GPR Implementation Plan (Department of chemistry)

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Compliance Status	Attachments
	Program Vision and Mission Development with Symmetry to Institutional Goals The program vision and mission must be critically developed and fully aligned with the university's overarching vision and	The program vision and mission were developed through careful discussions with BOS members. However, to further enhance them, they are currently under review to ensure complete alignment with the university's overarching vision and mission. Program Objectives, PEOs, PLOs, and SOs will be systematically revised and mapped to maintain vertical and horizontal alignment,	In the upcoming BOS, expected within 3 months	Department	BOS has been conducted and all approved revisions have been fully implemented as per HEC guidelines. (The complete SOS for BS and MS provided by HEC)	Annex-1

1	mission. Program Objectives, along with Program Educational Objectives (PEOs), Program Learning Outcomes (PLOs), and Subject Outcomes (SOs), should be systematically created to ensure vertical and horizontal alignment. This symmetry guarantees that every course, assessment, and learning activity contributes directly to graduate competencies and institutional goals.	ensuring that all courses and assessments directly contribute to the intended graduate competencies and institutional goals.				
---	--	---	--	--	--	--

2	Lack of Administrative and Support Staff Across all reviewed departments offering MS/MPhil programs, there is an acute shortage of administrative and technical support staff. Administrative staff are responsible for maintaining student files, coordinating admissions, arranging Board of Studies (BoS) meetings, issuing notifications, and handling correspondence with the Controller of Examinations and Registrar's Office. The absence of adequate support staff leads to delays in student file completion, transcript processing, and program-level documentation, which directly impacts student satisfaction and regulatory compliance.	We acknowledge the shortage of administrative and technical support staff in departments offering MS/MPhil programs. The matter has already been taken up with the competent authority, and a proposal for the recruitment of necessary staff is under consideration to ensure smooth program operations, timely documentation, and improved student facilitation.	6-12 Months	HR Section with approval from Worthy VC	The case has been submitted to the HR for recruitment of required staff and is still under process.	
3	Irregular Board of Studies (BoS) Meetings BoS meetings are a cornerstone of academic governance, where curriculum revisions, scheme of studies, thesis policies, and course allocations are reviewed and approved. Observations reveal that BoS meetings are	The department has already conducted two Board of Studies (BoS) meetings since its inception and is planning to hold another one in the near future. Furthermore, it intends to	2 Months	Department	BOS meetings are now being conducted regularly the 3rd BOS has been held with all approved recommendations implemented. Regular BOS Meetings will be held in each semester.	

	not being conducted according to the notified calendar, leading to delays in curriculum updates, approval of new courses, and incorporation of industry/research feedback. This irregularity risks academic stagnation and misalignment with HEC guidelines.	conduct BoS meetings regularly every semester.				
4	Ambiguity in Admission Criteria and Testing In several MS/MPhil programs, admission criteria are unclear or undocumented. Admission committees and their Terms of Reference (TORs) are either not officially notified or lack transparency. In some cases, entry tests are conducted without formal announcement of evaluation criteria, and results are not properly communicated to applicants. This compromises the transparency of the admission process, affects student trust, and poses legal and regulatory risks in case of grievances or audit queries.	We have already followed the procedures outlined by the Higher Education Commission (HEC), and moving forward, we will continue to adopt and strictly adhere to HEC policies, which are clearly defined for all such processes. The HEC has specified detailed admission and other criteria for BS, MPhil, and PhD programs in the Department of Chemistry, which will be implemented in full.	Department	2-3 Months	Implemented already as per HEC guidelines	Completely Clarified based on HEC Directions
5	Absence of Student and Faculty Manuals	The department acknowledges the	Department, Academics,	3-6 Months	University Admin Concern and In-progress	Different bodies of university administration and departments are working on it.

