

Standard 1: PROGRAMME MISSION, OBJECTIVES AND OUTCOMES

1: Expectation:

Each program must have a mission, measurable objectives and expected outcomes for graduates. Outcomes include competency and tasks graduates are expected to perform after completing the programme. A strategic plan must be in place to achieve the programme objectives. The extent to which these objectives are achieved through continuous assessment and improvements must be demonstrated.

1.1 Expectation outcome indicators (EOIs)

The program must have documented measurable objectives that support Faculty / university and institution mission statements.

1.1.1 Document institution, university and program mission statements

<u>University Mission Statement:</u> As a premier higher education institution, the Kohsar University, Murree (KUM) aspires to be a leading provider of high-quality education in a broad range of disciplines, particularly those that are relevant to the needs of mountainous areas, while also striving for national and international competitiveness.
<u>Department Mission Statement:</u> Our mission is to recognise the need for multidisciplinary responses to complex social challenges through cross-disciplinary collaboration. A dedication to diversity and inclusion is frequently important to the department's objective, enabling a learning environment that respects and values various points of view and experiences.
<u>Program Mission Statement:</u> Our Sociology program helps students understand how people live, work, and interact in society. We focus on real-life social issues like inequality, culture, community, and change. Through learning and research, we aim to build awareness, critical thinking, and a sense of responsibility toward others. Our goal is to prepare students to play a positive role in making society more fair, inclusive, and understanding for everyone.

Indicative Evidence: Evidence of Vision Mission genesis/approval.

1.1.2 State Program Educational Objectives:

(Program educational objectives are intended to be statements that describe the expected accomplishments of graduates during the first several years following graduation from the program.)

Program Objectives:

1. To educate the students' understanding of sociological theories, concepts, and methods, fostering a deep and critical comprehension of social structures, processes, and issues.
2. **To develop students' ability to critically analyse social phenomena, encouraging them to question assumptions, recognize biases, and evaluate evidence in the study of society.**
3. To facilitate rigorous research that contributes to the body of sociological knowledge, encouraging students and faculty to engage in innovative studies that address contemporary social problems.
4. To inspire a sense of ethical responsibility and social justice in students, encouraging them to apply sociological knowledge to promote equivalence and human dignity.
5. To encourage community engagement through partnerships, outreach programs, and service-learning opportunities, enabling students to apply their sociological knowledge in practical contexts.

1.1.3 Describe how each objective is aligned with the institution mission statements.

Program Objectives	Department Mission Statement
Promote Sociological Knowledge	To educate the students' understanding of sociological theories, concepts, and methods, fostering a deep and critical comprehension of social structures, processes, and issues.
Encourage Critical Thinking	To develop students' ability to critically analyse social phenomena, encouraging them to question assumptions, recognize biases, and evaluate evidence in the study of society.
Support Research and Innovation	To facilitate rigorous research that contributes to the body of sociological knowledge, encouraging students and faculty to engage in innovative studies that address contemporary social problems.
Engage with the Community	To encourage community engagement through partnerships, outreach programs, and service-learning opportunities, enabling students to apply their sociological knowledge in practical contexts.

1.1.4. Outline the main elements of the strategic plan to achieve the programme objectives.

1. Curriculum Development and Revision
2. Research and Filed work
3. Professional and Soft Skills Development

1.1.5. Provide for each objective how it was measured, when it was measured and improvements Identified and made. (Use Alumni and Alumni survey, Focus group interview of employers and alumni, Job Placement & Career Progression Data, Community & professional engagement, results of Standardized exams, Advisory Board Input etc.

Following Table provides a format for program objectives assessment.

Objective	How Measured	When Measured	Improvement Identified	Improvement Made
Promote Sociological Knowledge	Student performance in exams, class discussions	End of each semester	Gaps in understanding core sociological theories	Added tutorial sessions and simplified reading materials
Support Research and Innovation	Student research projects, faculty evaluations	Annually	Limited student involvement in research	Launched student research groups and workshops
Encourage Critical Thinking	Assignments, presentations, participation in debates	Mid and end of semester	Surface-level analysis in student responses	Integrated more case studies and discussion activities
Engage with the Community	Participation in fieldwork, community projects	Throughout the academic year	Low engagement in outreach activities	Increased collaboration with local NGOs and organized field visits

1.2 Expectation Outcome Indicators (EOIs)

The program must have documented outcomes for graduating students. It must be demonstrated that the outcomes support the program objectives and that graduating students are capable of performing these outcomes.

List the Program Outcomes:

1. Understand how people live, work, and interact in society
2. Explore real-life social issues such as inequality, culture, community, and social change
3. Develop critical thinking and problem-solving skills
4. Build awareness of social diversity and human behavior
5. Encourage a strong sense of social responsibility and ethical understanding

1.2.1 Describe how the programme outcomes support the programme objectives.

{

Table 1.2.1: Outcomes versus Objectives

Program Objectives	1	2	3	4	5
i	1				
ii		2			
iii			3		
iv				4	
v					5

1.2.2 Describe the means for assessing the extent to which graduates are performing the stated program outcomes/learning objectives. This should be accomplished by the following:

This should be accomplished by the following:

- i. conducting a survey of graduating seniors every semester
- ii. carefully designed questions asked during research and viva presentations; these questions should be related to programmed outcomes.
- iii. Results of Capstone Courses/assignment/ Thesis

Program Learning Outcomes	How Assessed	Results & Improvement Identified/Made
Understand key sociological concepts and theories Apply sociological knowledge to analyze social issues	Exams, quizzes, and classroom participation Assignments, term papers, case studies	Students struggled with abstract theories Provided simplified summaries and real-life
Demonstrate critical and analytical thinking skills	Presentations, debates, reflective essays	Weak arguments observed Added structured debate sessions and critical thinking exercises
Conduct basic sociological research using appropriate methods	Research projects, proposal writing, fieldwork reports	Lack of research design skills Conducted research methodology workshops
Communicate effectively in oral and written forms	Class presentations, group discussions, and report writing	Writing lacked structure Introduced academic writing sessions
Show awareness of diversity, ethics, and social responsibility	Group activities, field visits, and community engagement reflections	Limited awareness of local issues Encouraged fieldwork in nearby communities and post-visit reflections
Engage in teamwork and collaboration	Group projects and collaborative assignments	Uneven participation in groups Used peer evaluation and clearer group roles

Indicative Evidence:

The data obtained from the above sources should be analyzed and presented in the assessment report. It is recommended that the above surveys should be conducted, summarized and added to the self-assessment report. Departments should utilize the results of the surveys for improving the programme as soon as they are available.

1.3 Expectation outcome indicators (EOIs)

The results of programme's accreditation and the extent to which they are used to improve the programme must be documented.

1.3.1 Describe the actions taken based on the results of periodic accreditation

N.A

Indicative Evidence: Compliance of last Accreditation Report/PGPR.

1.3.2 Describe major future program improvements plans based on recent assessments.

We have approved from Syndicate MS /Mphil Program, and our department have plan in future launching PHD program.

1.3.3 List strengths and weaknesses of the program

Program Strengths	Program Weaknesses
The Department of Sociology is supported by a highly qualified faculty with advanced degrees in sociology and related disciplines. Faculty members actively engage in community-based research, participatory fieldwork, and applied sociological studies, ensuring the academic and practical relevance of the program.	Limited Access to a Dedicated Social Research Center or Lab Although fieldwork is encouraged, the department currently lacks a dedicated space for data analysis, community interaction, and sociological simulation, which limits hands-on experience in structured research environments.
The curriculum incorporates a mix of theoretical grounding and applied learning, covering key areas like gender, environment, rural development, migration, and social policy. It is tailored to equip students with skills relevant to NGOs, academia, research institutions, and public policy roles.	Lack of On-Campus Internship or Partnership Facilities While collaborations with local organizations and agencies exist, the university currently does not have an in-house internship cell or long-term MOUs with leading research institutes or policy think tanks, which could otherwise enhance experiential learning.

1.3.4 List significant future development plans for the program.

1. Requirement research and infrastructure
2. Partnerships and MOUs with different national and inter-national organization
3. Launch specialized certification tracks
4. Promote student-led research & innovation
5. Launching of MS and PhD programs

1.4 Expectation outcome indicators (EOIs)

1.4.1 The department must assess its overall performance periodically using quantifiable measures.

Performance Measures	Results
Present student enrolments (undergraduate and graduate) during the last three years indicating percentages of honors students	Over the past four academic years, undergraduate enrolment has shown a steady upward trend from 2021 to 2025 107 students in 2025 reflecting increased interest in the program and the department's growing academic reputation. Honhaar Scholarship =01 CM Laptop Scheme=06 PM laptop scheme=04
Student faculty ratio	107/3=35.6
Average graduating grade point average per semester	Over the past three academic years, we've seen a steady and encouraging rise in our students' academic performance. The average graduating GPA during the Spring semesters climbed from 3.5 in 2021–2025 to an impressive 3.7 in 2024–2025 .
Average time for completing the program	Minimum 8 semester 4 year
Attrition rate	
Percentage of employers that are strongly satisfied with the performance of the department's graduates (employer Survey)	University conducted a Faculty Satisfaction survey, and reports are pending.
Indicate the median/average student evaluation for all modules	University conducted student evaluation and Satisfaction survey, and reports are pending.
% of faculty awarded excellence in teaching award	Honorarium based forms are submitted recently.
No. of journal publications per faculty per year	Dr. Muhammad Ibrahim 2024 (05) 2025 (05) Muhammad Waqas 2024 (04) 2025 (01) Syed Mansoor Hussain Shah 2024 (01) 2025 (03)
No. of funded projects	No
No. of conference publications per faculty per year	Dr.Muhamamd Ibrahim 06 Muhammad Waqas 05 Syed Mansoor Hussain Shah 07
% of faculty awarded excellence in research award	N.A
Number of short courses per year, workshops and seminars organized for community services	International summit on building a thriving social enterprise ecosystem in Pakistan How to write synopsis in social science How to write synopsis and thesis in sociology

{

	International conference on occupational health & safety and sustainable practices(OHS-SBP) Awareness drives and gender sensitization The art of effective communication: building connection and influence Social awareness campaign education, health, environment volunteerism capacity building.
Faculty and students satisfaction regarding the administrative services offered by the department	Surveys' results are submitted and waiting for the results

Indicative Evidence: Evidence of data of the above indicators.

1.5 Expectation outcome indicators (EOIs)

The department/programme must take deliberate steps to engage all students, individually and collectively, as partners in the assurance and enhancement of their educational experience.

1.5.1. Describe actions taken to involve students in the evaluation of teaching and learning.

Ans: Students are regularly involved in evaluating teaching and learning through anonymous feedback forms shared at the end of each semester and continuous assessment through quiz, assignments, presentation Form.

1.5.2 Describe actions taken as a result of student evaluation.

Ans: Based on student evaluations, we have adjusted teaching methods, such as incorporating more interactive and practical sessions. Additionally, timely feedback on assignments and improved access to lab resources were implemented in response to student suggestions.

1.5.3 Describe how actions are communicated to students.

Ans: Actions taken in response to student feedback are communicated through classroom announcements, notice boards, and during student-faculty meetings. In some cases, changes are also shared via WhatsApp groups or student portals to ensure transparency and engagement.

1.5.4 Describe actions taken to engage students in decision-making about the quality of their higher education.

Ans: Students are engaged in decision-making through their representation in departmental meetings, curriculum review sessions, and quality assurance discussions. Feedback is also actively sought during focus group discussions and course evaluations, ensuring their voices contribute to {

continuous improvement in academic quality.

1.5.5 Describe actions taken to recruit student members to appropriate deliberative committees.

Ans: Students are recruited to relevant deliberative committees by inviting nominations from each class or through faculty recommendations based on academic performance and leadership qualities.

1.5.6 Describe training given to students to enable their participation in decision-making committees.

Ans: To prepare students for participation in decision-making committees, brief orientation sessions are conducted to explain the committee's purpose, roles, and responsibilities. Additionally, students receive guidance from faculty mentors and may attend workshops on communication, leadership, and academic governance, enabling them to contribute effectively and confidently in discussions.

1.5.7 Terms of reference of deliberative committees on which students sit.

- A. Students provide feedback on course content, teaching methods, and relevance to professional practice. They contribute suggestions for updates or improvements based on their learning experiences.
- B. Student members participate in discussions regarding student welfare, code of conduct, extracurricular activities, and resolution of student concerns.
- C. Students provide input on the availability and usefulness of academic resources, including books, journals, and e-learning platforms.

Standard-2: CURRICULUM DESIGN AND ORGANIZATION

The curriculum must be designed and organized to achieve the program's objectives and outcomes. Also, course objectives must be in line with program outcomes. The breakdown of the curriculum must satisfy the standards specified in this section. Curriculum standards are specified in terms of credit hours of study. A semester credit hour equals one class hour or two to three laboratory hours per week. The semester is approximately fifteen weeks.

Provide the following information about the programme's curriculum:

Table 2.1: Curriculum course requirements

Course Specification Template:

For each course in the program that can be counted for credit, provide the following details:

Information Required	Information Provided
Course Title	yes
Course Learning Outcomes	yes
Catalog description	yes
Textbook(s) and references	yes
Syllabus breakdown in lectures	yes
Computer usage	yes
Laboratory	No
Detailed Course Outline (please attach)	yes

Indicative Evidence: Program Specification with Course details.

2.1 Expectation outcome indicators (EOIs)

2.1.1 The curriculum must be consistent and supports the program's documented objectives.

Describe how the program content (courses) meets the program objectives

Courses	Program Objectives						
	1	2	3	4	5	6	7
Introduction to Sociology	✓						
Development of Social Thought	✓	✓	✓	✓			
Methods of Social Research			✓				
Sociological Theories		✓	✓				
Community Development	✓			✓			
Social Change and Transformation	✓			✓			
Criminology	✓	✓	✓				

{

--	--	--	--	--	--	--	--

Table: 2.1.1

Indicate which courses contain a significant portion (more than 30%) of the following elements:

All the courses listed in Table 4.4 comprise of theoretical background (40-50%), problem analysis (30-40%) and solution design (30-40%). For problem analysis, group work and assignments are given. For Solution design students either prepare a term paper or project presentations on related skills acquired from each course.

Elements	Courses
Theoretical background	Development of Social Thought, Sociological Theories
Problem analysis	Methods of Social Research, Social Statistics
Solution design	Community Development, Social Issues of Pakistan

Table 4.5: Standard 2-2 requirement

2.2 Expectation outcome indicators (EOIs)

The curriculum must satisfy the core requirements for the program, as specified by the respective accreditation body.

Ans: The curriculum is designed to meet the core requirements set by the Higher Education Commission (HEC) and relevant accreditation bodies. It ensures academic accuracy, conceptual clarity, and professional competence in the field of Sociology, enabling students to understand and analyze complex social structures and processes.

2.3 Expectation outcome indicators (EOIs)

The curriculum must satisfy the major requirements for the program as specified by HEC, the respective accreditation body / councils.

Ans: The curriculum fulfills the major requirements outlined by HEC for the BS Sociology program, covering essential areas such as sociological theory, research methodology, gender studies, criminology, rural and urban sociology, etc, thereby ensuring national academic and professional standards are met.

2.4 Expectation outcome indicators (EOIs)

The curriculum must satisfy general education, arts, and professional and other discipline requirements for the program, as specified by the respective accreditation body / council.

Ans: The program incorporates general education and interdisciplinary courses such as English, Islamic studies, political science, economics, and statistics as mandated by HEC and relevant councils. This ensures a well-rounded education and enhances students' critical thinking, civic understanding, and analytical skills. We followed UGEP-HEC 2023.

2.5 Expectation outcome indicators (EOIs)

{

The information Technology component of the curriculum must be integrated throughout the program.

Ans: Information technology is embedded in the curriculum through courses like research methods, where students use software for data analysis (e.g., SPSS and NVIVO), and in report writing and presentations. These components enhance students' digital literacy, academic research capabilities, and their ability to critically interpret social data.

