards to create an environment conducive to academic excellence.	The university will try to provide upgrade and expand classrooms with proper ventilation, seating, and multimedia equipment.	Depends on university support	VC, Registrar, Estates Department	Capital budget, contractor services
13	No departmental library with MLT-specific books. Finding: The BS-MLT program currently lacks a dedicated departmental library, and the central library does not have adequate MLT-specific textbooks, journals, or reference materials. This scarcity limits students' access to updated scientific literature, hinders self-directed learning, and weakens research capacity. Recommendation: Establish a departmental library equipped with current MLT textbooks, diagnostic manuals, and peer-reviewed journals. Ensure periodic updates	University has been requested to establish departmental library stocked with current MLT textbooks and journals.	University decision	Provost Office/Campus Incharge	Library budget, procurement of books

	to the collection and provide both print and digital resources to align with AHPC standards and support evidence-based learning.				
14	Poor internet and no e-library access. Finding: Students and faculty in the BS-MLT program face persistent internet connectivity issues, compounded by non-functional access to the university's e-library system. This severely restricts access to updated scientific literature, online journals, and research databases, thereby limiting opportunities for evidence-based learning and scholarly engagement. Recommendation: Upgrade campus internet infrastructure to provide stable, high-speed connectivity and restore full access to the e-library platform. Conduct orientation sessions on effective use of e-resources, ensuring that both students and faculty can utilize digital tools to enhance teaching, learning, and research productivity.	University has been requested to upgrade campus internet; restore e-library system and conduct student training sessions.	Depends on the university actions	IT Department, / Campus Incharge	IT infrastructure budget
15	Lack of drinking water, toilets, and common rooms. Finding: Basic student amenities in the BS-MLT program are inadequate, with no reliable access to clean drinking water, hygienic toilets, or a designated common room—particularly affecting female	University has been requested to install water filtration units, renovate restrooms, and establish common room for female students.	Depending on the university actions	Registrar Office/PD Office /Campus Incharge Department	Facilities budget, construction services

	students' comfort, privacy, and well-being. Such deficiencies negatively impact the learning environment and fall short of institutional responsibilities under HEC and AHPC standards. Recommendation: Install water filtration units, renovate and maintain separate male and female washrooms, and establish a well-equipped common room for female students. These facilities should be regularly monitored to ensure cleanliness, accessibility, and a supportive academic atmosphere.				
16	Unawareness of scholarships and grievance redressal system. Finding: Many BS-MLT students are unaware of the scholarships available to them and the procedures for lodging academic or administrative complaints. This lack of awareness limits access to financial support, discourages reporting of grievances, and undermines trust in institutional support mechanisms. Recommendation: Conduct regular orientation sessions and publish accessible information on scholarships, grievance redressal procedures, and relevant contacts through the departmental notice board, official website, and student handbooks. Ensure that these systems are transparent, well-publicized, and actively monitored for	University has been requested to conduct orientation sessions on scholarships, grievance mechanisms, AHPC registration, and anti-harassment cell.	Immediate	Student Affairs, Department	Orientation materials, guest speakers

	responsiveness.				
17	No training in digital library usage. Finding: Students in the BS-MLT program have not received any formal orientation or training on how to access and utilize the university's digital library resources. This gap restricts their ability to retrieve scientific literature, reference materials, and research databases, thereby limiting independent study and evidence-based academic work. Recommendation: Organize periodic hands-on training sessions on digital library access and search strategies, led by the library staff in collaboration with the HoD. Provide user guides and online tutorials to ensure students can efficiently navigate and utilize digital resources for coursework, research, and professional development.	University has been requested to organize digital library orientation for students and faculty.	Session will be organized from help of library and IT department	Library Department, IT department	Training materials, IT support
18	Declining student admissions. Finding: The BS-MLT program has experienced a gradual decline in student admissions, which may be attributed to perceived academic quality issues, limited facilities, insufficient industry linkages, and inadequate promotional outreach. This downward trend threatens the program's sustainability, visibility, and ability to attract high-caliber candidates. Recommendation: Enhance the program's academic quality through curriculum	The department is trying to strengthen academic standards, facilities, and marketing efforts to attract quality students.	Admission Committee	Admissions Office/ Department	Promotional materials, outreach budget