	None of the MS/MPhil programs maintain a formal Student Manual that compiles program structure, assessment rules, research policies, code of conduct, and grievance procedures. Faculty also lack orientation handbooks, which leads to inconsistent implementation of rules, miscommunication, and confusion among students and new instructors.	importance of formal Student and Faculty Manuals. Development of comprehensive manuals, including program structure, assessment rules, research policies, code of conduct, and grievance procedures, is already in progress.			
6	Weak Curriculum Design and Course Mapping The curriculum for multiple programs shows misalignment with HEC and National Curriculum Review Committee (NCRC) guidelines: • Course codes are inconsistent or outdated. • Core and elective categorization is unclear. • Market-relevant courses like AI, data analytics, and industry-specific modules are missing in several programs (e.g., Sociology, CS).	The department has noted the curriculum alignment issues and has initiated a comprehensive review to ensure full compliance with HEC and NCRC guidelines. Course codes will be updated, and the core/elective categorization will be clarified. Market-relevant courses such as AI, data analytics, and other industry-specific modules will be considered for inclusion where applicable. Research components will be clearly defined in program structures to eliminate ambiguity and enhance student understanding.	Department, Academics	2-3 Months	Already completed as per HEC Directions.

	Research components (thesis/project/seminar) are ambiguously defined, creating confusion among students.				
7	Limited MoUs and Industry/Research Collaborations Existing MoUs are not actively monitored, and there are few new partnerships with industry or research organizations. This limits student internships, collaborative research, co-supervision opportunities, and industry-informed curriculum updates.	Steps are being taken to actively monitor existing MoUs and establish new partnerships with relevant industries and research organizations. These collaborations will be leveraged to enhance student internship opportunities, promote joint research, facilitate co-supervision, and ensure curriculum updates reflect industry needs.	Department, Academics, ORIC	3-6 Months	The department is in continuous struggle for developing collaboration with multiple institutes
8	Absence of Anti-Plagiarism and AI-Use Policies No Anti-Plagiarism Committee has been notified for MS/MPhil programs, and there is no formal policy on AI tool usage in coursework and research. This creates high risks of academic misconduct, research integrity violations, and HEC non-compliance.	The notification of the Anti-Plagiarism Committee is in process, and an AI-use policy for coursework and research is being drafted. Both measures will be implemented promptly to prevent academic misconduct and ensure research quality.	Registrar, Academics	3-6 Months	The University has already implemented and is fully complying with HEC Anti-Plagiarism and AI usage policies across all academic and research activities.

**GPR Compliance Report (MS Biotechnology, Department of
Biotechnology)**

Dated: 10th Feb 2026

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Compliance/ Pending
1	Program Vision and Mission Development with Symmetry to Institutional Goals The program vision and mission must be critically developed and fully aligned with the university's overarching vision and mission. Program Objectives, along with Program Educational Objectives (PEOs), Program Learning Outcomes (PLOs), and Subject Outcomes (SOs), should be systematically created to ensure vertical and horizontal alignment. This symmetry guarantees that every course, assessment, and learning activity contributes directly to graduate competencies and institutional goals.	The existing program vision and mission is aligned with the university's overarching vision and mission but as some minor changes approval is intended with BoS approval, where PEOs, PLOs and SOs will be also revised.	Tentative period for BoS meeting schedule depends on approvals from the high authority of KUM, most probably during fall 2025 semester.	Department	Completed Modified and approved in 3rd BoS meeting
2	Lack of Administrative and Support Staff Across all reviewed departments offering MS/MPhil programs, there is an acute shortage of administrative and technical support staff. Administrative staff are	Request has been generated to university administration to appoint dedicated admin and technical support staff for the department.	Depends on university hiring procedure	HR, Registrar office	Not Completed Hiring/ provision of computer operator and a lab assistant/attendant