2.6 Expectation outcome indicators (EOIs)

Oral and written communication skills of the student must be developed and applied in the program.

Ans: The program emphasizes oral and written communication skills through seminar presentations, class discussions, community field reports, and term papers. Students are trained to articulate sociological arguments effectively in both academic and applied contexts. Allied courses in English and communication skills support this goal.

2.7 Expectation outcome indicators (EOIs)

Conduct feedback surveys each semester for each course from students and faculty.

Indicative Evidence: Evidence of 2.1 to 2.8 available in Program Specification.

Standard-3: Subject Specific Facilities

Expectation:

Subject-specific facilities must be adequately available and accessible to faculty members and students to support teaching and research activities.

Lab Specification Template:

Describe the laboratories that are available for use in the program under assessment. Indicate for each lab the following

Information Required	Information Provided
Course title	yes
Location and area	yes
Objectives	yes
Adequacy for instruction	N/A
Courses taught	yes
Software available if applicable	YES
Major Apparatus	N.A
Major Equipment	N.A
Safety regulations	N.A

3.1 Expectation outcome indicators (EOIs): Laboratory manuals/documentation/instructions for experiments must be available and readily accessible to faculty and students.

3.1.1 Describe the subject-specific facilities that are available for use in the programme under assessment.

Indicative Evidence: List of facilities (verified)

1. Classrooms
2. Projectors
3. Whiteboard

3.1.2 Explain how students and faculty have adequate and timely access to the manuals/documentation and instructions.

Indicative Evidence: Sample Manual

3.1.3 Benchmark with similar departments in reputable institutions to identify shortcomings in the laboratory.

3.2 Expectation outcome indicators (EOIs): There must be adequate support personnel for

{

instruction and maintaining the laboratories.

Answer: N.A

3.2.1. Indicate for each laboratory: support personnel, level of support, nature and instructional support.

N/A

3.3 Expectation outcome indicators (EOIs): The institution's computing infrastructure and facilities must be adequate to support the programme's objectives

3.3.1 : Describe how the computing facilities support the computing component of the programme.

Yes

3.3.2 : Benchmark with similar departments in reputable institutions to identify shortcomings in computing infrastructure and facilities.

Criterion 4: STUDENT SUPPORT AND ADVISING

Expectations:

Students must have adequate support to complete the program in a timely manner and must have an ample opportunity to interact with their instructors and receive timely advice about program requirements and career alternatives.

4.1 Expectation outcome indicators (EOIs) 4: Modules must be offered with sufficient frequency and number for students to complete the programme in a timely manner.

Ans: The department ensures that **courses are delivered with sufficient frequency and planning**, allowing students to fulfill all academic requirements **without unnecessary delays**. Careful semester planning, faculty coordination, and support mechanisms are in place to maintain **academic continuity and timely graduation**.

4.1.1 Provide the department's strategy for course offerings.

Ans: The department follows a **well-defined and structured strategy** to ensure timely and effective course offerings that support smooth student progression throughout the BS Sociology program.

Semester-wise Course Mapping:

Annual Academic Calendar Planning:

Demand-Based Elective Scheduling:

Thesis/Capstone & Internship Planning:

Resource Optimization:

4.1.2 Explain how often required courses are offered.

All **required (core) courses** in the BS Sociology program are offered on a **regular and systematic basis**, aligned with the program's semester-wise structure as per the approved BOS.

4.1.3 Explain how often elective courses are offered.

Elective courses in the BS Sociology program are generally offered primarily in the **5th semester**, when students are better prepared to explore specialized or emerging areas of interest. as per the approved BOS.

The selection and scheduling of electives are based on:

- A.** Student interest and enrollment demand.
- B.** Availability of qualified faculty.
- C.** Relevance to industry trends and future career opportunities.

4.1.4 Explain how required modules outside the department are managed to be offered in sufficient number and frequency.

Ans: Required modules that are taught by other departments such as English, Islamic Studies, Pakistan Studies, Social Statistics, and Computer Skills, Psychology, Media and Tourism are coordinated through a collaborative academic planning process led by the Office of the Controller of Examinations and the faculty Incharge office.

Standard 5: TEACHING FACULTY/STAFF

Expectation

Teaching faculty/staff must be current and active in their discipline and have the necessary technical depth and breadth to support the programme. There must be enough department members to provide continuity and stability, to cover the curriculum adequately and effectively, and to allow for scholarly activities

Expectation outcome indicators (EOIs)

Expectation outcome indicators (EOIs): There must be enough full-time teaching staff who are committed to the programme to provide adequate coverage of the programme areas/modules with continuity and stability. The interests and qualifications of all teaching staff must be sufficient to teach all modules, plan, modify and update modules and curricula. All teaching staff should have a level of competence that would normally be obtained through graduate work in the discipline. The teaching staff should hold a PhD and Mphil in the discipline and/or vocational experience in their area of expertise.

Complete a table indicating programme areas and number of teaching staff in each area.

Sr #	Program Areas	Full Time Faculty in each Areas
1	Sociology related to all courses, and Rural Sociology, Criminology, Sociology of Health and Demography	Dr. Muhammad Ibrahim
2	Sociology related to all courses Environmental Sociology, Social Research Methodology, Migration	Mr. Muhammad Waqas
3	Sociology related to all courses Sociological Theory, Sociology of Religion, Social Anthropology and Introduction to Sociology	Mr. Syed Mansoor Hussain Shah

Each member of the teaching staff should complete a CV.

Name of Teaching Staff	Designation	CV Submission status
Dr. Muhammad Ibrahim	HOD Assistant Prof	Yes
Mr. Muhammad Waqas	Lecturer	yes
Syed Mansoor Hussain Shah	Lecturer	yes

Expectation outcome indicators (EOIs): Teaching staff must remain current in the discipline and sufficient time must be provided for scholarly activities and professional development. Also,

{

effective programmes for staff development must be in place.

5.1 Describe the criteria for teaching staff to be deemed current in the discipline and based on these criteria and information in the teaching staff member's CV, what percentage of them is current. The criteria should be developed by the department.

Program area subjects have been assigned to the most relevant faculty member.

4.2 Describe the means for ensuring that full-time teaching staff have sufficient time for scholarly and professional development.

Yes. Teachers have received HEC training by faculty development manners.

5.3 Describe existing teaching staff development programmes at the departmental and institutional levels. Demonstrate their effectiveness in achieving teaching staff development.

Yes. On a departmental level, different seminars and workshops are organized, and faculty members are also encouraged to participate in different national and international events. Some of the training workshops are organized by the HEC.

4.3 Expectation outcome indicators (EOIs): Modules in the major area of study must be structured to ensure effective interaction between students, department and teaching assistants.

Ans:

Area	Practices in Place
Lecture Delivery	Faculty members maintain interactive classroom environments using case discussions, questioning, and real-world examples during lectures and practical.
Practical Support	Teaching Assistants hands-on sessions, guiding students, reinforcing concepts, and ensuring safety protocols are followed.
Office Hours & Availability	Faculty maintain designated office hours for student consultations, academic advising, and feedback discussions.
WhatsApp/Online Forums	Informal academic support is provided via class WhatsApp groups, LMS, or Google Classrooms, where students can ask questions and get real-time responses.
Student Feedback Channels	Regular feedback is collected through forms and class reps, allowing for responsive communication between students, instructors, and departmental heads.
Mentorship & Counseling	Final-year students are assigned project supervisors for close academic mentorship and research guidance.

4.3.1 Describe how you achieve effective student / faculty interaction in courses taught by more than one person such as two faculty members, a faculty member and a teaching assistant or a lecturer.

{

Ans: In courses delivered by multiple instructors—such as two faculty members, or a faculty member, the department ensures seamless coordination and clear communication to maintain effective student engagement.

A. Defined Roles and Responsibilities:

B. Joint Planning Meetings:

C. Consistent Communication with Students:

D. Lab and Practical Coordination:

E. Integrated Assessment and Feedback:

4.4 Expectation outcome indicators (EOIs): Guidance on how to complete the programme must be available to all students and access to academic advising must be available to make module decisions and career choices.

Ans:

Area	Practices Implemented
Program Completion Guidance	Students receive a program handbook and semester-wise roadmap at the beginning of their studies, outlining course sequence, credit hours, and key milestones.
Academic Advising	Faculty members are assigned as academic advisors or mentors, especially in early semesters, to help students with course selection and workload planning.
Module/Course Selection	Prior to each semester, advisors assist students in selecting electives or re-take courses, ensuring alignment with academic goals and timely graduation.
Career Counseling	Guest speaker sessions, alumni talk, and career counseling seminars are conducted to expose students to professional pathways in diagnostics, research, and industry.
Project & Internship Support	Final-year students are guided in research topic selection, proposal writing, and choosing suitable internship placements based on their career interests.
Open-Door Policy	Students are encouraged to approach faculty at any time for academic and career-related concerns, promoting a student-

Area**Practices Implemented**

centered advising culture.

4.3.1 Describe how students are informed about program requirements.

Ans: Students are informed about the program requirements through multiple formal and accessible channels from the time of enrollment:

- A. Orientation Sessions.
- B. Program Handbook & Roadmap.
- C. Notice Boards and Digital Platforms.
- D. Academic Advising.
- E. Course Outlines and Weekly Plans.

4.3.2 Describe the advising system and indicate how its effectiveness is measured.

Ans: The department has a structured academic advising system designed to support students throughout their academic journey, from enrollment to graduation.

- A. Faculty Advisors Assigned by Semester.
- B. Scheduled & Open-Door Advising.
- C. Career and Internship Guidance.
- D. Use of Digital Platforms:

4.3.3 Describe the student counseling system and how students get professional counseling when needed.

Ans: The department maintains a student counseling system that supports both academic and personal well-being, ensuring students have access to the help they need throughout their educational journey as well as following systems

- A. Academic Counseling.
- B. Career Counseling.
- C. Psychological and Emotional Support:

{

D. Access and Awareness:

4.3.4 Indicate if students have access to professional counseling; when necessary.

Ans: Yes, students have access to professional counseling services when needed. When a student is identified as facing emotional, psychological, or personal challenges beyond academic concerns, they are referred to the university's designated medical center or connected with a licensed clinical psychologist available through campus or affiliated hospitals.

4.3.5 Describe opportunities available for students to interact with practitioners, and to have membership in technical and professional societies.

A. **Guest lectures, seminars, and panel discussions** are regularly organized

STANDARD 6: INSTITUTIONAL POLICIES AND PROCESS CONTROL

Expectation

The processes by which major functions are delivered must be in place, controlled, periodically reviewed, evaluated and continuously improved.

Expectation outcome indicators (EOIs)

6.1 Expectation outcome indicators (EOIs): The process by which students are admitted to the programme must be based on quantitative and qualitative criteria and clearly documented.

6.1.1 This process must be periodically evaluated to ensure that it is meeting its objectives.

Periodically Evaluation Status	

6.1.2 Describe the programme admission criteria at the institutional level or department if applicable.

Yes. Our institution and department have approved policy for admission.

6.1.3 Describe policy regarding programme/credit transfer.

Evidence: Document of Transfer Policy

6.1.4 Indicate how frequently the admission criteria are evaluated and if the evaluation results are used to improve the process

{

6.2 Expectation outcome indicators (EOIs): The process by which students are registered on the programme and monitoring of students' progress to ensure timely completion of the programme must be documented. This process must be periodically evaluated to ensure that it is meeting its objectives.

6.2.1 Describe how students registered on the programme.

As per admission policy of the University

6.2.2 Describe how students' academic progress is monitored and how their programme of study is verified to adhere to the degree requirements.

6.2.3 Indicate how frequently the process of registration and monitoring are evaluated and if the evaluation results are used to improve the process.

6.3 Expectation outcome indicators (EOIs) 6: The process of recruiting and retaining highly qualified department members must be in place and clearly documented. Also, processes and procedures for department evaluation, and promotion must be consistent with the institution mission statement. These processes must be periodically evaluated to ensure that they are meeting with their objectives.

6.3.1 Describe the process used to ensure that highly qualified teaching staff are recruited to the programme.

As per University Act.

6.3.2 Indicate methods used to retain excellent teaching staff members.

University policy.

6.3.3 Indicate how evaluation and promotion processes are in line with the institution mission statement.

The evaluation and promotion processes for teaching staff are aligned with the university's mission to promote academic excellence, research innovation, and community service.

- Faculty are evaluated annually based on teaching effectiveness, research output, student feedback, and departmental contribution, reflecting the institution's commitment to quality education.
- Promotion criteria follow HEC guidelines, emphasizing qualifications, research publications, academic service, and continuous professional development, in line with the university's goal of nurturing academic leadership.
- Participation in faculty development programs, curriculum improvement, and student mentorship is also recognized during evaluations, supporting the mission of fostering holistic and socially responsible graduates

6.3.4 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

- 7 The process is evaluated regularly, and the results are actively used to improve faculty performance, satisfaction, and alignment with institutional goals as per based on University KPI.

7.1 Expectation outcome indicators (EOIs): The process and procedures used to ensure that teaching and delivery of module material to the students emphasizes active learning and that module learning outcomes are met. The process must be periodically evaluated to ensure that it is meeting its objectives.

7.1.1 Describe the process and procedures used to ensure that teaching and delivery of module material is effective and focus on students learning.

Different activities are conducted on departmental levels along with teaching to focus on student learnings.

7.1.2 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

The effectiveness of teaching and module delivery is evaluated at the end of every semester through:

- Student evaluation of teaching (SETs)
- Faculty peer reviews
- Course file audits by the Quality Enhancement Cell (QEC)

7.2 Expectation outcome indicators (EOIs): The process that ensures that graduates have completed the requirements of the programme must be based on standards, and effective and clearly documented procedures. This process must be periodically evaluated to ensure that it is meeting its objectives.

7.2.1 Describe the procedures used to ensure that graduates meet the programme requirements.

7.2.2 The department follows a well-defined and structured process to ensure that all graduating students have fulfilled the academic, practical, and professional requirements of the BS Sociology program. Key procedure Include:

- A. Credit Hour Monitoring.
- B. Course Completion and GPA Requirements.
- C. Final Year Project & Internship.

D. Departmental Clearance.

E. Examination and Controller's Verification.

7.2.3 Describe when this procedure is evaluated and whether the results of this evaluation is used to improve the process.

The procedure for verifying that students meet graduation requirements is evaluated annually, typically at the end of each academic session during departmental review meetings and in coordination with the Examination Branch and Quality Enhancement Cell (QEC).

Expectation outcome indicators (EOIs) 6.6: Programmes produce information for external audiences about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.6.1 Mission, values and overall strategy are publicly available on the institution's website.

Yes.

6.6.2 The process for application and admission to the programme of study is clearly described to prospective students.

On university websites, well defined SOS are available for facilitation.

6.6.3 Information is made available to prospective students to help them select their programme with an understanding of the academic environment in which they will be studying and the support that will be made available to them.

Yes.

Expectation outcome indicators (EOIs) 6.7: Programmes produce information for students about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.7.1 Information on the programme of study is made available to current students at the start of their programme and throughout their studies.

Yes.

6.7.2 Programmes set out what they expect of current students and what current students can expect of the programme.

6.7.3 When students leave their programme of study, they are issued with a detailed record of their studies, which gives evidence to others of the students' achievement in their academic programme.

6.8 Expectation outcome indicators (EOIs): Programmes are managed to high ethical standards when dealing with faculty, staff, students and other stakeholders.

6.8.1 Programmes practice and exemplify the values and ethical principles articulated in the institution's mission and ethics policies.

Yes.

6.8.2 Programmes safeguard the interests of students, faculty and staff.

yes

6.8.3 Programmes ensure equality, diversity and inclusion.

yes

6.8.4 Programmes have a transparent approach to all communication, including academic integrity and complaints.

Yes.