	strengthening, improved infrastructure, and compliance with AHPC standards. Implement targeted outreach campaigns, showcase alumni success stories, and establish partnerships with healthcare institutions to rebuild the program's reputation and increase enrollment.				
19	Non-registration of students with AHPC at enrollment. Finding: Newly admitted BS-MLT students are not being registered with the Allied Health Professionals Council (AHPC) at the time of enrollment. This oversight risks delays or complications in obtaining professional licensure upon graduation, potentially affecting employability and compliance with national regulatory requirements. Recommendation: Implement a mandatory AHPC registration process for all BS-MLT students during initial enrollment. Maintain an updated departmental register of student AHPC IDs and coordinate closely with the Council to ensure timely verification and certification in line with accreditation standards.	Department will ensure all students are registered with AHPC upon admission; maintain updated records.	Immediate	Department	AHPC registration forms, fees
HoD's Comments: In the light of the comprehensive observations made during the PREE visit, the BS-MLT program is fully committed to addressing all identified gaps through strategic and timely interventions. Priority actions will include aligning the program's vision and mission with departmental and institutional goals, strengthening faculty capacity by recruiting AHPC-registered MLT professionals, and ensuring subject–faculty relevancy in all courses. We will restructure and safeguard practical training, establish formal industry linkages, and standardize research and thesis protocols to enhance					

academic rigor. Immediate measures will be taken to upgrade infrastructure, expand learning resources, improve internet and e-library access, and provide essential student facilities. Furthermore, transparent communication channels, student orientation on scholarships and grievance procedures, and mandatory AHPC registration at enrollment will be institutionalized. These reforms, implemented in coordination with the Dean, QEC, and university administration, will ensure compliance with AHPC standards, enhance student learning outcomes, and reinforce the program's role in producing competent, ethical, and industry-ready medical laboratory professionals.

Quality Enhancement Cell (QEC)

Dated: 05th August, 2025

PREE Implementation Plan (Department of Computer Science)

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	The departmental mission and vision are not fully aligned with the university's overarching mission and vision. This misalignment creates a disconnect in strategic direction and institutional identity.	The process of revision has been initiated, and a review committee will be constituted to ensure complete alignment. The updated statements will be finalized in consultation with all stakeholders and formally approved to maintain strategic coherence with the objectives of Kohsar University Murree.	Within 6 months	HoD, Departmental Curriculum Committee	Meeting sessions, faculty input
2.	The MSCS program mission statement lacks clarity, specificity, and alignment with graduate-level expectations, particularly in terms of research orientation and professional competencies.	The MSCS mission statement is being revised to reflect graduate-level rigor, with clear emphasis on research orientation, professional competencies, and alignment with national higher education standards.	Within 6 months	HoD, Graduate Program Committee	Faculty input, expert review
3.	Program Educational Objectives (PEOs) and Program Learning Outcomes (PLOs) lack	OBE mapping between PEOs, PLOs, and CLOs is	Within 6 months	HoD, OBE Committee	Faculty workshops, OBE