	responsible for maintaining student files, coordinating admissions, arranging Board of Studies (BoS) meetings, issuing notifications, and handling correspondence with the Controller of Examinations and Registrar's Office. The absence of adequate support staff leads to delays in student file completion, transcript processing, and program-level documentation, which directly impacts student satisfaction and regulatory compliance.				
3	Irregular Board of Studies (BoS) Meetings BoS meetings are a cornerstone of academic governance, where curriculum revisions, scheme of studies, thesis policies, and course allocations are reviewed and approved. Observations reveal that BoS meetings are not being conducted according to the notified calendar, leading to delays in curriculum updates, approval of new courses, and incorporation of industry/research feedback. This irregularity risks academic stagnation and misalignment with HEC guidelines.	BoS meetings will be scheduled and conducted as per university calendar and approvals.	Tentative period for BoS meeting schedule depends on approvals from the high authority of KUM, most probably during fall 2025 semester.	Department	Completed Modified and approved in 3rd BoS meeting
4	Ambiguity in Admission Criteria and Testing In several MS/MPhil programs, admission criteria are unclear or undocumented. Admission committees and their Terms of Reference (TORs) are either not officially	The administration was instructed in QEC meeting to develop and officially notify clear admission policy, committee TORs, test format, and evaluation	University decision	Admission Committee / ORIC	Completed Modified and approved in 3rd BoS meeting

	notified or lack transparency. In some cases, entry tests are conducted without formal announcement of evaluation criteria , and results are not properly communicated to applicants . This compromises the transparency of the admission process , affects student trust , and poses legal and regulatory risks in case of grievances or audit queries.	criteria; ensure timely communication of results			
5	Absence of Secrecy Cell in Examination Department There is need of officially established Secrecy Cell for handling confidential examination processes such as paper setting, secure printing, moderation, result compilation, and safe record storage . Without a secrecy cell, the university faces high risks of paper leakage, examination integrity compromise, and audit non-compliance , which can lead to serious credibility issues.	In QEC meeting it was proposed to exam office to establishment a formal Secrecy Cell for secure exam handling and result processing	Depends on university actions	Controller Examinations Examination Committee of /	Examination dept. Concern
6	Delayed Transcript/DMC Issuance and Unattested Entry DMCs Many students have reported not receiving semester-wise transcripts or DMCs on time . Additionally, Matric and Intermediate DMCs of admitted students are not properly attested by relevant Boards ,	Department has ensured verification of entry-level DMCs during admission.	Department will ensure verification of entry-level DMCs during admission	New admissions	Examination dept. Concern

	which creates degree verification problems and HEC audit risks. Timely transcript issuance is critical for scholarships, further admissions, and job applications. Lack of attested records can result in delays in degree issuance and accreditation complications.				
7	Absence of Student and Faculty Manuals None of the MS/MPhil programs maintain a formal Student Manual that compiles program structure, assessment rules, research policies, code of conduct, and grievance procedures. Faculty also lack orientation handbooks, which leads to inconsistent implementation of rules, miscommunication, and confusion among students and new instructors.	The university was advised to Develop and distribute comprehensive Student and Faculty Manuals covering all academic and administrative policies.	Depends on admin action	University admin has to develop and distribute comprehensive Student and Faculty Manuals covering all academic and administrative policies	University Admin Concern
8	Regulatory Non-Compliance and Missing NOCs MS/MPhil programs at KUM are operating without valid HEC No Objection Certificates (NOCs). HEC mandates that programs without NOCs are not officially recognized, risking degree validation and student futures.	QEC office has initiated the process to apply for HEC NOCs by compiling required documentation and fulfilling all criteria	Depends on departmental dossier preparation and QEC performance	Department of Biotechnology / Director Academics / QEC	Completed and submitted to QEC for applying
9	The curriculum for multiple programs shows misalignment with HEC and National Curriculum Review Committee (NCRC) guidelines: • Course codes are inconsistent or outdated. • Core and elective categorization is unclear. • Market-relevant courses like AI, data analytics, and industry-specific modules are missing in several programs (e.g., Sociology, CS). • Research components (thesis/project/seminar) are ambiguously defined, creating confusion among students.		most probably during fall 2025 semester.	Department	Completed Modified and approved in 3rd BoS meeting
	Insufficient Library and Laboratory Resources The review found major gaps in library				