STANDARD 7: INSTITUTIONAL SUPPORT AND FACILITIES

Expectation

The institution's support and the financial resources for the programme must be sufficient to provide an environment in which the programme can achieve its objectives and retain its strength. Also, the institutional facilities, including the library, classrooms and offices, must be adequate to support the objective of the programme. To satisfy this criterion several standards must be met.

Expectation outcome indicators (EOIs)

7.1 Expectation outcome indicators (EOIs): There must be sufficient support and financial resources to attract and retain high-quality teaching staff and provide the means for them to maintain competence as teachers and scholars.

7.1.1 Describe how the programme meets this standard. If it does not, explain the main causes and plans to rectify the situation.

Ans: The programme meets this standard by ensuring that its structure, curriculum, teaching methods, and assessment strategies are aligned with national academic benchmarks and professional standards. Regular reviews are conducted through departmental meetings, feedback from stakeholders, and quality assurance processes to maintain relevance and effectiveness.

7.1.2 Describe the level of adequacy of secretarial support, technical staff and office Equipment

Ans: N.A

7.2 Expectation outcome indicators (EOIs): There must be an appropriate number of high-quality graduate students, research assistants and PhD students.

Ans: The programme maintains an appropriate number of high-quality graduate students, research assistants, Selection is based on merit, academic performance, and research potential, aligned with institutional and national standards. Continuous efforts are made to attract and retain talented students through scholarships, mentorship, and a supportive research culture.

7.2.1 Provide the number of graduate students, research assistants and PhD students for the last three years.

N/A

7.2.2 Provide the teacher: graduate student ratio for the last three years

7.3 Expectation outcome indicators (EOIs): Financial resources must be provided to acquire and maintain library holdings, laboratories and computing facilities.

7.3.1 Describe the resources available for the library.

Ans: The university library is well-equipped with both physical and digital resources to support academic and research needs. Each campus (Jhika Gali, GPO, and Punjab House) hosts a library with subject-specific collections, including textbooks, reference books, journals, and academic magazines relevant to medical and health sciences.

In addition, students and faculty have access to online databases, e-books, and research journals through digital platforms subscribed by the university. The library offers computer workstations, internet access, printing/scanning services, and a quiet study environment. Trained library staff are available to assist with literature research and reference support.

7.3.2 Describe the resources available for laboratories.

Ans N.A

7.3.3 Describe the resources available for computing facilities.

Ans: The programme provides access to dedicated computer labs equipped with modern desktops, high-speed internet, and essential academic software such as Microsoft Office, SPSS, reference management tools, and statistical analysis programs. Students and faculty can access online learning platforms, research databases, digital libraries, and institutional portals for academic resources and communication.

7.4 Expectation outcome indicators (EOIs): The institution must have the infrastructure to

{

support new trends in learning such as e learning.

7.4.1 Describe infrastructure and facilities that support new trends in learning.

Ans: The institution has developed a supportive infrastructure to promote modern learning methods, including e-learning and blended education. Smart classrooms are equipped with multimedia projectors, internet connectivity, and interactive whiteboards to facilitate digital instruction. Faculty are trained to use online teaching tools such as Zoom and Google Meet for live or recorded sessions.

High-speed Wi-Fi is available throughout the campus, and computer labs support access to digital platforms, e-libraries, and online databases. These facilities ensure that students are well-prepared to engage with current and emerging trends in health sciences education.

7.4.2 Indicate how adequate the facilities are.

Ans: The available facilities are largely adequate to support e-learning and blended instructional approaches. Computer labs and campus-wide internet connectivity provide students with sufficient access to digital resources. However, to further enhance the learning experience, continuous upgrades in bandwidth, software tools, and faculty training are planned. Overall, the infrastructure sufficiently meets current demands and supports future scalability.

7.5 Expectation outcome indicators (EOIs): The library must possess an up-to-date technical collection relevant to the programme and must be adequately staffed with professional personnel.

7.5.1 Describe the adequacy of the library's technical collection.

Ans: The library maintains a well-curated technical collection that adequately supports the academic and research needs of the programme. Teachers' reference books are available for students including up-to-date textbooks, reference books, manuals, and subject-specific journals covering core areas such as Sociology and Sub fields.

7.5.2 Describe the support rendered by the library.

Ans: The library provides comprehensive support to students and faculty through access to physical and digital academic resources, quiet study spaces, and trained library staff. Services include book lending, reference assistance, literature search guidance, and orientation sessions on how to use digital databases and citation tools.

7.6 Expectation outcome indicators (EOIs): Classrooms must be adequately equipped, and offices must be adequate to enable teaching staff to carry out their responsibilities.

7.6.1 Describe the adequacy of the classrooms.

Ans: The classrooms are generally adequate in terms of size, ventilation, lighting, and seating capacity to accommodate enrolled students comfortably. Most rooms are equipped with basic teaching aids such as whiteboards, projectors, and multimedia systems to support effective instructional delivery.

7.6.2 Describe the adequacy of teaching staff offices.

Ans: Teaching staff offices are adequately furnished and provide a functional workspace for faculty to prepare lectures, conduct research, and hold student consultations. Each office is equipped with basic necessities such as desks, chairs, computers, internet access, and storage facilities.

The offices offer a quiet and professional environment that supports academic productivity and confidentiality during student advising. While current facilities meet essential needs, further improvements such as expanding office space and enhancing privacy for one-on-one meetings are planned to support faculty comfort and efficiency.

STANDARD 8: INSTITUTIONAL GENERAL REQUIREMENTS

Expectation

The institution ensures that research degrees are awarded in a research environment that provides secure academic Precepts, standards and international best practices for doing research and learning about research approaches, methods, procedures and protocols, and which takes account of social and industrial needs. This environment offers students quality opportunities and the support they need to achieve successful academic, personal and professional outcomes from their research degrees.

8.1 Expectation outcome indicators (EOIs): General Principles

8.1.1. Full and part-time postgraduate research programmes will only be offered where students can be expected to meet the academic Precepts the institution has set for itself, which should reflect national expectations.

Ans: Full-time and part-time postgraduate research programmes are offered only when the institution is confident that enrolled students can meet the academic standards and precepts established by the university, in alignment with national higher education quality benchmarks. For this purpose, MS-Mphil BOS Approved and imitated and waited for approval of the syndicate.

8.1.2 Regulations should be clearly defined, made readily available and be sufficiently comprehensive to cover the progression of research students from admission and registration through to final examination and award.

Ans: Regulations governing postgraduate research programmes are clearly defined, comprehensive, and readily available to all students and supervisors. These guidelines cover the entire academic journey from admission and registration to supervision, progress review, thesis submission, final examination, and award of the degree.

They include timelines, credit hour requirements, ethical approval procedures, formatting standards for thesis/dissertation, and criteria for evaluation. The regulations are published in student handbooks, available on the university website, and explained during orientation sessions to ensure transparency, consistency, and academic integrity throughout the research process.

8.1.3. Regulations should be subject to regular review, at local and institutional level.

N/A

8.1.4. Research should take account of regional, national and international social and industrial needs.

N/A

8.2: The research environment

The institution should:

{

8.2.1 Only offer research opportunities where students can be trained and supported within an environment that is supportive of research

Ans: Research opportunities are offered only in areas where the institution can provide adequate academic, technical, and infrastructural support. This includes access to qualified supervisors, research fields, libraries, digital databases.

The environment is designed to be research-friendly, fostering critical thinking, innovation, and ethical practices. Students receive structured guidance through supervisory committees, progress reviews, and research training workshops, ensuring they are well-supported throughout their research journey.

8.2.2. Make sure that all publicity materials associated with postgraduate research programmes are clear, accurate and of sufficient detail to inform student choice.

Ans: Waited for University decision to launch MS -Mphil program.

8.3: The selection and admission of students

The institution should:

8.3.1. make sure that admissions procedures are clear and consistently applied

8.3.2. make sure that only appropriately qualified and/or prepared students are admitted onto research programmes

8.3.3. make sure that admissions decisions involve the judgment of more than one member of the institution's staff with relevant expertise

Evidence: Admission Committee

8.3.4. make sure that admissions procedures promote equality of opportunity

8.3.5. make sure that the entitlements and responsibilities of a research student undertaking a postgraduate research programme at the institution are defined and communicated clear.

8.4: Student information and induction

The institution should:

8.4.1: make sure that research students are provided with opportunities by the institution to enable them to commence their studies with an understanding of the academic and social environment within which they will be working.

8.5: The approval of research projects

The institution should:

8.5.1: give adequate consideration to the feasibility of both full and part-time students undertaking and successfully completing a particular research project.

8.6: Skills training

The institution should:

8.6.1: make sure that research students have sufficient access to training to gain the skills they need to design and complete their programmes effectively and to help prepare themselves for their subsequent career.

8.7: Supervision

The institution should:

8.7.1: make sure that supervisors possess recognized subject expertise

yes

8.7.2: make sure that supervisors have the necessary skills and experience to monitor, support and direct research into the students' work

sure

8.7.3: make sure that research students receive support and direction sufficiently to enable them to succeed in their studies

yes

8.7.4: make sure that the progress made by research students is consistently monitored and regularly communicated to the students.

yes

8.8: Assessment

The institution should:

8.8.1: make sure that mechanisms exist to enable open and constructive feedback to be provided by research students and their supervisors on the learning experience and support infrastructure

8.8.2: make sure that complaints and appeals procedures are fair, open and consistently applied, allowing students access to relevant information and an opportunity to present a case

8.8.3: make sure that independent and formal procedures exist to deal swiftly with complaints from research students about the quality of the institution's learning and support provision

8.8.4: make sure that formal procedures exist to deal with any academic appeals made by postgraduate research students

8.8.5: make sure that the acceptable grounds for appeals are clearly defined

BS-Medical Laboratory Technology (MLT)

**Department of Biotechnology
Faculty of Biomedical and Life Sciences**

Kohsar University Murree

**Programme Review for Effectiveness and
Enhancement (PREE)**

Standard 1: PROGRAMME MISSION, OBJECTIVES AND OUTCOMES

1: Expectation:

Each program must have a mission, measurable objectives and expected outcomes for graduates. Outcomes include competency and tasks graduates are expected to perform after completing the programme. A strategic plan must be in place to achieve the programme objectives. The extent to which these objectives are achieved through continuous assessment and improvements must be demonstrated.

1.1 Expectation outcome indicators (EOIs)

The program must have documented measurable objectives that support Faculty / university and institution mission statements.

1.1.1 Document institution, university and program mission statements

University Mission Statement:

As a premier higher education institution, the Kohsar University, Murree (KUM) aspires to be a leading provider of high-quality education in a broad range of disciplines, particularly those that are relevant to the needs of mountainous areas, while also striving for national and international competitiveness.

Department Mission Statement:

The Department of Biotechnology's mission is to provide the finest learning environment for students to cope with the most up-to-date learning and research trends. The department's goal is to ensure quality education and research. Students will be encouraged to conduct basic research, develop advanced solutions, and solve real problems. Our objective is to provide a solid foundation for focusing on research and to achieve excellence in all aspects of biotechnology.

Program Mission Statement:

The program will prepare the graduates to cope with the current challenges occurring in the biomedical fields like clinical diagnostics, public health, forensic technology, therapeutics production, basic and applied biomedical research. The graduates will effectively assist other health professionals in the delivery of quality health services. Students will be equipped with the updated knowledge, skills, and attitudes needed for clinical competence and laboratory-based diagnostics to substitute the conventional methods of diagnosis with modern technologies. The program will produce leaders and entrepreneurs with complementary skills required for the establishment of modern medical laboratories and diagnostic systems.

1.1.2 State Program Educational Objectives:

(Program educational objectives are intended to be statements that describe the expected accomplishments of graduates during the first several years following graduation from the program.)

Program Objectives:

- To prepare graduates with the technical competence to accurately perform and interpret clinical laboratory tests, ensuring adherence to quality assurance and safety standards.
- To develop students' ability to integrate theoretical knowledge with practical laboratory skills for effective problem-solving in biomedical diagnostics using advanced technologies and scientific reasoning.
- To foster professional values, including ethics, communication, teamwork, and a commitment to lifelong learning for effective participation in interdisciplinary healthcare environments.

Describe how each objective is aligned with the institution mission statements.

Program Objectives	Department Mission Statement
To prepare graduates with the technical competence to accurately perform and interpret clinical laboratory tests, ensuring adherence to quality assurance and safety standards	This objective directly supports the mission to provide the finest learning environment and quality education . By focusing on technical competence and quality control, it ensures that students are

	well-prepared for both academic excellence and the operational demands of modern laboratories. It also aligns with the department's emphasis on up-to-date learning trends by incorporating current testing methodologies and safety protocols.
To develop students' ability to integrate theoretical knowledge with practical laboratory skills for effective problem-solving in biomedical diagnostics using advanced technologies and scientific reasoning	This reflects the department's commitment to encouraging students to conduct basic research and develop advanced solutions . It fosters a solid foundation in research and aligns with the goal of solving real-world problems through evidence-based laboratory practices. The emphasis on integrating theory with practical skills mirrors the department's vision of bridging education and research excellence.
To foster professional values, including ethics, communication, teamwork, and a commitment to lifelong learning for effective participation in interdisciplinary healthcare environments	This objective echoes the department's goal of achieving excellence in all aspects of biotechnology , including soft skills and ethical conduct. Professionalism, communication, and teamwork are essential for collaborative research and healthcare, reinforcing the department's mission of developing students who are not only technically competent but also socially and ethically responsible.

1.1.4. Outline the main elements of the strategic plan to achieve the programme objectives.

1. Curriculum Development and Revision
2. Practical and Laboratory Training Enhancement
3. Research and Innovation Integration
4. Professional and Soft Skills Development

1.1.5. Provide for each objective how it was measured, when it was measured and improvements Identified and made. (Use Alumni and Alumni survey, Focus group interview of employers and alumni, Job Placement & Career Progression Data, Community & professional engagement, results of Standardized exams, Advisory Board Input etc.

The following Table provides a format for program objectives assessment.

Objective	How measured	When measured	Improvement identified	Improvement made
To produce competent graduates with strong theoretical and practical knowledge in Medical Laboratory Technology	Standardized Exam Results	Semester wise at the end of the semester.	Gaps identified in advanced molecular diagnostic skills	Introduced elective module on Molecular Diagnostics
To foster ethical, safe, and responsible laboratory practices	Community & Professional Engagement Reports, Student Feedback	End of each academic year	Need for stronger reinforcement of biosafety and ethical issues	Enhanced practical training on biosafety and added ethics case studies to curriculum

1.2 Expectation Outcome Indicators (EOIs)

The program must have documented outcomes for graduating students. It must be demonstrated that the outcomes support the program objectives and that graduating students are capable of performing these outcomes.

List of the Program Outcomes:

1. Demonstrate proficiency in performing and interpreting a wide range of clinical laboratory tests with accuracy, precision, and adherence to quality control standards.
2. Apply theoretical knowledge and practical skills to solve problems in biomedical diagnostics, using modern laboratory technologies and evidence-based approaches.
3. Exhibit professional ethics, effective communication, and teamwork skills necessary for collaborative healthcare practice and continuous professional development.