	structured mapping, reducing the effectiveness of outcome-based education (OBE) it will undermines curriculum coherence	under development. Faculty workshops will be scheduled to standardize and document mappings for curriculum coherence.			templates
4.	The current curriculum is broadly aligned with HEC guidelines , but lacks courses addressing emerging domains such as Digital Rights Management (DRM).	While the current curriculum aligns with HEC guidelines, a proposal to integrate courses in emerging areas such as Digital Rights Management (DRM) will be presented in the next Board of Studies (BoS) meeting.	Within 12 months	BoS, HoD	Curriculum committee, domain experts
5.	There is no evidence of a fully implemented Outcome-Based Education (OBE) framework, particularly with respect to PLO and CLO integration.	A phased OBE framework implementation plan is underway, integrating PLO–CLO linkages into course files. Faculty will be trained on OBE documentation and assessment strategies.	Within 6 months	OBE Committee, Faculty	Training resources, assessment tools
6.	Weak alignment with Kohsar University Murree (KUM)'s mission affects curriculum relevance and institutional coherence.	The department will ensure curriculum objectives are explicitly tied to KUM's mission in the revised program documents and course outlines.	Within 6 months	HoD, Curriculum Committee	Policy documents, review sessions
7.	Inadequate documented evidence regarding the availability and utilization of essential laboratories and research facilities, which undermines the department's ability to demonstrate compliance during internal and external audits.	Two designated computer laboratories are fully operational for the Department of Computer Science students, equipped with the required hardware and software. The identified	Within 6 months	Lab Incharge, HoD	Inventory checklist, camera for documentation

		gap relates only to documentation. The department will prepare a comprehensive inventory, usage logs, and photographic evidence to be maintained for compliance during internal and external audits.			
8.	Incomplete course files and departmental archives, limiting transparency, consistency in academic delivery, and the effectiveness of periodic quality assurance reviews.	A departmental policy will be constituted to ensure complete and up-to-date course files, including CLO–PLO mappings, and archived at the end of every semester.	Within 6 months and ongoing each semester	Faculty, HoD	Course file templates, departmental archive
9.	Insufficient student orientation and training on digital resources and subject-specific facilities, resulting in suboptimal utilization of available academic and research infrastructure	Mandatory orientation sessions on digital libraries, lab facilities, and research tools will be conducted at the start of each semester.	Within 6 months and then at the beginning of each semester	HoD, Library Incharge	Training material, projector, lab access
10.	Lack of dedicated research facilities, including purpose-built discussion and collaboration rooms, which restricts students' ability to engage in focused research activities and scholarly discourse	The department will initiate a proposal for establishing a dedicated research discussion room and collaborative space for MSCS students.	Within 12 months	HoD, Dean's Office	Space allocation, furniture, IT setup
11.	MS Computer Science research students demonstrate limited awareness and proficiency in utilizing advanced research tools, digital libraries (e.g., IEEE Xplore, ACM Digital Library), and emerging technologies such as AI frameworks and cloud-based platforms. This reflects significant gaps in	Specialized workshops on IEEE Xplore, ACM Digital Library, AI frameworks, and cloud platforms are planned for the upcoming semester to enhance digital literacy and research capacity.	Within 6 months	HoD, Faculty	Access to databases, IT support

	academic advising, research orientation, and digital literacy support.				
12.	There is an absence of structured academic advising and mentoring mechanisms specifically tailored to the needs of MS research students. No documented evidence exists of scheduled counselling sessions, research supervision plans, or individualized academic progress tracking, which are critical for ensuring timely research progression and thesis quality	A formal academic advising framework will be developed, including supervision plans, progress tracking templates, and scheduled counselling sessions for MS students.	Within 6 months	HoD, Supervisors	Advising schedule templates, records system
13.	The absence of collaborative research initiatives and inter-institutional partnerships significantly limits opportunities for faculty development, interdisciplinary engagement, and innovation in the Department of Computer Science. This gap hinders the integration of global research trends and best practices into the academic and research ecosystem.	The department is exploring partnerships with national universities and research organizations to initiate collaborative projects and joint publications.	Within 12 months	HoD, Research Committee	Networking, conference participation
14.	There is limited documented evidence of faculty participation in structured training programs related to Outcome-Based Education (OBE), research supervision, and emerging technological domains such as artificial intelligence, data science, cloud computing, and cybersecurity. This adversely impacts the department's capacity to deliver high-quality postgraduate education aligned with national and international standards.	Faculty members will be nominated for structured training in OBE, research supervision, AI, data science, cloud computing, and cybersecurity through HEC-recognized programs.	Within 12 months	HoD, HR Dept	Training funds, HEC programs
15.	The lack of joint research collaborations with industry, academia, and research organizations reduces the department's	Efforts are underway to establish research collaborations with industry	Within 12 months	HoD, ORIC	MoU templates, industry contacts

