

Dated: June 24, 2026

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Biotechnology)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	The department has a critical imbalance in its faculty structure, consisting only of one Professor and four Lecturers, with no Associate or Assistant Professors. This creates a missing academic middle tier, which is essential for mentorship, research supervision, and academic continuity. The absence of mid-level faculty significantly weakens the MS program, particularly in terms of advanced teaching, research guidance, and long-term academic development.	Recruitment and promotion of Associate/Assistant Professors, engagement of visiting faculty, and capacity building of existing staff	6–12 months	University Administration / HR Department / Selection Board	Budget allocation, approval from statutory bodies
2.	There is a serious lack of non-academic support staff, including laboratory attendants, a permanent sweeper, and a computer operator. This shortage negatively affects daily administrative, laboratory, and IT-related operations. As	Recruitment/appointment of essential non-academic staff (lab attendants, sweeper, computer operator) and rationalization of support services through interim arrangements.	6–12 months for hiring	University Administration / HR Department / Registrar Office	Budget for sanctioned posts approval, hiring committee.

	a result, both students and faculty face operational difficulties that reduce efficiency, disrupt laboratory functioning, and hinder smooth academic delivery.				
3.	The department suffers from inadequate basic facilities such as clean drinking water, unhygienic washrooms, poor cleanliness, and congested faculty offices.	Improvement of basic campus facilities including provision of clean drinking water, renovation and maintenance of washrooms, strengthening of housekeeping services, and reorganization/expansion of faculty offices	Immediate (1–3 months for hygiene issues) and 6–12 months for infrastructure upgrades	University Administration / Works Department / Estate Office/ Campus Incharge	Maintenance budget, renovation funds, housekeeping staff, space reallocation plan
4.	The department lacks sufficient laboratory space, modern instruments, and a dedicated budget for chemicals and consumables.	Expansion and upgradation of laboratory space, procurement of modern instruments, and establishment of a dedicated recurring budget line for chemicals and consumables	6–12 months (phased implementation)	University Administration / ORIC / Finance Department / HOD	Development funds, equipment procurement budget, recurring consumables budget
5.	There is insufficient institutional budget allocation for the department's academic and operational needs.	Enhancement of institutional budget allocation with separate heads for academic, research, laboratory, and operational needs; advocacy for increased recurring and development funding	Immediate to next budget cycle (3–12 months)	University Administration / Finance Department / HOD / Budget Committee	Increased recurring budget, development grants, Government support
6.	The faculty structure appears to be contract-based without a long-term strategic plan for academic growth.	New hiring is required	12 months	University Administration / HR Department / Selection Board	Budget allocation, approval from statutory bodies

7.	There is a lack of effective operational and maintenance planning for essential services such as cleaning, sanitation, and facility upkeep. The existing systems appear either weak or poorly enforced, leading to deteriorating campus conditions.	Development and enforcement of a structured operational and maintenance plan for cleaning, sanitation, and facility upkeep with defined SOPs and monitoring mechanism	Immediate (1–3 months) for SOPs and 3–6 months for full implementation	University Administration / Estate Office / Works Department / HOD	Housekeeping staff, maintenance budget, SOP guidelines, monitoring committee
8.	The department lacks a phased and strategic laboratory development plan to upgrade its scientific facilities. There is no clear roadmap for expanding lab space, improving infrastructure, or integrating modern biotechnology tools.	Development and approval of a phased strategic laboratory development plan covering lab expansion, infrastructure improvement, and integration of modern biotechnology tools	3–6 months (plan development) and 6–24 months (phased implementation)	Department / ORIC / University Administration / Planning & Development Cell	Planning support, development funds, technical expertise, HEC/project grants
HoD/Chairperson Signatures: 		Comments (if any): The observations regarding infrastructure, laboratory development, operational systems, budget constraints, and maintenance planning are duly noted. The department acknowledges these gaps and is committed to systematic improvement through a phased development approach. Necessary steps are being initiated to strengthen laboratory facilities, enhance budget allocation, improve sanitation and maintenance services, and develop a strategic roadmap for infrastructure and academic support systems to ensure a conducive learning and research environment.