1.2.1 Describe how the programme outcomes support the programme objectives.

Table 1.2.1: Outcomes versus Objectives

Program Objectives	1	2	3
i	1		
ii		2	
iii			3

1.2.2 Describe the means for assessing the extent to which graduates are performing the stated program outcomes/learning objectives. This should be accomplished by the following:

This should be accomplished by the following:

- i. conducting a survey of graduating seniors every semester
- ii. carefully designed questions asked during senior projects presentations; these questions should be related to programme outcomes.
- iii. Outcomes examinations (Exit Exam)

{

- iv. Results of Capstone Courses/assignment
- v. Mapping results

Program Learning Outcomes	How Assessed	Results & Improvement Identified/made
Application of Medical Laboratory Knowledge	Through exit exams, senior projects, and capstone assignments	Many students performed well in theoretical understanding, but some struggled to apply this knowledge in complex lab situations. In response, we enhanced our teaching with more case-based scenarios and hands-on sessions in the final year.
Competency in Laboratory Skills and Techniques	Evaluated during practical projects and mapped course objectives	Most students showed solid competency in routine lab techniques, but there were gaps in advanced diagnostics. As a result, we updated practical labs and introduced simulation-based learning for specialized techniques.
Effective Professional Communication	Observed during presentations and viva voice assessments	Students communicated their ideas reasonably well but sometimes lacked confidence and clarity. To improve this, we included regular mock presentations and gave structured feedback to build communication skills.
Teamwork and	Evaluated during group	Teamwork was generally

Collaborative Skills	projects and via feedback in student surveys	positive, but some students reported unequal participation. We addressed this by incorporating peer evaluation and rotating team roles to ensure balanced group work experiences.
Problem Solving and Critical Thinking	Assessed through case-based exam questions and project Q&A sessions	Students were able to solve straightforward problems but faced difficulty with complex or unfamiliar situations. In response, we redesigned certain assessments to include real-world case challenges and expanded critical thinking exercises throughout the semesters.
Commitment to Lifelong Learning	During the semester and sessions with the faculty members	A good number of students expressed interest in pursuing further education. To nurture this mindset, we organized sessions with seniors which already in professional fields, guest speakers, and workshops on postgraduate opportunities.

Indicative Evidence:

The data obtained from the above sources should be analyzed and presented in the assessment report. It is recommended that the above surveys should be conducted, summarized and added to the self- assessment report. Departments should utilize the results of the surveys for improving the programme as soon as they are available.

{

1.3 Expectation outcome indicators (EOIs)

The results of programme's accreditation and the extent to which they are used to improve the programme must be documented.

1.3.1 Describe the actions taken based on the results of periodic accreditation

Based on periodic accreditation feedback and requirements of AHPC, the department has undertaken comprehensive documentation preparation, aligned the curriculum with AHPC standards, upgraded laboratory facilities, ensured faculty qualifications meet council criteria, and implemented internal quality assurance mechanisms to address all compliance areas in anticipation of the zero visit.

1.3.2 Describe major future program improvements plans based on recent assessments.

1.3.3 List strengths and weaknesses of the program

Program Strengths	Program Weaknesses
Well qualified Faculty, Focusing on recent advancements in research and diagnostics	Basic Lab is already established but advance diagnostic labs are under process
Best curriculum designed according to the market need	We are in collaboration with different local hospitals for skill development of the students but at the moments the university has no own hospital facility

1.3.4 List significant future development plans for the program.

1. Upgrade & modernize laboratory infrastructure
2. Forge clinical partnerships and MOUs
3. Launch specialized certification tracks

4. Promote student-led research & innovation

5. Launching of MS and PhD programs

1.4 Expectation outcome indicators (EOIs)

1.4.1 The department must assess its overall performance periodically using quantifiable measures.

Performance Measures	Results
Present student enrolments (undergraduate and graduate) during the last three years, indicating percentages of honors students	Over the past three academic years, undergraduate enrolment has shown a steady upward trend — from 20 in 2022 to 83 students in 2025 — reflecting increased interest in the program and the department’s growing academic reputation. Honhaar Scholarship =14 CM Laptop Scheme=02 PM laptop scheme=05
Student faculty ratio	83/7=11.8
Average graduating grade point average per semester	Over the past three academic years, we’ve seen a steady and encouraging rise in our students’ academic performance. The average graduating GPA during the Spring semesters climbed from 3.41 in 2022–2023 to an impressive 3.71 in 2024–2025 .
Average time for completing the program	The average time taken by students to complete the undergraduate Medical Laboratory Technology (MLT) program has remained consistent at approximately 4.2 years . The slight extension is primarily due to factors such as delayed results of capstone projects supplementary exams, or individual

}

	academic pacing.
Attrition rate	For the undergraduate Medical Laboratory Technology (MLT) program, the student attrition rate has remained relatively low—around 7 to 9% per cohort over the past three years. Most students who chose to leave the program did so during their first or second year. In most cases, this was due to personal or financial challenges, a decision to transfer to another field of study, or difficulty adjusting to the academic demands of the program.
Percentage of employers that are strongly satisfied with the performance of the department's graduates (employer Survey)	University conducted a Faculty Satisfaction survey, and reports are pending.
Indicate the median/average student evaluation for all modules	University conducted student evaluation and Satisfaction survey, and reports are pending.
% of faculty awarded excellence in teaching award	Honorarium based forms are submitted recently.
No. of journal publications per faculty per year	Dr. Ramla Shahid -2023(04), 2024 (04) Dr. Shahid 2025 (01) Dr. Kunza 2025 (01) M. Ansar 2025 (03) M. Saeed 2024 (02), 2025 (03)
No. of funded projects	NO
No. of conference publications per faculty per year	M. Saeed (01 ppr)
% of faculty awarded excellence in research award	NO
Number of short courses per year, workshops and seminars organized for community services	Three national-level seminars featuring renowned experts in the field of medical laboratory sciences,

	Two academic conferences that provided a platform for students and faculty to share research and learn about emerging trends, Two hands-on training workshops focused on enhancing practical skills in diagnostic techniques and laboratory innovations, Career counseling sessions and guest speaker events, where experienced professionals guided students on academic growth, job readiness, and future career paths.
Faculty and students' satisfaction regarding the administrative services offered by the department	Surveys' results are submitted and waiting for the results

Indicative Evidence: Evidence of data of the above indicators.

1.5 Expectation outcome indicators (EOIs)

The department/programme must take deliberate steps to engage all students, individually and collectively, as partners in the assurance and enhancement of their educational experience.

1.5.1. Describe actions taken to involve students in the evaluation of teaching and learning.

Ans: Students are regularly involved in evaluating teaching and learning through anonymous feedback forms shared at the end of each semester and continuous assessment through quiz, assignments, presentation Form.

1.5.2 Describe actions taken as a result of student evaluation.

Ans: Based on student evaluations, we have adjusted teaching methods, such as incorporating more interactive and practical sessions. Additionally, timely feedback on assignments and improved access to lab resources were implemented in response to student suggestions.

1.5.3 Describe how actions are communicated to students.

Ans: Actions taken in response to student feedback are communicated through classroom announcements,

notice boards, and during student-faculty meetings. In some cases, changes are also shared via WhatsApp groups or student portals to ensure transparency and engagement.

1.5.4 Describe actions taken to engage students in decision-making about the quality of their higher education.

Ans: Students are engaged in decision-making through their representation in departmental meetings, curriculum review sessions, and quality assurance discussions. Feedback is also actively sought during focus group discussions and course evaluations, ensuring their voices contribute to continuous improvement in academic quality.

1.5.5 Describe actions taken to recruit student members to appropriate deliberative committees.

Ans: Students are recruited to relevant deliberative committees by inviting nominations from each class or through faculty recommendations based on academic performance and leadership qualities.

1.5.6 Describe training given to students to enable their participation in decision-making committees.

Ans: To prepare students for participation in decision-making committees, brief orientation sessions are conducted to explain the committee's purpose, roles, and responsibilities. Additionally, students receive guidance from faculty mentors and may attend workshops on communication, leadership, and academic governance, enabling them to contribute effectively and confidently in discussions.

1.5.7 Terms of reference of deliberative committees on which students sit.

- A. Students provide feedback on course content, teaching methods, and relevance to professional practice. They contribute suggestions for updates or improvements based on their learning experiences.
- B. Student members participate in discussions regarding student welfare, code of conduct, extracurricular activities, and resolution of student concerns.
- C. Students provide input on the availability and usefulness of academic resources, including books, journals, and e-learning platforms.

Standard-2: CURRICULUM DESIGN AND ORGANIZATION

The curriculum must be designed and organized to achieve the program's objectives and outcomes. Also, course objectives must be in line with program outcomes. The breakdown of the curriculum must satisfy the standards specified in this section. Curriculum standards are specified in terms of credit hours of study. A semester credit hour equals one class hour or two to three laboratory hours per week. The semester is approximately fifteen weeks.

Provide the following information about the programme's curriculum:

Table 2.1: Curriculum course requirements

Course Specification Template:

For each course in the program that can be counted for credit, provide the following details:

Information Required	Information Provided
Course Title	yes
Course Learning Outcomes	yes
Catalog description	NO
Textbook(s) and references	yes
Syllabus breakdown in lectures	yes
Computer usage	Yes
Laboratory	yes
Detailed Course Outline (please attach)	yes

Indicative Evidence: Program Specification with Course details.

2.1 Expectation outcome indicators (EOIs)

2.1.1 The curriculum must be consistent and supports the program's documented objectives.

*Describe how the program content (courses) meets the program objectives

{

{

Program Objective

No. of Aligned Courses

Objective 1: Technical competence, QA, safety	18
Objective 2: Integration of theory with diagnostic reasoning and advanced technology	19
Objective 3: Professionalism, ethics, communication, teamwork, and lifelong learning	10

Indicate which courses contain a significant portion (more than 30%) of the following elements:

All the courses listed in Table 4.4 comprise of theoretical background (40-50%), problem analysis (30-40%) and solution design (30-40%). For problem analysis, group work and assignments are given. For Solution design students either prepare a term paper or project presentations on related skills acquired from each course.

Elements	Courses
Theoretical background	16 out of 20 = 80%
Problem analysis	17 out of 20 = 85%
Solution design	14 out of 20 = 70%

Table 4.5: Standard 2-2 requirement

2.2 Expectation outcome indicators (EOIs)

The curriculum must satisfy the core requirements for the program, as specified by the respective accreditation body.

Ans: The curriculum is designed to meet the core requirements set by the Higher Education Commission (HEC) and relevant accreditation bodies, ensuring academic quality, industry relevance, and professional competency in Medical Laboratory Technology.

2.3 Expectation outcome indicators (EOIs)

The curriculum must satisfy the major requirements for the program as specified by HEC, the respective accreditation body / councils.

{

Ans: The curriculum fulfills the major requirements outlined by HEC and relevant accreditation councils, ensuring compliance with national academic and professional standards for the BS MLT program.

2.4 Expectation outcome indicators (EOIs)

The curriculum must satisfy general education, arts, and professional and other discipline requirements for the program, as specified by the respective accreditation body / council.

Ans: The curriculum incorporates general education, arts, and professional discipline courses as mandated by HEC and relevant accreditation bodies to ensure a well-rounded and holistic education for BS MLT students. We followed UGEP-HEC 2023.

2.5 Expectation outcome indicators (EOIs)

The information Technology component of the curriculum must be integrated throughout the program.

Ans: The curriculum integrates Information Technology components across all levels of the program to enhance digital literacy, data analysis, and the use of modern laboratory information systems in medical laboratory practice.

2.6 Expectation outcome indicators (EOIs)

Oral and written communication skills of the student must be developed and applied in the program.

Ans: The program emphasizes the development and application of students' oral and written communication skills through presentations, report writing, seminars, and interactive learning activities. We also included allied courses which fulfill the requirements.

2.7 Expectation outcome indicators (EOIs)

Conduct feedback surveys each semester for each course from students and faculty.

Indicative Evidence: Evidence of 2.1 to 2.8 available in Program Specification.

Standard-3: Subject Specific Facilities

Expectation:

Subject-specific facilities must be adequately available and accessible to faculty members and students to support teaching and research activities.

Lab Specification Template:

Describe the laboratories that are available for use in the program under assessment.

Indicate for each lab the following

Information Required	Information Provided
Course title	yes
Location and area	yes
Objectives	yes
Adequacy for instruction	yes
Courses taught	yes
Software available if applicable	N/A
Major Apparatus	50%
Major Equipment	40%
Safety regulations	yes

3.1 Expectation outcome indicators (EOIs): Laboratory manuals/documentation/instructions for experiments must be available and readily accessible to faculty and students.

3.1.1 Describe the subject-specific facilities that are available for use in the programme under assessment.

Indicative Evidence: List of facilities (verified)

- 1. Classrooms**
- 2. Projectors**

{

3. Whiteboard

4. Lab

3.1.2 Explain how students and faculty have adequate and timely access to the manuals/documentation and instructions.

Ans: Students and faculty are provided with timely and structured access to course manuals, laboratory protocols, and instructional materials at the beginning of each semester. These resources are made available through:

Departmental noticeboards and course folders,

WhatsApp groups, where faculty upload manuals, guidelines, SOPs, and schedules,

Faculty offices and departmental resource rooms, where updated documentation is maintained and available upon request.

3.1.3 Benchmark with similar departments in reputable institutions to identify shortcomings in the laboratory.

Ans: To ensure continuous improvement in laboratory infrastructure and teaching quality, the department periodically benchmarks its facilities and practices with similar departments at reputable institutions such as the Rawalpindi Medical University (RMU) and Ibadat International university Islamabad (IIUI).

1. **Reviewing curriculum structures and lab manuals** to compare depth and practical exposure,
2. **Observing equipment standards** and availability of modern diagnostic technologies (e.g., PCR, automated hematology analyzers, ELISA readers),
3. **Comparing faculty-to-student ratios and lab safety protocols,**
4. **Participating in inter-institutional faculty training sessions and collaborative academic visits.**

3.2 Expectation outcome indicators (EOIs): There must be adequate support personnel for instruction and maintaining the laboratories.

Ans: one faculty member is designated to be Lab manager for looking after the Lab related materials.

3.2.1. Indicate for each laboratory: support personnel, level of support, nature and instructional support.

{

Ans: Each lab is supported by qualified personnel who play an essential role in:

- A. Preparation of materials and reagents.
- B. Safe operation and maintenance of lab equipment.
- C. Direct support to faculty during instruction and student practice.
- D. Implementation of biosafety and quality assurance protocols.

3.3 Expectation outcome indicators (EOIs): The institution's computing infrastructure and facilities must be adequate to support the programme's objectives

Ans: The institution provides a dedicated computing infrastructure that effectively supports the academic and technical needs of the BS Medical Laboratory Technology (MLT) program, aligned with its educational objectives.

3.3.1: Describe how the computing facilities support the computing component of the programme.

Ans: Students regularly use the computer lab for data analysis, digital record-keeping, research writing, and presentations. Courses such as Biostatistics, Research Methodology, Molecular Diagnostics, and Health Informatics rely heavily on computing resources

3.3.2: Benchmark with similar departments in reputable institutions to identify shortcomings in computing infrastructure and facilities.

Ans:

RMU offers dedicated computer labs integrated with hospital information systems (HIS) and diagnostic software, providing students with hands-on experience in real-time lab data entry and reporting systems, which is an area identified for enhancement in our setup.

IIUI provides access to a wider range of **bioinformatics tools and online medical databases**, with faculty-led training sessions on their application in diagnostics and research—highlighting the need for broader access to such tools and structured digital skill workshops in our program.

Both institutions have established **e-learning resource centers** with continuous IT support, while our department currently relies on centralized university labs with limited discipline-specific customization.

Criterion 4: STUDENT SUPPORT AND ADVISING

Expectations:

Students must have adequate support to complete the program in a timely manner and must have an ample opportunity to interact with their instructors and receive timely advice about program requirements and career alternatives.

4.1 Expectation outcome indicators (EOIs) 4: Modules must be offered with sufficient frequency and number for students to complete the programme in a timely manner.

Ans: The department ensures that **courses are delivered with sufficient frequency and planning**, allowing students to fulfill all academic requirements **without unnecessary delays**. Careful semester planning, faculty coordination, and support mechanisms are in place to maintain **academic continuity and timely graduation**.

4.1.1 Provide the department's strategy for course offerings.

Ans: The department follows a **well-defined and structured strategy** to ensure timely and effective course offerings that support smooth student progression throughout the BS Medical Laboratory Technology (MLT) program.

Semester-wise Course Mapping:

Annual Academic Calendar Planning:

Demand-Based Elective Scheduling:

Capstone & Internship Planning:

Resource Optimization:

4.1.2 Explain how often required courses are offered.

All **required (core) courses** in the BS Medical Laboratory Technology (MLT) program are offered on a **regular and systematic basis**, aligned with the program's semester-wise structure as per the approved BOS.