10	and lab resources: • Library collections are insufficient; core textbooks and journals are not meeting HEC's minimum book-to-student ratio. • E-library and digital access are limited or non-functional. • Laboratories (Biotechnology, MLT) lack essential equipment, reagents, and consumables, limiting	Request has been submitted for F&PC approvals of budget for equipping labs, and setting up a dedicated computer lab	Depends on budget provision	Treasurer office	The department is preparing a list of required books and equipment to be submitted for purchasing.
11	Limited MoUs and Industry/Research Collaborations Existing MoUs are not actively monitored, and there are few new partnerships with industry or research organizations. This limits student internships, collaborative research, co-supervision opportunities, and industry-informed curriculum updates.	The department of biotechnology already have signed 4 MoUs with different collaborators and will establish a monitoring mechanism for existing collaborations	We will identify potential partners and actively pursue new MoUs.	Department of Biotechnology / ORIC	The department is in continuous struggle for developing collaboration with multiple institutes.
HoD's Comments: The department has made its best efforts to comply with the above-mentioned points. The matters that fall under the responsibility of the university administration are now being streamlined, and we hope that the competent authority will help us achieve these goals.

Quality Enhancement Cell (QEC)

GPR Implementation Plan (Department of Computer Science)

Dated: 10th March 2026

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Compliance/Pending
1.	Program Vision and Mission misalignment with institutional goals.	Review and revise program vision, mission, PEOs, PLOs, and SOs to align with university vision and mission; ensure mapping with courses and assessments.	6 months	Department	Completed Will be modified and approved in the upcoming 4th BoS meeting
2.	Shortage of administrative and technical staff.	Request recruitment/transfer of required admin and lab staff; assign interim duties to existing staff until hiring is complete.	3 months	HR, Registrar office	Not Completed Hiring/ provision of computer operator and a lab assistant/attendant
3.	Irregular Board of Studies (BoS) meetings.	Schedule and strictly follow bi-annual BoS meetings; circulate calendar and agenda in advance.	Immediate and ongoing	Department	Completed will be modified and approved in upcoming 4th BoS meeting
4.	Unclear admission criteria and testing.	Draft and approve transparent admission policy.	2 months	Admission Committee / ORIC	Completed will be modified and approved in upcoming 4th BoS meeting

5.	Absence of Secrecy Cell in examination department.	Establish Secrecy Cell with secure paper setting, printing, moderation, and storage protocols.	4 months	Controller of Examinations / Examination Committee	Examination dept. Concern
----	--	--	----------	--	---------------------------

6.	Delayed transcript issuance and unattested entry DMCs.	Streamline transcript process with fixed issuance timelines; verify and attest all student documents at admission stage.	Immediate and ongoing	Controller of Examinations, Admission Office	Examination dept. Concern
7.	Absence of student and faculty manuals.	Develop and distribute comprehensive Student Handbook and Faculty Orientation Manual.	3 months	University admin has to develop and distribute comprehensive Student and Faculty Manuals covering all academic and administrative policies	University Admin Concern
8.	Missing HEC NOCs.	Apply for and obtain valid HEC NOCs for all MS/MPhil programs.	6 months	Department of Computer Science / Director Academics / QEC	Completed and submitted to QEC for applying
9.	Weak curriculum design and course mapping.	Revise curriculum as per HEC/NCEAC guidelines; include market-relevant courses and clear research components.	6 months	Department	Completed will be modified and approved in upcoming 4th BoS meeting
10.	Insufficient library and laboratory resources.	Procure required books, journals, e-resources, upgrade lab equipment and software access.	6 months	Treasurer office	The department is preparing a list of required books and equipment to be submitted for purchasing.
11.	Limited MoUs and industry/research collaborations.	Sign new MoUs with industry/research bodies, actively monitor and implement existing agreements.	6 months	Department, ORIC	Travel, networking events
12.	Absence of anti-plagiarism and AI-use policies.	Anti-Plagiarism policy already notified, Draft and implement AI-use policy for research and coursework.	2 months	ORIC, QEC	The department is in continuous struggle for developing collaboration with multiple institutes

HoD's Comments: The department has done its utmost to meet the requirements outlined above. Matters under the university administration's jurisdiction are being organized accordingly, and we hope the competent authority will assist us in reaching these objectives.