Vice Chancellor Signatures: 	Comments (if any):
---	----------------------------------

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Microbiology)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	The department lacks full-time faculty members, consisting only of one Assistant Professor and One Lecturer, with no Associate or Professors. There is a need to hire new faculty members.	We appreciate your valuable input however, hiring of faculty is under process	06-09 Months	Registrar Office	Resources are available
2.	There is a lack of non-academic support staff, including laboratory attendants, and a Clerk/Office Assistant. This shortage negatively affects daily administrative, laboratory, and IT-related operations.	Yes hiring of staff skilled staff is under process as well	06-09 Months	Registrar Office	Resources are available
3.	There is a need to strengthen curriculum review processes, and faculty feedback mechanism, to ensure comprehensive documentation, and establish more effective systems for collecting and utilizing feedback from students and stakeholders.	We are continuously improving our grey areas to improve feedback mechanism to review curriculum on regular basis	06 months	HOD, Faculty in charge	Resources are available

4.	There is a limited engagement with industry for students placement and R&D Projects.	Department has already built synergies with other departments outside university and is also trying to develop more in future.	6-12 months	Department itself	Resources will be made available
5.	Curriculum design and documentation processes lack systematic CLO (Course Learning Outcomes) and PLO (Program Learning Outcomes) mapping. There are no clear revision protocols or structured mechanisms for incorporating stakeholder feedback into curriculum updates.	We are adding CLOs and PLOs in curriculum through engagement of relevant stake holders	6-12 months	Department itself	Resources will be made available
6.	The week-wise Curriculum Distribution is unclear. There should be a vibrant distribution of curriculum across 16 Weeks and readily accessible to students, with more clearness in Course Content. There should be more detail in it.	The week-wise Curriculum Distribution and its implementation is under process.	6-months	Department itself	Resources will be made available
7.	The continuous assessment lacks clarity for students. There should be clear distribution and implementation of various Assessments with weightage against each, and distribution of Course contents in each assessment, readily available and in knowledge of students.	Yes, clear distribution and implementation of Assessments with weightage is under process.	6-months	Department itself	Resources will be made available

Implementation Plan against Assessment Team (AT) Finding during PEE Cycle 2025-26 (BS Chemistry)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	The BS Chemistry program requires additional faculty members as student enrollment increases in higher semesters. Currently, the limited number of faculty members restricts academic flexibility and increases workload pressure. There is also a need to recruit specialists in Organic and Analytical Chemistry to strengthen subject depth, improve teaching quality, and support advanced-level coursework and laboratory instruction.	The Department of Chemistry will request the recruitment of additional faculty members in accordance with the increasing student enrollment. Priority will be given to hiring qualified specialists in Organic Chemistry and Analytical Chemistry to strengthen subject expertise, improve teaching quality, and enhance laboratory-based learning.	Short Term (3-6 months): Submission of recruitment proposal and approval process. Medium Term (6-12 months): Advertisement and hiring of faculty members.	Head, Department of Chemistry in coordination with the HR, Registrar Office and University Administration.	New Appointments

2.	Faculty members are currently overburdened due to academic responsibilities combined with administrative tasks. The absence of dedicated administrative staff within the department further increases this burden.	The Department of Chemistry will request the University administration to provide dedicated administrative support staff to assist with routine departmental and university affairs, including student records, correspondence, documentation, scheduling, and coordination of academic activities. This will enable faculty members to devote more time to teaching, research, and student supervision.	Short Term (3–6 months): Submission of proposal for administrative support staff. Medium Term (6–12 months): Appointment or deputation of administrative personnel.	Registrar Office and Human Resource Section.	New Appointments
3.	The university lacks essential infrastructure, particularly hostel facilities for students, faculty, and higher staff.	The Department of Chemistry recommends that the University administration prioritize the development of hostel facilities for students, faculty, and officers as part of its infrastructure expansion plan.	Medium Term (6–18 months): Allocate budget, identify suitable land or buildings, and initiate the construction or procurement process. Long Term (18–36 months): Complete the construction and operationalize the hostel facilities.	University Administration, Registrar Office, Planning & Development (P&D) Section, and Finance Office.	Availability in Budget