4.1.3 Explain how often elective courses are offered.

Elective courses in the BS Medical Laboratory Technology (MLT) program are generally offered primarily in the **7th or 8th semester**, when students are better prepared to explore specialized or

{

emerging areas of interest. as per the approved BOS. The selection and scheduling of electives are based on:

- A. Student interest and enrollment demand.
- B. Availability of qualified faculty.
- C. Relevance to industry trends and future career opportunities.

4.1.4 Explain how required modules outside the department are managed to be offered in sufficient number and frequency.

Ans: Required modules that are taught by other departments—such as English, Islamic Studies, Pakistan Studies, Biostatistics, and Computer Skills—are coordinated through a collaborative academic planning process led by the Office of the Controller of Examinations and the faculty Incharge office.

4.2 Expectation outcome indicators (EOIs): Modules in the major area of study must be structured to ensure effective interaction between students, department and teaching assistants.

Ans:

Area	Practices in Place
Lecture Delivery & Labs	Faculty members maintain interactive classroom environments using case discussions, questioning, and real-world examples during lectures and practical.
Practical Support	Teaching Assistants or Lab Technologists assist during hands-on sessions, guiding students, reinforcing concepts, and ensuring safety protocols are followed.
Office Hours & Availability	Faculty maintain designated office hours for student consultations, academic advising, and feedback discussions.
WhatsApp/Online Forums	Informal academic support is provided via class WhatsApp groups, LMS, or Google Classrooms, where students can ask questions and get real-time responses.
Student Feedback Channels	Regular feedback is collected through forms and class reps, allowing for responsive communication between students,

Area

Practices in Place

instructors, and departmental heads.

Mentorship & Counseling

Final-year students are assigned project supervisors for close academic mentorship and research guidance.

4.2.1 Describe how you achieve effective student / faculty interaction in courses taught by more than one person such as two faculty members, a faculty member and a teaching assistant or a lecturer.

Ans: In courses delivered by multiple instructors—such as two faculty members, or a faculty member, the department ensures seamless coordination and clear communication to maintain effective student engagement.

A. Defined Roles and Responsibilities:

B. Joint Planning Meetings:

C. Consistent Communication with Students:

D. Lab and Practical Coordination:

E. Integrated Assessment and Feedback:

4.3 Expectation outcome indicators (EOIs): Guidance on how to complete the programme must be available to all students and access to academic advising must be available to make module decisions and career choices.

Ans:

Area

Practices Implemented

Program Completion Guidance

Students receive a program handbook and semester-wise roadmap at the beginning of their studies, outlining course sequence, credit hours, and key milestones.

Academic Advising

Faculty members are assigned as academic advisors or mentors, especially in early semesters, to help students with course selection and workload planning.

Module/Course Selection

Prior to each semester, advisors assist students in selecting electives or re-take courses, ensuring alignment with academic goals and timely graduation.

Area

Practices Implemented

Career Counseling

Guest speaker sessions, alumni talk, and career counseling seminars are conducted to expose students to professional pathways in diagnostics, research, and industry.

Project & Internship Support

Final-year students are guided in research topic selection, proposal writing, and choosing suitable internship placements based on their career interests.

Open-Door Policy

Students are encouraged to approach faculty at any time for academic and career-related concerns, promoting a student-centered advising culture.

4.3.1 Describe how students are informed about program requirements.

Ans: Students are informed about the program requirements through multiple formal and accessible channels from the time of enrollment:

- A. Orientation Sessions.
- B. Program Handbook & Roadmap.
- C. Notice Boards and Digital Platforms.
- D. Academic Advising.
- E. Course Outlines and Weekly Plans.

4.3.2 Describe the advising system and indicate how its effectiveness is measured.

Ans: The department has a structured academic advising system designed to support students throughout their academic journey, from enrollment to graduation.

- A. Faculty Advisors Assigned by Semester.
- B. Scheduled & Open-Door Advising.
- C. Career and Internship Guidance.
- D. Use of Digital Platforms:

4.3.3 Describe the student counseling system and how students get professional counseling when needed.

Ans: The department maintains a student counseling system that supports both academic and personal well-being, ensuring students have access to the help they need throughout their educational journey as well as following systems

- A.** Academic Counseling.
- B.** Career Counseling.
- C.** Psychological and Emotional Support:
- D.** Access and Awareness:

4.3.4 Indicate if students have access to professional counseling; when necessary.

Ans: Yes, students have access to professional counseling services when needed. When a student is identified as facing emotional, psychological, or personal challenges beyond academic concerns, they are referred to the university's designated medical center or connected with a licensed clinical psychologist available through campus or affiliated hospitals.

4.3.5 Describe opportunities available for students to interact with practitioners, and to have membership in technical and professional societies.

Ans:

The department actively promotes student engagement with healthcare professionals, laboratory practitioners, and professional societies, providing real-world exposure and career-building opportunities such as

- A. Guest lectures, seminars, and panel discussions** are regularly organized, featuring **pathologists, clinical lab scientists, hospital technologists, and public health experts** who share insights on current practices, diagnostic trends, and career pathways.
- B. Students participate in hospital-based internships** in their final year, where they work directly under supervision of certified professionals in clinical settings.

- C. **Hands-on workshops and skill-building sessions** (e.g., phlebotomy, biosafety, molecular diagnostics) are led by practicing technologists and industry trainers.
- D. **Membership in Professional Societies:** Students are encouraged to join national bodies such as the Pakistan Society for Medical Laboratory Sciences (**PSMLS**) and International Society of Blood Transfusion (**ISBT**) international platforms like **ASCP** (American Society for Clinical Pathology) or **IFBLS** (International Federation of Biomedical Laboratory Science) **PSH** (Pakistan society of Hematology), **PAP** (Pakistan Association of pathologists)
- E. Annual **career counseling sessions and alumni talks** create valuable networking opportunities where students receive advice from graduates working in hospitals, research centers, and industry.
- F. **Participation in inter-university symposiums, poster competitions, and health camps** further enhances student–practitioner interaction and professional exposure.

Standard 5: TEACHING FACULTY/STAFF

Expectation

Teaching faculty/staff must be current and active in their discipline and have the necessary technical depth and breadth to support the programme. There must be enough department members to provide continuity and stability, to cover the curriculum adequately and effectively, and to allow for scholarly activities

Expectation outcome indicators (EOIs)

Expectation outcome indicators (EOIs): There must be enough full-time teaching staff who are committed to the programme to provide adequate coverage of the programme areas/modules with continuity and stability. The interests and qualifications of all teaching staff must be sufficient to teach all modules, plan, modify and update modules and curricula. All teaching staff should have a level of competence that would normally be obtained through graduate work in the discipline. The majority of the teaching staff should hold a PhD in the discipline and/or vocational experience in their area of expertise.

Complete a table indicating programme areas and number of teaching staff in each area.

Sr #	Program Areas	Full Time Faculty in each Areas
1	Biochemistry related to all courses	Dr. Ramla shahid
2	Health Biotechnology, cancer Diagnostics, Molecular Biology	Dr. Shahid Hussain
3	Exosomes based diagnostics and therapeutics of cancer	Dr. Imran Khan
4	Molecular biology, Recombinant vaccine formulation.	Dr. Kunza Latif
5	Human Genetics Diagnostics	Dr. Asad Usmani
6	Transfusion medicine, Clinical pathology, hematology essays and Molecular diagnostics	Muhammad Ansar
7	Transfusion Medicine, Point of Care Testing, Chemical Pathology Emerging	Muhammad Saeed

}

	Infectious Diseases, Molecular Diagnostics.	
--	---	--

Each member of the teaching staff should complete a CV.

Name of Teaching Staff	Designation	CV Submission status
Prof. Dr. Ramla Shahid	Faculty Incharge	Yes
Dr. Shahid Hussain	HOD/Lecturer	yes
Dr. Imran Khan (Leave applied)	Lecturer	yes
Dr. Kunza Latif	Lecturer	yes
Dr. Muhammad Asad Usmani (Leave applied)	Lecturer	yes
Mr. Muhammad Saeed	Lecturer/Program Coordinator- MLT	yes
Mr. Muhammad Ansar	Lecturer	yes

Expectation outcome indicators (EOIs): Teaching staff must remain current in the discipline and sufficient time must be provided for scholarly activities and professional development. Also, effective programmes for staff development must be in place.

5.1 Describe the criteria for teaching staff to be deemed current in the discipline and based on these criteria and information in the teaching staff member's CV, what percentage of them is current. The criteria should be developed by the department.

Ans: The department maintains a clear, outcome-based framework for evaluating faculty currency. Regular professional development, active research involvement, and academic engagement ensure that most **teaching staff remain aligned with evolving standards, technologies, and expectations** in medical laboratory education. Faculty currency is strongest in areas such as **research supervision, CPD attendance, and conference participation**, while **peer-reviewed publications** are gradually improving with institutional encouragement and AHPC requirements.

4.4 Describe the means for ensuring that full-time teaching staff have sufficient time for scholarly and professional development.

Ans: Through a combination of **balanced workloads, flexible scheduling, and institutional**

{

support, the department ensures that full-time teaching staff have sufficient time and motivation to pursue **scholarly and professional development**, thereby contributing to academic excellence and innovation in the field. Teachers have received HEC training by faculty development manners.

5.2 Describe existing teaching staff development programmed at the departmental and institutional levels. Demonstrate their effectiveness in achieving teaching staff development.

Ans: The department, in collaboration with institutional bodies, maintains a robust framework for faculty development. These initiatives are effectively enhancing teaching quality, research engagement, and academic leadership, thereby directly contributing to the program's success and student learning outcomes. On a departmental level, different seminars and workshops are organized, and faculty members are also encouraged to participate in different national and international events. Some of the training workshops are organized by the HEC.

4.5 Indicate how frequently faculty programmed are evaluated and if the evaluation results are used for improvement.

Ans: Faculty development programs are not only conducted regularly but are also evaluated systematically, with results directly informing improvements. This ongoing feedback loop ensures that programs remain effective, practical, and responsive to the evolving needs of both faculty and the academic environment.

STANDARD 6: INSTITUTIONAL POLICIES AND PROCESS CONTROL

Expectation

The processes by which major functions are delivered must be in place, controlled, periodically reviewed, evaluated and continuously improved.

Expectation outcome indicators (EOIs)

6.1 Expectation outcome indicators (EOIs): The process by which students are admitted to the programme must be based on quantitative and qualitative criteria and clearly documented.

Ans: The admission process for the BS Medical Laboratory Technology (MLT) program is transparent, merit-based, and clearly documented, ensuring the selection of candidates with the

{

potential to succeed in both academic and professional environments. The BS-MLT admission process is guided by objective academic benchmarks and, where used, subjective assessments such as interviews, eligibility criteria for admission, merit list. All procedures are clearly documented, ensuring fairness, consistency, and alignment with institutional and national standards.

6.1.1 This process must be periodically evaluated to ensure that it is meeting its objectives.

Ans: The admission process for the BS Medical Laboratory Technology (MLT) program is periodically reviewed to ensure it continues to meet its core objectives of fairness, transparency, merit-based selection, and the admission of capable, motivated students by evaluation mechanism

- A. Annual Review Meetings.
- B. Feedback from Faculty & Students.
- C. Monitoring Student Progress.
- D. Stakeholder Consultation.

6.1.2 Describe the programme admission criteria at the institutional level or department if applicable.

The admission criteria for the **BS Medical Laboratory Technology (MLT) program** follow the institutional guidelines approved by the **Academic Council** and are aligned with **Higher Education Commission (HEC) Pakistan** standards and as well as **Allied Health professional Council (AHPC)**. The department ensures these criteria are transparent, merit-based, and inclusive. Our institution and department have approved policy for admission.

6.1.3 Describe policy regarding programme/credit transfer.

Ans:

A. Eligibility and Approval Process

Students from other recognized universities may apply to transfer into the BS-MLT program provided their institution is HEC-accredited and the coursework aligns with our curriculum. Transfers are considered semester-wise and require completion of at least one full semester with good academic-
{

standing (minimum CGPA as per Kohsar University's regulations).

B. Credit Transfer Requirements

A maximum of 30–50% of the total BS-MLT credit hours (up to 60 credit hours) may be transferred, subject to institutional limits. Credits must be from equivalent courses, with a documented course outline, delivered in English, and from programs taught at standard semester loads.

C. Grading and Transcript Policy

Transferred credits are listed as “Transferred: Course Title (X credits)” on the student’s transcript, with no impact on Kohsar University’s CGPA. Transfer credits count toward program requirements but are not included in internal grading calculations.

D. Conditions

No credit transfers are permitted for final- semester courses, internships, or capstone research unless previously approved. Students must complete a minimum of 50% of program credits at Kohsar University to earn a degree from this institution.

6.1.4 Indicate how frequently the admission criteria are evaluated and if the evaluation results are used to improve the process

Ans: The admission criteria for the BS Medical Laboratory Technology (MLT) program are evaluated annually, typically at the end of each admission cycle. This review is conducted by the departmental admission committee in collaboration with the Academic Council and the Quality Enhancement Cell (QEC).

6.2 Expectation outcome indicators (EOIs): The process by which students are registered on the programme and monitoring of students’ progress to ensure timely completion of the programme must be documented. This process must be periodically evaluated to ensure that it is meeting its objectives.

6.2.1 Describe how students registered on the programme.

Ans: The process for registering students in the BS Medical Laboratory Technology (MLT) program is conducted in a systematic and transparent manner, coordinated by the Admissions Office, Examination Branch, and the Department of Medical Laboratory Technology.

{

✓ Steps in the Registration Process:

1. Admission Confirmation:

Once a student is selected through the official merit list, they receive an admission offer letter and are guided through the registration steps.

2. Document Verification:

Students submit their original academic documents (Matric, FSc, Domicile, CNIC/Form-B, etc.) for verification by the admissions committee.

3. Fee Submission:

Upon successful verification, students are issued a fee challan. Once paid, the admission is officially confirmed.

4. University Registration Number Issued:

The student is assigned a unique registration/roll number through the university's academic management system or registrar office.

5. Departmental Registration:

The department maintains a manual and digital record of enrolled students and registers them for their semester-wise course load.

6. Orientation and Enrollment in Courses:

Students are formally oriented and enrolled into their first-semester modules (both theory and practical) as per the BS-MLT curriculum.

6.2.2 Describe how students' academic progress is monitored and how their programme of study is verified to adhere to the degree requirements.

Ans: Students' academic progress is monitored through semester-wise assessments, CGPA tracking, and attendance records, maintained by the department and examination office. The program coordinator verifies course completion against the curriculum roadmap to ensure students meet all degree requirements before graduation.

6.2.3 Indicate how frequently the process of registration and monitoring are evaluated and if the evaluation results are used to improve the process.

Ans: The processes of student registration and academic monitoring are evaluated annually through {

departmental reviews and feedback from faculty, examination office, and QEC. Findings are used to streamline registration, improve academic advising, and enhance tracking of student progression for timely degree completion.

6.3 Expectation outcome indicators (EOIs) 6: The process of recruiting and retaining highly qualified department members must be in place and clearly documented. Also, processes and procedures for department evaluation, and promotion must be consistent with the institution mission statement. These processes must be periodically evaluated to ensure that they are meeting with their objectives.

6.3.1 Describe the process used to ensure that highly qualified teaching staff are recruited to the programme.

Ans: The recruitment process for teaching staff in the BS Medical Laboratory Technology (MLT) program is conducted in accordance with HEC and university faculty appointment criteria, ensuring that only qualified and competent professionals are selected.

✓ Key Steps in the Recruitment Process:

1. Position Announcement:

Vacancies are advertised through national newspapers, the university website, and HEC job portals, clearly stating required qualifications and specialization.

2. Eligibility Criteria:

Minimum qualification for lecturers is an MPhil/MS in relevant field, while senior posts require a PhD and relevant teaching/research experience, as per HEC guidelines.