GPR Implementation Plan (Department of Microbiology)

Sr. No.	AT findings and recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed	Compliance Status
1	Program Vision and Mission Development with Symmetry to Institutional Goals The program vision and mission must be critically developed and fully aligned with the university's overarching vision and mission. Program Objectives, along with Program Educational Objectives (PEOs), Program Learning Outcomes (PLOs), and Subject Outcomes (SOs), should be systematically created to ensure vertical and horizontal alignment. This symmetry guarantees that every course, assessment, and learning activity contributes directly to graduate competencies and institutional goals.	The current program's vision and mission are consistent with the university's overarching vision and mission.	Already implemented and in future Academic calendar will be followed	Department of Microbiology/Academics	Academic schedule/calender approvals	Already implemented

2	Lack of Administrative and Support Staff Across all reviewed departments offering MS/MPhil programs, there is an acute shortage of administrative and technical support staff. Administrative staff are	The KUM administration has been requested to appoint a dedicated administrative and technical support personnel for the department of Microbiology.	KUM administration is planning to initiate hiring procedure	HR, Registrar office	Hiring/ provision of computer operator and a lab assistant	Hiring procedure will be completed in near future
---	---	--	--	-----------------------------	---	--

	responsible for maintaining student files, coordinating admissions, arranging Board of Studies (BoS) meetings, issuing notifications, and handling correspondence with the Controller of Examinations and Registrar's Office. The absence of adequate support staff leads to delays in student file completion, transcript processing, and program-level documentation, which directly impacts student satisfaction and regulatory compliance.				
3	Irregular Board of Studies (BoS) Meetings BoS meetings are a cornerstone of academic governance, where curriculum revisions, scheme of studies, thesis policies, and course allocations are reviewed and approved. Observations reveal that BoS meetings are not being conducted according to the notified calendar, leading to delays in curriculum updates, approval of new courses, and incorporation of industry/research feedback. This irregularity risks academic stagnation and misalignment with HEC guidelines.	BoS meetings will be scheduled and conducted as per university calendar and approvals.	In future Academic calendar will be followed to update and adopt changes in curriculum	Department of Microbiology/Academics	Already following the academic Calander
4	Ambiguity in Admission Criteria and Testing In several MS/MPhil programs, admission criteria are unclear or undocumented. Admission committees and their Terms of Reference (TORs) are either not officially	The KUM administration was directed to establish and officially notify a clear admission policy, committee TORs, test format, and evaluation criteria during the QEC meeting. Additionally, they were instructed to ensure that the results were communicated in a timely manner.	New Admission policy notification QAD/HEC/317 will be adopted as in coming semester fall 2026.	Admission Committee / ORIC	BoS meeting is scheduled for June-July 2026

	notified or lack transparency. In some cases, entry tests are conducted without formal announcement of evaluation criteria, and results are not properly communicated to applicants. This compromises the transparency of the admission process, affects student trust, and poses legal and regulatory risks in case of grievances or audit queries.				
5	Absence of Secrecy Cell in Examination Department There is need of officially established Secrecy Cell for handling confidential examination processes such as paper setting, secure printing, moderation, result compilation, and safe record storage. Without a secrecy cell, the university faces high risks of paper leakage, examination integrity compromise, and audit non-compliance, which can lead to serious credibility issues.	In the QEC meeting, it was suggested to the exam office to set up an official Secrecy Cell for the secure management of exams and processing of results	Implemented by CA.	Controller Examinations Examination Committee	of / Executed by administration
6	Delayed Transcript/DMC Issuance and Unattested Entry DMCs Many students have reported not receiving semester-wise transcripts or DMCs on time. Additionally, Matric and Intermediate DMCs of admitted students are not properly attested by relevant Boards,	Department has ensured verification of entry-level DMCs during admission.	Department will ensure verification of entry-level DMCs during admission	Controller Examinations	of Department has ensured verification of all the documents previous as well as fresh admissions.