	research visibility, access to external funding, and contributions to the broader scientific community. Strengthening research linkages is essential for enhancing institutional reputation, innovation capacity, and postgraduate student opportunities	and academia, aimed at securing external funding and enhancing postgraduate opportunities.			
16.	The MS Computer Science (MSCS) program has not yet secured the No Objection Certificate (NOC) from the Higher Education Commission (HEC), which constitutes a critical regulatory compliance gap. The absence of this approval compromises the program's formal recognition and long-term academic sustainability.	The process for obtaining the HEC NOC for MSCS is in progress, with required documentation submitted to the relevant authorities for expedited approval.	Within 6 months	HoD, Registrar Office	Documentation, liaison with HEC
17.	The departmental strategic plan remains unapproved and was developed without comprehensive stakeholder engagement, including input from faculty, students, and industry representatives. This limits the plan's relevance, institutional ownership, and alignment with the university's overarching strategic objectives.	The departmental strategic plan will be revised with active input from faculty, students, and industry stakeholders before submission for approval.	Within 6 months	HoD, Faculty	Strategic planning tools, workshops
18.	The existing structure and procedures of the Board of Advanced Studies and Research (BASR) lack clarity, responsiveness, and procedural robustness. Delays in thesis approvals, inconsistent policy enforcement, and insufficient integration of QA inputs highlight the need for immediate revision.	Recommendations have been sent to the BASR to streamline thesis approval processes, integrate QA inputs, and standardize policy enforcement timelines.	Within 6 months	HoD, BASR	Policy review, process guidelines
19.	The E-Rozgar Program has been implemented without formal administrative approval or official notification from the relevant university authorities. This lack of	The department will seek formal administrative approval and official notification for the E-Rozgar	Within 6 months	HoD, Registrar	Approval documents, administrative circular

	documentation undermines the program's legitimacy, hinders proper resource allocation, and may impede its integration within the institutional framework.	program to ensure its institutional legitimacy.			
20.	The existing computer laboratories lack sufficient hardware and software resources to support the advanced academic and research needs of MS Computer Science students. Limited access to high-performance computing, licensed software, and modern development environments adversely affects students' ability to meet course requirements and thesis objectives.	A budget proposal for upgrading lab hardware, software licenses, and high-performance computing systems has been submitted for inclusion in the upcoming fiscal plan.	Within 12 months	HoD, Procurement Dept	Budget allocation, vendor quotations
21.	There is no structured system for the monitoring, scheduling, or maintenance of computing infrastructure. The absence of utilization logs, uptime targets, and preventive maintenance protocols compromises the effective delivery of academic programs and limits the department's ability to respond to evolving technological needs.	A structured maintenance schedule and utilization log system will be implemented to ensure uptime targets and timely upgrades for computing infrastructure.	Within 6 months	HoD	Maintenance tools, log system
22.	The department currently lacks formal Memorandums of Understanding (MoUs) with relevant industry partners and academic institutions. Establishing such linkages is essential to enhance collaborative research opportunities, facilitate student internships and thesis projects, and expose MS Computer Science students to real-world technological challenges. The absence of these partnerships limits interdisciplinary	Draft MoUs with relevant industry and academic institutions will be prepared to support collaborative research, student internships, and practical project opportunities.	Within 6 months	HoD, ORIC	MoU drafts, meeting sessions

	engagement, external funding potential, and practical research application.				
23.	Departmental records often use a Yes/No response format without evidence-based justification, undermining credibility.	All departmental reports will transition from Yes/No responses to evidence-based documentation, including supporting data and proofs, for credibility in audits.	Within 6 months and ongoing	HoD, Faculty	Evidence templates, QA training
24.	The absence of strategic development plans limits the ability to set measurable long-term goals.	The department will create a measurable, long-term strategic development plan aligned with KUM's objectives and national higher education priorities.	Within 6 months	HoD, Faculty, Dean	Strategic planning resources