3. Screening & Shortlisting:

Applications are screened by a departmental scrutiny committee to shortlist candidates based on academic merit, research output, and field relevance.

4. Interview & Demonstration:

Shortlisted candidates undergo an interview and teaching demonstration before a panel comprising senior faculty, subject experts, and administrative representatives.

5. Final Approval:

Recommendations are submitted to the Vice Chancellor and approved by the Syndicate or Selection Board, ensuring academic and procedural transparency.

6.3.2 Indicate methods used to retain excellent teaching staff members.

Ans: The department adopts several strategies to retain high-performing teaching staff, ensuring continuity, motivation, and professional growth:

- Support for research and publication, including facilitation for conference participation and journal submissions.
- Opportunities for career advancement and promotions based on HEC criteria and performance evaluations.
- Workload balance and academic autonomy to encourage innovation in teaching and research.
- Recognition of excellence through annual performance appraisals, commendation letters, **and** involvement in academic committees.
- Access to faculty development programs, training workshops, and institutional support for higher education or collaborative research.

6.3.3 Indicate how evaluation and promotion processes are in line with the institution mission statement.

Ans: The evaluation and promotion processes for teaching staff are aligned with the university's mission to promote academic excellence, research innovation, and community service.

- Faculty are evaluated annually based on teaching effectiveness, research output, student feedback, and departmental contribution, reflecting the institution's commitment to quality education.
- Promotion criteria follow HEC guidelines, emphasizing qualifications, research publications, academic service, and continuous professional development, in line with the university's goal of nurturing academic leadership.
- Participation in faculty development programs, curriculum improvement, and student mentorship is also recognized during evaluations, supporting the mission of fostering holistic and socially

{

responsible graduates

6.3.4 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

Ans: The process is evaluated regularly, and the results are actively used to improve faculty performance, satisfaction, and alignment with institutional goals as per based on University KPI.

6.4 Expectation outcome indicators (EOIs): The process and procedures used to ensure that teaching and delivery of module material to the students emphasize active learning and that module learning outcomes are met. The process must be periodically evaluated to ensure that it is meeting its objectives.

6.4.1 Describe the process and procedures used to ensure that teaching and delivery of module material is effective and focus on students learning.

Ans: To ensure that teaching and delivery of module content are both effective and focused on student learning, the department follows a systematic and quality-driven process:

- A. Course Planning and Syllabus Alignment
- B. Student-Centered Teaching Strategies
- C. Continuous Formative Assessment
- D. Student Feedback and Reflection
- E. Peer and Administrative Observation

6.4.2 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

Ans: The effectiveness of teaching and module delivery is evaluated at the end of every semester through:

- Student evaluation of teaching (SETs)
- Faculty peer reviews

- Course file audits by the Quality Enhancement Cell (QEC)

6.5 Expectation outcome indicators (EOIs): The process that ensures that graduates have completed the requirements of the programme must be based on standards, and effective and clearly documented procedures. This process must be periodically evaluated to ensure that it is meeting its objectives.

6.5.1 Describe the procedures used to ensure that graduates meet the programme requirements.

Ans: The department follows a well-defined and structured process to ensure that all graduating students have fulfilled the academic, practical, and professional requirements of the BS Medical Laboratory Technology (MLT) program. Key procedure Include:

- A. Credit Hour Monitoring.
- B. Course Completion and GPA Requirements.
- C. Final Year Project & Internship.
- D. Departmental Clearance.
- E. Examination and Controller's Verification.

6.5.2 Describe when this procedure is evaluated and whether the results of this evaluation is used to improve the process.

Ans: The procedure for verifying that students meet graduation requirements is evaluated annually, typically at the end of each academic session during departmental review meetings and in coordination with the Examination Branch and Quality Enhancement Cell (QEC).

Expectation outcome indicators (EOIs) 6.6: Programmes produce information for external audiences about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.6.1 Mission, values and overall strategy are publicly available on the institution's website.

Yes, the institution's **mission statement**, **core values**, and **strategic objectives** are publicly accessible on the

{

official website of the university. These elements are clearly displayed under the “About Us” or “Vision & Mission” sections of the site to ensure transparency and public accountability.

6.6.2 The process for application and admission to the programme of study is clearly described to prospective students.

Ans: The application and admission process for the programme of study is clearly outlined and publicly available through the university's official website, prospectus, and admissions office. Prospective students are provided with detailed information including eligibility criteria, required documentation, application deadlines, fee structure, and the selection process.

The admission procedure begins with the announcement of admission dates via print, digital media, and the university's online platforms. Applicants are required to fill out an online or paper-based application form, submit attested academic transcripts, national identification, recent photographs, and any other documents specified in the admission policy.

Eligibility is typically based on minimum academic qualifications (e.g., FSC Pre-Medical or equivalent with 45 percentage), and interviews for selected candidates. The university ensures transparency by displaying merit lists on noticeboards and the website, and by communicating results to applicants in a timely manner. Orientation sessions are also arranged for admitted students to familiarize them with academic expectations, program structure, support services, and institutional policies.

This process is periodically reviewed by the admissions committee to ensure fairness, accessibility, and alignment with national education standards and institutional goals.

6.6.3 Information is made available to prospective students to help them select their programme with an understanding of the academic environment in which they will be studying and the support that will be made available to them.

Ans: Prospective students are provided with clear and accessible information about the academic environment, including teaching methods, facilities, and faculty expertise. They are also informed about available support services such as academic advising, counseling, and career guidance to help them make informed decisions about their program selection.

Expectation outcome indicators (EOIs) 6.7: Programmes produce information for students about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.7.1 Information on the programme of study is made available to current students at the start of their programme and throughout their studies.

Ans: At the beginning of the programme and throughout their studies, students are provided with comprehensive information including the curriculum, course outlines, academic calendar, assessment methods, and learning resources. Regular updates and guidance are shared via notice boards, student portals, and orientation sessions to keep them well-informed and supported.

6.7.2 Programmes set out what they expect of current students and what current students can expect of the programme.

Ans: The programme clearly outlines its expectations from students regarding attendance, academic integrity, participation, and performance. In return, students are informed about what they can expect from the programme, including quality teaching, access to learning resources, fair assessment, academic support, and a respectful learning environment.

6.7.3 When students leave their programme of study, they are issued with a detailed record of their studies, which gives evidence to others of the students' achievement in their academic programme.

Ans: Upon completion of their studies, students will be provided with an official transcript and degree certificate that detail their academic achievements, including courses completed, credit hours earned, and grades obtained. This record serves as formal evidence of their qualifications for further education or employment opportunities.

6.8 Expectation outcome indicators (EOIs): Programmes are managed to high ethical standards when dealing with faculty, staff, students and other stakeholders.

6.8.1 Programmes practice and exemplify the values and ethical principles articulated in the institution's mission and ethics policies.

Ans: The programme upholds and reflects the institution's core values and ethical principles

{

through its curriculum, teaching practices, and professional conduct. Students are encouraged to develop integrity, responsibility, and respect for ethical standards in both academic and clinical settings, aligning with the university's mission and code of ethics.

6.8.2 Programmes safeguard the interests of students, faculty and staff.

Ans: The programme ensures a safe, inclusive, and supportive environment by implementing policies that protect the rights and well-being of students, faculty, and staff. Mechanisms are in place for grievance redressal, confidentiality, equal opportunity, and academic fairness to uphold the dignity and interests of all stakeholders.

6.8.3 Programmes ensure equality, diversity and inclusion.

Ans: The programme actively promotes equality, diversity, and inclusion by providing equal access to learning opportunities regardless of gender, ethnicity, religion, or socioeconomic background. It fosters a respectful and inclusive academic environment where all students and staff feel valued and supported.

6.8.4 Programmes have a transparent approach to all communication, including academic integrity and complaints.

Ans: The programme maintains transparent communication with students and staff regarding academic policies, integrity guidelines, and complaint procedures. Clear channels are established for raising concerns, ensuring fairness, confidentiality, and timely resolution in all academic and administrative matters.

STANDARD 7: INSTITUTIONAL SUPPORT AND FACILITIES

Expectation

The institution's support and the financial resources for the programme must be sufficient to provide an environment in which the programme can achieve its objectives and retain its strength. Also, the

{

institutional facilities, including the library, classrooms and offices, must be adequate to support the objective of the programme. To satisfy this criterion several standards must be met.

Expectation outcome indicators (EOIs)

7.1 Expectation outcome indicators (EOIs): There must be sufficient support and financial resources to attract and retain high-quality teaching staff and provide the means for them to maintain competence as teachers and scholars.

7.1.1 Describe how the programme meets this standard. If it does not, explain the main causes and plans to rectify the situation.

Ans: The programme meets this standard by ensuring that its structure, curriculum, teaching methods, and assessment strategies are aligned with national academic benchmarks and professional standards. Regular reviews are conducted through departmental meetings, feedback from stakeholders, and quality assurance processes to maintain relevance and effectiveness.

7.1.2 Describe the level of adequacy of secretarial support, technical staff and office Equipment

Ans: The programme is supported by adequate secretarial and technical staff who assist in administrative tasks, manage student records, and provide logistical support for academic activities. Technical staff are well-trained and ensure the smooth operation of laboratory sessions and equipment maintenance. Office equipment, including computers, printers, internet access, and other necessary tools, is generally sufficient to meet the daily operational needs.

7.2 Expectation outcome indicators (EOIs): There must be an appropriate number of high-quality graduate students, research assistants and PhD students.

Ans: The programme maintains an appropriate number of high-quality graduate students, research assistants, Selection is based on merit, academic performance, and research potential, aligned with institutional and national standards. Continuous efforts are made to attract and retain talented students through scholarships, mentorship, and a supportive research culture.

7.2.1 Provide the number of graduate students, research assistants and PhD students for the last three years.

N/A

7.2.2 Provide the teacher: graduate student ratio for the last three years

7.3 Expectation outcome indicators (EOIs): Financial resources must be provided to acquire and maintain library holdings, laboratories and computing facilities.

7.3.1 Describe the resources available for the library.

Ans: The university library is well-equipped with both physical and digital resources to support academic and research needs. Each campus (Jhika Gali, GPO, and Punjab House) hosts a library with subject-specific collections, including textbooks, reference books, journals, and academic magazines relevant to medical and health sciences.

In addition, students and faculty have access to online databases, e-books, and research journals through digital platforms subscribed by the university. The library offers computer workstations, internet access, printing/scanning services, and a quiet study environment. Trained library staff are available to assist with literature research and reference support.

7.3.2 Describe the resources available for laboratories.

Ans: The programme is supported by well-equipped laboratories designed to meet the practical and research needs of students in medical laboratory technology. Each lab is furnished with essential instruments such as microscopes, centrifuges, spectrophotometers, incubators, hot air ovens, ELISA readers, flame photometers and PCR. Specialized labs for Hematology, Microbiology, Clinical Chemistry, Histopathology, and Blood Banking are available which students are going to the nearest hospital ANTH Islamabad and THQ hospital Murree

Consumables and reagents are regularly stocked to ensure uninterrupted practical sessions. Safety equipment, including PPE, biosafety cabinets, and first aid kits, are also maintained. Qualified technical staff assist in the preparation of materials, equipment maintenance, and ensuring adherence to lab safety protocols.

7.3.3 Describe the resources available for computing facilities.

{

Ans: The programme provides access to dedicated computer labs equipped with modern desktops, high-speed internet, and essential academic software such as Microsoft Office, SPSS, reference management tools, and statistical analysis programs. Students and faculty can access online learning platforms, research databases, digital libraries, and institutional portals for academic resources and communication.

7.4 Expectation outcome indicators (EOIs): The institution must have the infrastructure to support new trends in learning such as e learning.

7.4.1 Describe infrastructure and facilities that support new trends in learning.

Ans: The institution has developed a supportive infrastructure to promote modern learning methods, including e-learning and blended education. Smart classrooms are equipped with multimedia projectors, internet connectivity, and interactive whiteboards to facilitate digital instruction. Faculty are trained to use online teaching tools such as Zoom and Google Meet for live or recorded sessions.

High-speed Wi-Fi is available throughout the campus, and computer labs support access to digital platforms, e-libraries, and online databases. These facilities ensure that students are well-prepared to engage with current and emerging trends in health sciences education.

7.4.2 Indicate how adequate the facilities are.

Ans: The available facilities are largely adequate to support e-learning and blended instructional approaches.

Computer labs and campus-wide internet connectivity provide students with sufficient access to digital resources. However, to further enhance the learning experience, continuous upgrades in bandwidth, software tools, and faculty training are planned. Overall, the infrastructure sufficiently meets current demands and supports future scalability.

7.5 Expectation outcome indicators (EOIs): The library must possess an up-to-date technical collection relevant to the programme and must be adequately staffed with professional

{

personnel.

7.5.1 Describe the adequacy of the library's technical collection.

Ans: The library maintains a well-curated technical collection that adequately supports the academic and research needs of the programme. Teachers' reference books are available for students including up-to-date textbooks, reference books, manuals, and subject-specific journals covering core areas such as Medical Laboratory Technology, Pathology, Microbiology, Clinical Chemistry, and Hematology.

7.5.2 Describe the support rendered by the library.

Ans: The library provides comprehensive support to students and faculty through access to physical and digital academic resources, quiet study spaces, and trained library staff. Services include book lending, reference assistance, literature search guidance, and orientation sessions on how to use digital databases and citation tools.

7.6 Expectation outcome indicators (EOIs): Classrooms must be adequately equipped, and offices must be adequate to enable teaching staff to carry out their responsibilities.

7.6.1 Describe the adequacy of the classrooms.

Ans: The classrooms are generally adequate in terms of size, ventilation, lighting, and seating capacity to accommodate enrolled students comfortably. Most rooms are equipped with basic teaching aids such as whiteboards, projectors, and multimedia systems to support effective instructional delivery.

7.6.2 Describe the adequacy of teaching staff offices.

Ans: Teaching staff offices are adequately furnished and provide a functional workspace for faculty to prepare lectures, conduct research, and hold student consultations. Each office is equipped with basic necessities such as desks, chairs, computers, internet access, and storage facilities.

The offices offer a quiet and professional environment that supports academic productivity and confidentiality during student advising. While current facilities meet essential needs, further improvements—such as expanding office space and enhancing privacy for one-on-one meetings—are planned to support faculty comfort and efficiency.

STANDARD 8: INSTITUTIONAL GENERAL REQUIREMENTS

Expectation

The institution ensures that research degrees are awarded in a research environment that provides secure academic Precepts, standards and international best practices for doing research and learning about research approaches, methods, procedures and protocols, and which takes account of social and industrial needs. This environment offers students quality opportunities and the support they need to achieve successful academic, personal and professional outcomes from their research degrees.

8.1 Expectation outcome indicators (EOIs): General Principles

8.1.1. Full and part-time postgraduate research programmes will only be offered where students can be expected to meet the academic Precepts the institution has set for itself, which should reflect national expectations.

Ans: Full-time and part-time postgraduate research programmes are offered only when the institution is confident that enrolled students can meet the academic standards and precepts established by the university, in alignment with national higher education quality benchmarks. For this purpose, MS-MLS BOS Approved and imitated and waited for approval of the syndicate.

8.1.2 Regulations should be clearly defined, made readily available and be sufficiently comprehensive to cover the progression of research students from admission and registration through to final examination and award.

Ans: Regulations governing postgraduate research programmes are clearly defined, comprehensive, and readily available to all students and supervisors. These guidelines cover the

{

entire academic journey—from admission and registration to supervision, progress review, thesis submission, final examination, and award of the degree.

They include timelines, credit hour requirements, ethical approval procedures, formatting standards for thesis/dissertation, and criteria for evaluation. The regulations are published in student handbooks, available on the university website, and explained during orientation sessions to ensure transparency, consistency, and academic integrity throughout the research process.