	which creates degree verification problems and HEC audit risks. Timely transcript issuance is critical for scholarships, further admissions, and job applications. Lack of attested records can result in delays in degree issuance and accreditation complications.				
7	Absence of Student and Faculty Manuals None of the MS/MPhil programs maintain a formal Student Manual that compiles program structure, assessment rules, research policies, code of conduct, and grievance procedures. Faculty also lack orientation handbooks, which leads to inconsistent implementation of rules, miscommunication, and confusion among students and new instructors.	The university was advised to Develop and distribute comprehensive Student and Faculty Manuals covering all academic and administrative policies that will be implemented soon.	Faculty and student manual is available.	University Admin has developed comprehensive Student and Faculty Manuals covering all academic and administrative policies	University Adminis upgrading already established manual and rules to be disseminated among faculty and students.
8	Regulatory Non-Compliance and Missing NOCs MS/MPhil programs at KUM are operating without valid HEC No Objection Certificates (NOCs). HEC mandates that programs without NOCs are not officially recognized, risking degree validation and student futures.	QEC office has initiated the process for HEC NOCs by compiling required documentation and fulfilling all criteria	Dossiers are already revised and submitted to QEC.	Department of Microbiology / Director Academics /QEC	coordination with HEC, and required documentation is underway NoC for BS programs has been obtained while NoC for MS program is underway.
9	Weak Curriculum Design and Course Mapping	Curriculum is updated and in future need based changes will be adopted.	In future Academic calendar will be followed to update and adopt changes in curriculum .	Department of Microbiology/Academics	BoS meeting is scheduled for upcoming months to rectify any omissions.

	The curriculum for multiple programs shows misalignment with HEC and National Curriculum Review Committee (NCRC) guidelines: • Course codes are inconsistent or outdated. • Core and elective categorization is unclear. • Market-relevant courses like AI, data analytics, and industry-specific modules are missing in several programs (e.g., Sociology, CS). • Research components (thesis/project/seminar) are ambiguously defined, creating confusion among students.				
10	Insufficient Library and Laboratory Resources The review found major gaps in library and lab resources: • Library collections are insufficient; core textbooks and journals are not meeting HEC's minimum book-to-student ratio. • E-library and digital access are limited or non-functional. • Laboratories (Biotechnology, MLT) lack essential equipment, reagents, and consumables, limiting	Microbiology lab is well equipped with equipment and s u f f i c i e n t chemical /consumables	Funds are available	Treasurer office	Resources are Available

	hands-on training and thesis experiments. No dedicated computer lab for Sociology, restricting access to software like SPSS, NVivo, and R.				
11	Limited MoUs and Industry/Research Collaborations Existing MoUs are not actively monitored , and there are few new partnerships with industry or research organizations. This limits student internships, collaborative research, co-supervision opportunities, and industry-informed curriculum updates.	The department of Microbiology already have signed 5 MoUs with different industries and will establish a monitoring mechanism for existing collaborations	We will identify potential partners and actively pursue new MoUs.	Department of Microbiology / ORIC	Administrative support, outreach team, and travel/meeting budget where required
12	Absence of Anti-Plagiarism and AI-Use Policies No Anti-Plagiarism Committee has been notified for MS/MPhil programs, and there is no formal policy on AI tool usage in coursework and research. This creates high risks of academic misconduct, research integrity violations, and HEC non-compliance.	University administration has already adopted and notified.	University administration has notified policy note.	Admin/Academics/de partme nt of microbiolgy	Implemented.
HoD's Comments : The Microbiology Department and KUM administration recognized the review results and resolved the highlighted deficiencies. Essential actions involve soliciting administrative and technical personnel, organizing regular BoS meetings, formalizing admission procedures, and creating a Secrecy Cell by the university administration. Issuing, validating entry documents, creating student and faculty handbooks, and submitting applications for HEC NOCs. A budget is in the process of being created and presented to improve lab and IT facilities. The department is actively seeking to enhance industry and research partnerships by establishing MoUs. Support from university remained vital in prompt implementation.