4.	Chemistry and computer laboratories require significant upgrades to meet modern academic and research standards. There is a need for advanced analytical instruments, including spectrophotometers, pH meters, conductometers, and other essential equipment. Additionally, safety infrastructure such as fume hoods, eyewash stations, and protective gear is insufficient, limiting safe and effective experimental learning.	The Department of Chemistry will prepare a comprehensive laboratory development plan and submit it to the University administration for phased implementation. The plan will include the procurement of essential analytical instruments, modernization of laboratory and computer facilities, and installation of safety infrastructure in accordance with HEC and international laboratory safety standards. Regular maintenance and calibration of laboratory equipment will also be ensured.	• Medium Term (6–12 months): Procure and install analytical instruments, upgrade computer laboratory facilities, and establish safety infrastructure. • Long Term (12–24 months): Expand advanced research facilities, ensure periodic maintenance and calibration of equipment, and continuously upgrade laboratory resources.	Head, Department of Chemistry, in coordination with the Registrar Office, Store & Purchase Department, Planning & Development (P&D) Section, and Finance Office.	
5.	The department faces limitations in teaching, research, and learning resources, including computer laboratory facilities and online academic tools.	The Department will submit a proposal to the University administration for the enhancement of teaching and research resources. This includes upgrading the computer laboratory with modern computer systems, improving internet connectivity, and providing access to online academic resources such as digital libraries, scientific databases, plagiarism detection software, and licensed educational software.	Medium Term (6–12 months): Upgrade the computer laboratory, improve internet facilities, and subscribe to essential academic databases and software. Long Term (12–24 months): Regularly update digital resources, maintain ICT infrastructure,	Head, Department of Chemistry, in coordination with the IT Department, Library, ORIC, Registrar Office, and Finance Office.	

			and provide training to faculty and students on the effective use of online academic tools.		
6.	The CLOs and PLOs require improvement in systematic mapping and alignment with local contextual needs.	A comprehensive CLO-PLO mapping matrix will be developed for all courses, and faculty members will be trained on Outcome-Based Education (OBE) practices to ensure effective implementation and continuous improvement.	Review existing CLOs and PLOs and conduct faculty workshops on OBE and outcome mapping. Revise the curriculum documents, develop a comprehensive CLO-PLO mapping matrix, and obtain approval from the Board of Studies (BoS) and Academic Council.	5-12 Months	Department of Chemistry, in coordination with the Quality Enhancement Cell (QEC), Board of Studies (BoS), and Faculty Members.
7.	There is a critical need to establish well-equipped, dedicated chemistry laboratories with modern instrumentation and proper safety systems. Current deficiencies in lab design and safety protocols limit effective practical training.	The Department of Chemistry will submit a comprehensive proposal for the establishment and upgradation of dedicated laboratories for Organic, Inorganic, Physical, and Analytical Chemistry. The proposal will include the procurement of modern analytical instruments, redesign of laboratory layouts to meet academic and safety standards, and installation of essential	1-2 Years Conduct a laboratory needs assessment, prepare laboratory layouts and equipment specifications, and initiate procurement of essential safety equipment.		Department of Chemistry, in coordination with the Registrar Office, Planning & Development (P&D) Section, Store & Purchase Department, and Finance Office.

		safety infrastructure, including fume hoods, eyewash stations, emergency showers, fire extinguishers, chemical storage cabinets, and personal protective equipment (PPE).