8.1.3. Regulations should be subject to regular review, at local and institutional level.

N/A

8.1.4. Research should take account of regional, national and international social and industrial needs.

N/A

8.2: The research environment

The institution should:

8.2.1 Only offer research opportunities where students can be trained and supported within an environment that is supportive of research

Ans: Research opportunities are offered only in areas where the institution can provide adequate academic, technical, and infrastructural support. This includes access to qualified supervisors, research laboratories, libraries, digital databases, and funding opportunities.

The environment is designed to be research-friendly, fostering critical thinking, innovation, and ethical practices. Students receive structured guidance through supervisory committees, progress reviews, and research training workshops, ensuring they are well-supported throughout their research journey.

8.2.2. Make sure that all publicity materials associated with postgraduate research programmes are clear, accurate and of sufficient detail to inform student choice.

Ans: Waited for University decision to launch MS -MLS program.

8.3: The selection and admission of students

The institution should:

8.3.1. make sure that admissions procedures are clear and consistently applied

8.3.2. make sure that only appropriately qualified and/or prepared students are admitted onto research programmes

8.3.3. make sure that admissions decisions involve the judgment of more than one member of the institution's staff with relevant expertise

Evidence: Admission Committee

8.3.4. make sure that admissions procedures promote equality of opportunity

8.3.5. make sure that the entitlements and responsibilities of a research student undertaking a postgraduate research programme at the institution are defined and communicated clearly

8.4: Student information and induction

The institution should:

8.4.1: make sure that research students are provided with opportunities by the institution to enable them to commence their studies with an understanding of the academic and social environment within which they will be working.

8.5: The approval of research projects

The institution should:

8.5.1: give adequate consideration to the feasibility of both full and part-time students undertaking and successfully completing a particular research project.

8.6: Skills training

The institution should:

8.6.1: make sure that research students have sufficient access to training to gain the skills they need to design and complete their programmes effectively and to help prepare themselves for their subsequent career.

8.7: Supervision

The institution should:

8.7.1: make sure that supervisors possess recognized subject expertise

8.7.2: make sure that supervisors have the necessary skills and experience to monitor, support and direct research into the students' work

8.7.3: make sure that research students receive support and direction sufficiently to enable them to succeed in their studies

8.7.4: make sure that the progress made by research students is consistently monitored and regularly communicated to the students.

8.8: Assessment

The institution should:

8.8.1: make sure that postgraduate research assessment processes are communicated clearly and fully to research students and supervisors

8.8.2: postgraduate research assessment processes are clear and operated rigorously, fairly, reliably and consistently

Feedback, complaints and appeals

8.8.3: make sure that mechanisms exist to enable open and constructive feedback to be provided by research students and their supervisors on the learning experience and support infrastructure

8.8.4: make sure that complaints and appeals procedures are fair, open and consistently applied, allowing students access to relevant information and an opportunity to present a case

8.8.5: make sure that independent and formal procedures exist to deal swiftly with complaints from research students about the quality of the institution's learning and support provision

8.8.6: make sure that formal procedures exist to deal with any academic appeals made by postgraduate research students

8.8.7: make sure that the acceptable grounds for appeals are clearly defined

Standard 1: PROGRAMME MISSION, OBJECTIVES AND OUTCOMES

1: Expectation:

Each program must have a mission, measurable objectives and expected outcomes for graduates. Outcomes include competency and tasks graduates are expected to perform after completing the programme. A strategic plan must be in place to achieve the programme objectives. The extent to which these objectives are achieved through continuous assessment and improvements must be demonstrated.

1.1 Expectation outcome indicators (EOIs)

The program must have documented measurable objectives that support Faculty / university and institution mission statements.

1.1.1 Document institution, university and program mission statements

<u>University Mission Statement:</u> As a premier higher education institution, the Kohsar University, Murree (KUM) aspires to be a leading provider of high-quality education in a broad range of disciplines, particularly those that are relevant to the needs of mountainous areas, while also striving for national and international competitiveness.
<u>Department Mission Statement:</u> Computer Science is the systematic study of the feasibility, structure, expression, and mechanization of the methodical processes (or algorithms) that underlie the acquisition, representation, processing, storage, communication of, and access to information, whether such information is encoded in bits and bytes in a computer memory or transcribed in genes and protein structures in a human cell. Computer Science spans a wide range, from its theoretical and algorithmic foundations to cutting-edge developments in robotics, computer vision, intelligent systems, bioinformatics, image processing, computational biology, computational lenses, and other exciting areas. Computer scientists develop new programming approaches for software development, devise new ways to use computers and develop effective ways to solve computing problems. While other disciplines produce graduates with more immediately relevant job-related skills, computer science offers a comprehensive foundation for research and innovation. Recent developments in computer hardware, software and communication technologies have offered exciting new opportunities and challenges for the creation of innovative learning environments for Computer Science and its curricula design. The challenge of getting all newly emerging technologies incorporated into the curriculum is becoming pivotal for the effectiveness of curricula. There is a need for curricula structures that are really able to meet the challenges of 21st century knowledge driven complex workplaces. The key rationale behind the BS Computer Science program is to prepare a curriculum that provide integration of all components and the foundations that allow accessing all of the new knowledge and technology to fulfil the vision of future.
<u>Program Mission Statement:</u> MSCS Program is committed to create, expand, disseminate, and teach the computer science body of knowledge through academics, applications and research which positively impact society locally, nationally, and internationally. MSCS program aims to develop students' critical professional thinking and intuition. The program's curriculum provides a balanced mixture of learning experiences to make the graduates capable of sound professional decisions. As a result, the successful graduates will be able to assume responsible positions in business, government, and education at the research, development, and planning levels.

Indicative Evidence: Evidence of Vision Mission genesis/approval.

1.1.2 State Program Educational Objectives:

(Program educational objectives are intended to be statements that describe the expected

{

accomplishments of graduates during the first several years following graduation from the program.)

Program Objectives:

The MS (Computer Science) comprises of both course work as well as research components. There are four **core courses** aimed at strengthening the understanding and competence of students in computer science fundamentals. The University expects its MS graduates to pursue careers either as ‘Computer Science Faculty Members’ or as ‘Software Development Managers’ in the industry.

1.1.3 Describe how each objective is aligned with the institution mission statements.

Program Objectives	Department Mission Statement
The MS (Computer Science) comprises of both course work as well as research component. There are four ‘core courses’ aimed at strengthening the understanding and competence of students in computer science fundamentals. The University expects its MS graduates to pursue careers either as ‘Computer Science Faculty Members’ or as ‘Software Development Managers’ in the industry.	

1.1.4. Outline the main elements of the strategic plan to achieve the programme objectives.

- Undergo extensive review of curriculum recommendations of Higher Education
- Commission of Pakistan (HEC) for Computer Science programs
- Attract and retain highly qualified and motivated faculty in all core areas of the program
- Provide latest relevant software in laboratories to ensure that students get practical training along with theoretical concepts
- Maintain a strong faculty to student ratio.
- Ensure that curriculum is taught by using the latest and good quality textbooks

1.1.5. Provide for each objective how it was measured, when it was measured and improvements Identified and made. (Use Alumni and Alumni survey, Focus group interview of employers and alumni, Job Placement & Career Progression Data, Community & professional engagement, results of Standardized exams, Advisory Board Input etc.

The following Table provides a format for program objectives assessment.

Objective	How measured	When measured	Improvement identified	Improvement made

1.2 Expectation Outcome Indicators (EOIs)

The program must have documented outcomes for graduating students. It must be demonstrated that the outcomes support the program objectives and that graduating students are capable of performing these outcomes.

List the Program Outcomes:

1. Students will be able to possess advanced knowledge of Computer Science field
2. Students will be able to think creatively and critically; to solve non-trivial problems
3. Students will be able to use computing knowledge to develop efficient solutions for real life problems
4. Students will be able to design solutions and can conduct research related activities.

1.2.1 Describe how the programme outcomes support the programme objectives.

Table 1.2.1: Outcomes versus Objectives

1.2.2 Describe the means for assessing the extent to which graduates are performing the stated

Program Objectives	Program Outcomes							
	1	2	3	4	5	6	7	8
1. Strengthen understanding in CS fundamentals	✓	✓	✓					
2. Prepare for academic careers (faculty members)	✓ ✓	✓		✓				
3. Prepare for industry roles (software managers)	✓	✓	✓					
4. Promote research and development abilities			✓	✓				

program outcomes/learning objectives. This should be accomplished by the following:

- Carefully designed questions asked during senior projects presentations; these questions should be related to programme outcomes.
- Outcomes examinations (Exit Exam)
- Results of Capstone Courses/assignment

Indicative Evidence:

The data obtained from the above sources should be analyzed and presented in the assessment report. It is recommended that the above surveys should be conducted, summarized and added to the self-assessment report. Departments should utilize the results of the surveys for improving the programme as soon as they are available.

1.3 Expectation outcome indicators (EOIs)

The results of programme's accreditation and the extent to which they are used to improve the programme must be documented.

1.3.1 Describe the actions taken based on the results of periodic accreditation

Applied for NOC in HEC & No Accreditation required for MS Program

Indicative Evidence: Compliance of last Accreditation Report/PGPR.

{

1.3.2 Describe major future program improvements plans based on recent assessments.

NA

1.3.3 List strengths and weaknesses of the program

Program Strengths	Program Weaknesses
Highly qualified and research-oriented faculty with expertise in advanced areas such as AI, Data Science, and Cybersecurity	Limited availability of high-performance computing resources for large-scale research projects
Curriculum aligned with current industry trends and international academic standards	Lack of in-house incubation center or dedicated research labs for emerging technologies like IoT, Blockchain, and Cloud Computing
Active collaboration with IT industry and academia for research, internships, and project supervision	No university-owned software house or technology park for hands-on enterprise-level software development experience

1.3.4 List significant future development plans for the program.

1. Establishment of Advanced Research Labs.
2. Launch of In-House Incubation Center.
3. International Collaboration and Exchange Programs.
4. Career Development and Placement Cell.

1.4 Expectation outcome indicators (EOIs)

1.4.1 The department must assess its overall performance periodically using quantifiable measures.

Performance Measures	Results
Present student enrolments (undergraduate and graduate) during the last three years indicating percentages of honours students	8
Student faculty ratio	1:4
Average graduating grade point average per semester	3.86
Average time for completing the program	NIL
Attrition rate	NIL
Percentage of employers that are strongly satisfied with the performance of the department's graduates (employer Survey)	NIL
Indicate the median/average student evaluation for all modules	
% of faculty awarded excellence in teaching award	NA
No. of journal publications per faculty per year	3
No. of funded projects	NA
No. of conference publications per faculty per year	2
% of faculty awarded excellence in research award	NA
Number of short courses per year, workshops and seminars organized for community services	NA
Faculty and students satisfaction regarding the administrative services offered by the department	NA

Indicative Evidence: Evidence of data of the above indicators.

1.5 Expectation outcome indicators (EOIs)

The department/programme must take deliberate steps to engage all students, individually and collectively, as partners in the assurance and enhancement of their educational experience.

1.5.1. Describe actions taken to involve students in the evaluation of teaching and learning.

The department is currently in the process of involving students in evaluation of teaching and learning experience.

- **QEC Surveys:** Students participate in end-of-semester surveys conducted by the Quality Enhancement Cell (QEC), which assess course content, teaching methodologies, and faculty effectiveness. These standardized instruments ensure consistent data collection across the program.
- **Open-Door Policy:** Faculty members maintain open communication channels, encouraging students to voice concerns or suggestions regarding teaching quality at any time during the semester.

1.5.2 Describe actions taken as a result of student evaluation.

Improvement in Teaching Methods: Faculty members have revised their instructional strategies to incorporate more interactive techniques such as case studies, discussions, and real-world problem-solving to address concerns about monotonous lectures.

1.5.3 Describe how actions are communicated to students.

Classroom Announcements: Faculty members discuss feedback outcomes and resulting changes directly during lectures to ensure all students are informed and understand the purpose behind any

{

adjustments.

1.5.4 Describe actions taken to engage students in decision-making about the quality of their higher education.

Collaborative Student Discussions: To ensure broader participation, a group of selected students also hold regular collaborative discussions to confer academic experiences and challenges.

1.5.5 Describe actions taken to recruit student members to appropriate deliberative committees.

1.5.6 Describe training given to students to enable their participation in decision-making committees.

1.5.7 Terms of reference of deliberative committees on which students sit.

Standard-2: CURRICULUM DESIGN AND ORGANIZATION

The curriculum must be designed and organized to achieve the program's objectives and outcomes. Also, course objectives must be in line with program outcomes. The breakdown of the curriculum must satisfy the standards specified in this section. Curriculum standards are specified in terms of credit hours of study. A semester credit hour equals one class hour or two to three laboratory hours per week. The semester is approximately fifteen weeks.

Provide the following information about the programme's curriculum:

Table 2.1: Curriculum course requirements

Course Specification Template:

For each course in the program that can be counted for credit, provide the following details:

Information Required	Information Provided
Course Title	Yes
Course Learning Outcomes	Yes
Catalog description	Yes
Textbook(s) and references	Yes
Syllabus breakdown in lectures	Yes
Computer usage	Yes
Laboratory	Yes
Detailed Course Outline (please attach)	Yes

Study Plan of MS with Specialization in Computer Science or Data Science

Semester I

Course Code	Course Title	Credit Hours
CSC-501	Advance Analysis of Algorithm	3
CSC-504	Advance Theory of Computation	3
CSC-503	Theory of Programming Language	3
CSC-502	Research Methodology	3
	Total	12

Semester II

Course Code	Course Title	Credit Hours
CSC-5XX	Elective – I	3
CSC-5XX	Elective – II	3
CSC-5XX	Elective – III	3
CSC-5XX	Elective – IV	3
	Total	12

Semester III

Course Code	Course Title	Credit Hours
CSC-5XX	MS Thesis-I	3
	Total	3

Semester IV

Course Code	Course Title	Credit Hours
CSC-5XX	MS Thesis-II	3
	Total	3

Indicative Evidence: Program Specification with Course details.

2.1 Expectation outcome indicators (EOIs)

2.1.1 The curriculum must be consistent and supports the program's documented objectives.

Describe how the program content (courses) meets the program objectives

Courses	Program Objectives						
	1	2	3	4	5	6	7

Table: 2.1.1

Indicate which courses contain a significant portion (more than 30%) of the following elements:

All the courses listed in Table 4.4 comprise of theoretical background (40-50%), problem analysis (30-40%) and solution design (30-40%). For problem analysis, group work and assignments are given. For Solution design students either prepare a term paper or project presentations on related skills acquired from each course.

Elements	Courses
Theoretical background	
Problem analysis	
Solution design	

Table 4.5: Standard 2-2 requirement

2.2 Expectation outcome indicators (EOIs)

The curriculum must satisfy the core requirements for the program, as specified by the respective accreditation body.

Ans: The MSCS curriculum is meticulously structured in accordance with the guidelines prescribed by the Higher Education Commission (HEC) and relevant accreditation bodies. It

{

ensures academic rigor, alignment with contemporary industry demands, and the development of advanced professional competencies in the field of Computer Science.

2.3 Expectation outcome indicators (EOIs)

The curriculum must satisfy the major requirements for the program as specified by HEC, the respective accreditation body / councils.

Ans: The curriculum fulfills the major requirements outlined by HEC and NCEAC, ensuring compliance with national academic and professional standards for the MS Computer Science (MSCS) program.

2.4 Expectation outcome indicators (EOIs)

The curriculum must satisfy general education, arts, and professional and other discipline requirements for the program, as specified by the respective accreditation body / council.

Ans: The curriculum fulfills the major requirements outlined by the Higher Education Commission (HEC) and NCEAC, ensuring compliance with national academic and professional standards for the MSCS program.

2.5 Expectation outcome indicators (EOIs)

The information Technology component of the curriculum must be integrated throughout the program.

Ans: The curriculum integrates advanced Information Technology components across all levels of the program to strengthen students' competencies in software development, data analytics, artificial intelligence, and the use of modern computing tools and platforms in solving real-world problems.

2.6 Expectation outcome indicators (EOIs)

The MSCS program emphasizes the development and application of students' oral and written communication skills through technical presentations, research report writing, seminars, and interactive learning activities. Additionally, allied courses have been included to fulfill the academic and professional requirements of the program.

2.7 Expectation outcome indicators (EOIs)

Conduct feedback surveys each semester for each course from students and faculty.

Indicative Evidence: Evidence of 2.1 to 2.8 available in Program Specification.

Standard-3: Subject Specific Facilities

Expectation:

Subject-specific facilities must be adequately available and accessible to faculty members and students to support teaching and research activities.

Lab Specification Template:

Describe the laboratory/ computer facilities that are available for use in the program under assessment. Indicate for each lab the following

Information Required	Information Provided
Course title	Yes
Location and area	Yes
Objectives	Yes
Adequacy for instruction	Yes
Courses taught	Yes
Software available if applicable	Yes
Major Apparatus	NA
Major Equipment	50%
Safety regulations	50%

3.1 Expectation outcome indicators (EOIs): Laboratory manuals/documentation/instructions for experiments must be available and readily accessible to faculty and students.

3.1.1 Describe the subject-specific facilities that are available for use in the programme under assessment.

Indicative Evidence: List of facilities (verified)

1. Classrooms
2. Projectors
3. Smart Classroom
4. Whiteboard
5. Computer Lab

3.1.2 Explain how students and faculty have adequate and timely access to the manuals/documentation and instructions.

Indicative Evidence: Sample Manual

3.1.3 Benchmark with similar departments in reputable institutions to identify shortcomings in the laboratory.

{

3.2 Expectation outcome indicators (EOIs): There must be adequate support personnel for instruction and maintaining the laboratories.

3.2.1. Indicate for each laboratory: support personnel, level of support, nature and instructional support.

Answer: One Naib Qasid is assigned to the lab to assist with routine tasks and support the smooth functioning of the laboratory environment

3.3 Expectation outcome indicators (EOIs): The institution's computing infrastructure and facilities must be adequate to support the programme's objectives

3.3.1 : Describe how the computing facilities support the computing component of the programme.

3.3.2 : Benchmark with similar departments in reputable institutions to identify shortcomings in computing infrastructure and facilities.

Criterion 4: STUDENT SUPPORT AND ADVISING

Expectations:

Students must have adequate support to complete the program in a timely manner and must have an ample opportunity to interact with their instructors and receive timely advice about program requirements and career alternatives.

4.1 Expectation outcome indicators (EOIs) 4: Modules must be offered with sufficient frequency and number for students to complete the programme in a timely manner.

yes

4.1.1 Provide the department's strategy for course offerings.

Curriculum designed as from fundamental to advanced.

4.1.2 Explain how often required courses are offered.

We follow as per the approved BOS

4.1.3 Explain how often elective courses are offered.

We follow as per the approved BOS

4.1.4 Explain how required modules outside the department are managed to be offered in sufficient number and frequency.

AS PER Ugep -2023 All courses taught by other departments are managed in the semesters.

4.2 Expectation outcome indicators (EOIs): Modules in the major area of study must be structured to ensure effective interaction between students, department and teaching assistants.

4.2.1 Describe how you achieve effective student / faculty interaction in courses taught by more than one person such as two faculty members, a faculty member and a teaching assistant or a lecturer.

4.3 Expectation outcome indicators (EOIs): Guidance on how to complete the programme must be available to all students and access to academic advising must be available to make module decisions and career choices.

4.3.1 Describe how students are informed about program requirements.

4.3.2 Describe the advising system and indicate how its effectiveness is measured.

4.3.3 Describe the student counseling system and how students get professional counseling when needed.

All the current batches have been assigned a councilor/Faculty member on departmental level.

4.3.4 Indicate if students have access to professional counseling; when necessary.

{

4.3.5 Describe opportunities available for students to interact with practitioners, and to have membership in technical and professional societies.

No

Standard 5: TEACHING FACULTY/STAFF

Expectation

Teaching faculty/staff must be current and active in their discipline and have the necessary technical depth and breadth to support the programme. There must be enough department members to provide continuity and stability, to cover the curriculum adequately and effectively, and to allow for scholarly activities

Expectation outcome indicators (EOIs)

Expectation outcome indicators (EOIs): There must be enough full-time teaching staff who are committed to the programme to provide adequate coverage of the programme areas/modules with continuity and stability. The interests and qualifications of all teaching staff must be sufficient to teach all modules, plan, modify and update modules and curricula. All teaching staff should have a level of competence that would normally be obtained through graduate work in the discipline. The majority of the teaching staff should hold a PhD in the discipline and/or vocational experience in their area of expertise.

Complete a table indicating programme areas and number of teaching staff in each area.

Sr #	Program Areas	Full Time Faculty in each Areas
1.	Machine Learning, Deep Learning, Evolutionary Computing	Dr. Waqas Haider Khan Bangyal
2.	Sensor Networks, Wireless Networks, IoT	Dr. Muhammad Faran Majeed
3.		
4.		

Each member of the teaching staff should complete a CV.

Name of Teaching Staff	Designation	CV Submission status
Dr. Waqas Haider Khan Bangyal	Associate Professor	Yes
Dr. Muhammad Faran Majeed	Associate Professor	Yes

Expectation outcome indicators (EOIs): Teaching staff must remain current in the discipline and sufficient time must be provided for scholarly activities and professional development. Also, effective programmes for staff development must be in place.

5.1 Describe the criteria for teaching staff to be deemed current in the discipline and based on these criteria and information in the teaching staff member's CV, what percentage of them is current. The criteria should be developed by the department.

Program area subjects have been assigned to the most relevant faculty member.

5.2 Describe the means for ensuring that full-time teaching staff have sufficient time for scholarly and professional development.

Yes. Teachers have received HEC training by faculty development manners.

5.3 Describe existing teaching staff development programmes at the departmental and institutional levels. Demonstrate their effectiveness in achieving teaching staff development.

Yes. On a departmental level, different seminars and workshops are organized, and faculty members are also encouraged to

{

participate in different national and international events. Some of the training workshops are organized by the HEC.

5.4 Indicate how frequently faculty programmes are evaluated and if the evaluation results are used for improvement.

NA

STANDARD 6: INSTITUTIONAL POLICIES AND PROCESS CONTROL

Expectation

The processes by which major functions are delivered must be in place, controlled, periodically reviewed, evaluated and continuously improved.

Expectation outcome indicators (EOIs)

6.1 Expectation outcome indicators (EOIs): The process by which students are admitted to the programme must be based on quantitative and qualitative criteria and clearly documented.

6.1.1 This process must be periodically evaluated to ensure that it is meeting its objectives.

Periodically Evaluation Status	

6.1.2 Describe the programme admission criteria at the institutional level or department if applicable.

Yes. Our institution and department have approved policy for admission.

6.1.3 Describe policy regarding programme/credit transfer.

Evidence: Document of Transfer Policy

6.1.4 Indicate how frequently the admission criteria are evaluated and if the evaluation results are used to improve the process

6.2 Expectation outcome indicators (EOIs): The process by which students are registered on the programme and monitoring of students' progress to ensure timely completion of the programme must be documented. This process must be periodically evaluated to ensure that it is meeting its objectives.

6.2.1 Describe how students are registered on the programme.

As per admission policy of the University

6.2.2 Describe how students' academic progress is monitored and how their programme of study is verified to adhere to the degree requirements.

{

6.2.3 Indicate how frequently the process of registration and monitoring are evaluated and if the evaluation results are used to improve the process.

6.3 Expectation outcome indicators (EOIs) 6: The process of recruiting and retaining highly qualified department members must be in place and clearly documented. Also, processes and procedures for department evaluation, and promotion must be consistent with the institution mission statement. These processes must be periodically evaluated to ensure that they are meeting with their objectives.

6.3.1 Describe the process used to ensure that highly qualified teaching staff are recruited to the programme.

As per University Act.

6.3.2 Indicate methods used to retain excellent teaching staff members.

University policy

6.3.3 Indicate how evaluation and promotion processes are in line with the institution mission statement.

6.3.4 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

6.4 Expectation outcome indicators (EOIs): The process and procedures used to ensure that teaching and delivery of module material to the students emphasizes active learning and that module learning outcomes are met. The process must be periodically evaluated to ensure that it is meeting its objectives.

6.4.1 Describe the process and procedures used to ensure that teaching and delivery of module material is effective and focus on students learning.

Different activities are conducted on departmental levels along with teaching to focus on student learnings.

6.4.2 Indicate how frequently this process is evaluated and if the evaluation results are used to improve the process.

6.5 Expectation outcome indicators (EOIs): The process that ensures that graduates have completed the requirements of the programme must be based on standards, and effective and clearly documented procedures. This process must be periodically evaluated to ensure that it is meeting its objectives.

6.5.1 Describe the procedures used to ensure that graduates meet the programme requirements.

6.5.2 Describe when this procedure is evaluated and whether the results of this evaluation is used to improve the process.

{

Expectation outcome indicators (EOIs) 6.6: Programmes produce information for external audiences about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.6.1 Mission, values and overall strategy are publicly available on the institution's website.

Yes

6.6.2 The process for application and admission to the programme of study is clearly described to prospective students.

On university websites, well defined SOS are available for facilitation.

6.6.3 Information is made available to prospective students to help them select their programme with an understanding of the academic environment in which they will be studying and the support that will be made available to them.

Yes

Expectation outcome indicators (EOIs) 6.7: Programmes produce information for students about the learning opportunities they offer that is fit for purpose, accessible and trustworthy.

6.7.1 Information on the programme of study is made available to current students at the start of their programme and throughout their studies.

Yes

6.7.2 Programmes set out what they expect of current students and what current students can expect of the programme.

6.7.3 When students leave their programme of study, they are issued with a detailed record of their studies, which gives evidence to others of the students' achievement in their academic programme.

6.8 Expectation outcome indicators (EOIs): Programmes are managed to high ethical standards when dealing with faculty, staff, students and other stakeholders.

6.8.1 Programmes practice and exemplify the values and ethical principles articulated in the institution's mission and ethics policies.

Yes

6.8.2 Programmes safeguard the interests of students, faculty and staff.

Yes

6.8.3 Programmes ensure equality, diversity and inclusion.

Yes

6.8.4 Programmes have a transparent approach to all communication, including academic integrity and complaints.

Yes

STANDARD 7: INSTITUTIONAL SUPPORT AND FACILITIES

Expectation

The institution's support and the financial resources for the programme must be sufficient to provide an environment in which the programme can achieve its objectives and retain its strength. Also, the institutional facilities, including library, classrooms and offices, must be adequate to support the objective of the programme. To satisfy this criterion a number of standards must be met.

Expectation outcome indicators (EOIs)

7.1 Expectation outcome indicators (EOIs): There must be sufficient support and financial resources to attract and retain high-quality teaching staff and provide the means for them to maintain competence as teachers and scholars.

7.1.1 Describe how the programme meets this standard. If it does not, explain the main causes and plans to rectify the situation.

Initial funding to universities were utilized to establish a main laboratory and renovation of classrooms, and purchase lab related items.

7.1.2 Describe the level of adequacy of secretarial support, technical staff and office Equipment

The offices are facilitated by the university

7.2 Expectation outcome indicators (EOIs): There must be an appropriate number of high-quality graduate students, research assistants and PhD students.

7.2.1 Provide the number of graduate students, research assistants and PhD students for the last three years.

NA

7.2.2 Provide the teacher: graduate student ratio for the last three years

NA

7.3 Expectation outcome indicators (EOIs): Financial resources must be provided to acquire and maintain library holdings, laboratories and computing facilities.

7.3.1 Describe the resources available for the library.

7.3.2 Describe the resources available for laboratories.

7.3.3 Describe the resources available for computing facilities.

7.4 Expectation outcome indicators (EOIs): The institution must have the infrastructure to support new trends in learning such as e learning.

7.4.1 Describe infrastructure and facilities that support new trends in learning.

7.4.2 Indicate how adequate the facilities are.

7.5 Expectation outcome indicators (EOIs): The library must possess an up-to-date technical collection relevant to the programme and must be adequately staffed with professional

{

personnel.

7.5.1 Describe the adequacy of the library's technical collection.

7.5.2 Describe the support rendered by the library.

7.6 Expectation outcome indicators (EOIs): Classrooms must be adequately equipped, and offices must be adequate to enable teaching staff to carry out their responsibilities.

7.6.1 Describe the adequacy of the classrooms.

Yes. classes are Designated to the program.

7.6.2 Describe the adequacy of teaching staff offices.

Yes. Staffroom and office are available.

STANDARD 8: INSTITUTIONAL GENERAL REQUIREMENTS

Expectation

The institution ensures that research degrees are awarded in a research environment that provides secure academic Precepts, standards and international best practices for doing research and learning about research approaches, methods, procedures and protocols, and which takes account of social and industrial needs. This environment offers students quality opportunities and the support they need to achieve successful academic, personal and professional outcomes from their research degrees.

8.1 Expectation outcome indicators (EOIs): General Principles

8.1.I. Full and part-time postgraduate research programmes will only be offered where students can be expected to meet the academic Precepts the institution has set for itself, which should reflect national expectations.

NA

8.1.2 Regulations should be clearly defined, made readily available and be sufficiently comprehensive to cover the progression of research students from admission and registration through to final examination and award.

NA

8.1.3. Regulations should be subject to regular review, at local and institutional level.

NA

8.1.4. Research should take account of regional, national and international social and industrial needs.

8.2: The research environment

The institution should:

8.2.1 Only offer research opportunities where students can be trained and supported within an environment that is supportive of research

8.2.2. Make sure that all publicity materials associated with postgraduate research programmes are clear, accurate and of sufficient detail to inform student choice.

NA

8.3: The selection and admission of students

The institution should:

8.3.1. make sure that admissions procedures are clear and consistently applied

8.3.2. make sure that only appropriately qualified and/or prepared students are admitted

{

onto research programmes

8.3.3. make sure that admissions decisions involve the judgment of more than one member of the institution's staff with relevant expertise

Evidence: Admission Committee

8.3.4. make sure that admissions procedures promote equality of opportunity

8.3.5. make sure that the entitlements and responsibilities of a research student undertaking a postgraduate research programme at the institution are defined and communicated clearly

8.4: Student information and induction

The institution should:

8.4.1: make sure that research students are provided with opportunities by the institution to enable them to commence their studies with an understanding of the academic and social environment within which they will be working.

8.5: The approval of research projects

The institution should:

8.5.1: give adequate consideration to the feasibility of both full and part-time students undertaking and successfully completing a particular research project.

8.6: Skills training

The institution should:

8.6.1: make sure that research students have access to training sufficient to gain the skills they need to design and complete their programmes effectively and to help prepare themselves for their subsequent career.

8.7: Supervision

The institution should:

8.7.1: make sure that supervisors possess recognized subject expertise

8.7.2: make sure that supervisors have the necessary skills and experience to monitor, support and direct research students' work

8.7.3: make sure that research students receive support and direction sufficient to enable

{

them to succeed in their studies

8.7.4: make sure that the progress made by research students is consistently monitored and regularly communicated to the students.

8.8: Assessment

The institution should:

8.8.1: make sure that postgraduate research assessment processes are communicated clearly and fully to research students and supervisors

8.8.2: postgraduate research assessment processes are clear and operated rigorously, fairly, reliably and consistently

Feedback, complaints and appeals

8.8.3: make sure that mechanisms exist to enable open and constructive feedback to be provided by research students and their supervisors on the learning experience and support infrastructure

8.8.4: make sure that complaints and appeals procedures are fair, open and consistently applied, allowing students access to relevant information and an opportunity to present a case

8.8.5: make sure that independent and formal procedures exist to deal swiftly with complaints from research students about the quality of the institution's learning and support provision

8.8.6: make sure that formal procedures exist to deal with any academic appeals made by postgraduate research students

8.8.7: make sure that the acceptable grounds for appeals are clearly defined