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Mathematics)

Sr. No.	Intended Corrective Actions	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1	Compile an International Research Network (IRN) with contact details of international supervisors and collaborators.	International Research Network (IRN) would be compiled with contact details of international supervisors and collaborators	01 Year	ORIC, QEC, Academic Office	Researchers' data from Academic Office
2	Revise the SAR report by adding a proper title page, ensuring consistent formatting, specifying assessment cycle duration, and attaching Student Evaluation Proforma-1 and Proforma-10 as evidence.	Revision of SAR as per the expert suggestions by including all the documentary evidence.	02 Years	QEC, HoD, Academic Office	Previous SAR reports, Student Evaluation Proformas
3	Develop departmental library resources, acquire licensed software (MATLAB, Mathematica, etc.), and	Coordinate with Central Library for updated, Data Basis and Establish Departmental Reading Room. Furthermore,	01 Year	University Administration, Finance Office, HoD, Faculty, IT Directorate, Library	Budget allocation, Software licenses, ICT infrastructure

	provide access to LMS and Turnitin.	Establish Mathematics Laboratory, Softwares and Mathematical Tools.			
4	Establish a formal academic advising and student support system, assign faculty advisors, and strengthen career counseling and internship guidance.	Establish Student Advising, Mentoring, Counselling and Career Guidance system and get benefits from already existing relevant offices	02 Year	Student Career, counselling and placement office, Student Affairs, HoD, Faculty Advisors	Advising Manuals, Career counseling resources, Industry contacts
5	Prepare and maintain an inventory of learning resources and library collections; establish a system for regular updating and documentation.	Coordinate with central library, Preparation of an inventory including Departmental learning resources books, e books, Journals etc and continuously upgrading.	02 Years	IT Directorate, Department, Library Committee, HoD, Faculty	Budget Allocation, Library records, Database support, Infrastructure
6	Analyze student evaluation results each semester and prepare evidence-based action plans to improve teaching and learning based on feedback.	Develop and Implement a formal continuous quality improvement framework linked with Plos, assessment, curriculum review, stakeholders feedback and action plans	02 Yeras	QEC, HoD, BOS experts, Faculty Members	Student evaluation reports, feedback forms, CQI forms
7	Strengthen linkages with industry, alumni, and professional bodies through MoUs, seminars, internships,	Establish Program Advisory Board, Alumini Data Base, Mentorship and Guest Lecture Series	02 Years	Student Affairs, Student Career and Placement office, HoD, ORIC	Alumni database, Industry contacts, Event resources and funds

	collections; establish a system for regular updating and documentation.	including Departmental Learning Resources books, e books, Journals etc. and continuously upgrading.		Committee, HoD, Faculty	Database support, Infrastructure
5	Analyze student evaluation results each semester and prepare evidence-based action plans to improve teaching and learning based on feedback.	Develop and implement a formal continuous quality improvement framework linked with PLOs, assessment, curriculum review, stakeholders feedback and action plans	02 Yeras	QEC, HoD, BOS experts, Faculty Members	Student evaluation reports, feedback forms, CQI forms
6	Strengthen linkages with industry, alumni, and professional bodies through MoUs, seminars, internships, and alumni engagement activities.	Establish Program Advisory Board, Alumni Data Base, Mentorship and Guest Lecture Series	02 Years	Student Affairs, Student Career and Placement office, HoD, ORIC	Alumni database, Industry contacts, Event resources and funds
7	Recruit at least 2-3 regular faculty members to ensure academic continuity and reduce dependence on visiting or contractual faculty.	Advocate recruitment in specialized Mathematics areas and teaching assistants according to HEC standards	02 Year	Administration, HR Office, HoD	Recruitment budget, Approval from competent authority
HoD/Chairperson Signatures: 		Comments (if any): The Department of Mathematics values the recommendations provided by assessment team. Despite limited infrastructure, learning resources, laboratory facilities, and supporting staff, the department has demonstrated strong commitment towards academic excellence and continuous quality improvement. The department is highly motivated to implement corrective actions. However, additional institutional support including infrastructure, library resources, Laboratory equipment and administrative staff will be essential for achieving the outcomes and sustaining quality standards.			
In-charge Faculty Signatures: 		Comments (if any):			

Implementation Plan (BS Mathematics)

Director QEC Signatures: 	Comments (if any):
Vice Chancellor Signatures: 	Comments (if any):

Dated: June 29, 2026

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Physics)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	Establish an International Research Network (IRN) by compiling contact details of all international collaborators and supervisors (PhD, MS/MPhil) and engaging them during QS and other global ranking surveys.	International Research Network (IRN) would be compiled with contact details of international supervisors and collaborators	01 Year	ORIC, QEC, Academic Office	Researchers Data from Academic Office
2.	The inadequacy of laboratory infrastructure and equipment necessary for effective teaching and learning in Physics is missing. The department lacks sufficient teaching laboratories and modern experimental equipment to support practical components of the curriculum. Additionally, the absence of adequately equipped computer laboratories limits students' exposure to computational and simulation-based learning, which is increasingly important	Undergraduate physics laboratory equipment is being procured in a phased manner. Part of the inventory is currently in the active tendering phase, and the remaining technical specifications list has been submitted to the Purchase and Store Section. Concurrently, a formal request will be submitted to the Treasurer's Office to secure dedicated budgetary allocations in the upcoming fiscal years to fully complete the	1-2 years	Director P&S, Treasurer in , List of Laboratories and Equipment will be provided by Chairperson/HoD Physics	Continuous financial allocation over the upcoming fiscal years to fulfill HEC-mandated undergraduate Physics lab standards. Estimated budget: > PKR 15 Million.

	in contemporary physics education.	laboratories setup as per standard requirements of HEC.			
3.	The department faces considerable limitations in the availability of academic and learning resources required to support teaching, research, and independent learning. The absence of a dedicated departmental library, inadequate library holdings, limited access to licensed software, and the lack of digital academic tools such as Learning Management Systems (LMS) and Turnitin restrict the academic environment.	1. Establishment of the IT Laboratory at the GPO campus is underway; system procurement is currently in process. 2. Compilation of comprehensive reading lists and specific analytical software requirements is being finalized. 3. Institutional SAP implementation is actively progressing and is expected to go live during the upcoming academic semester.	01 Year	Director IT on direction of worthy Vice Chancellor for IT Lab Establishment, Software & SAP Deployment. Chairperson/HoD Physics (Resource Lists), University Librarian (Book Acquisition),	Desktop computer systems for the IT Lab, procurement of core reference textbooks and licensed software licenses, and dedicated staff training modules for the SAP platform.
4.	There is absence of formal student support mechanisms. Academic advising, mentoring, counseling, and career guidance services are either limited or not systematically implemented. As a result, students may not receive adequate guidance regarding academic progression, career planning, and personal development.	Establish and operationalize a Faculty-Led Advisory Framework structured across three foundational pillars: • Academic Advising: Assign dedicated faculty mentors to track individual degree progression, prerequisite completions, and academic standing. • Career Guidance: Form a specialized departmental cell to map physics streams to active research opportunities, industrial internships, and post-graduation employment.	01 Year	1. At University Level: University's Students Affairs Department to initiate University Level Counselling platform. 2. At Department Level: Chairperson/HoD (Oversight & Monitoring), Relevant Faculty Advisors	Centralized student academic records, progress tracking sheets, and administrative coordination support. Centralized counselling material/resources from University.

		• Counseling Liaison: Create a structured, confidential referral pathway to the University's central counseling services for mental health and personal development.		(Execution), Appointed Convener (Coordination & Record Management)	
5.	There is a need for more structured initiatives aimed at faculty development and motivation. including a comprehensive faculty development framework, training programs, research support, recognition mechanisms, and career progression opportunities.	Implement a comprehensive faculty development plan utilizing a coordinated, multi-tiered institutional framework: 1. Executive Tier (VC/Leadership): Allocation of dedicated financial budgets and structural alignment of fast-track career progression pathways. 2. Central Operational Tier (QEC/Relevant Cells): Design, management, and execution of institutional pedagogy and research methodology training workshops. 3. Departmental Tier (Dean/HoD): Identification of discipline-specific skill gaps and submission of targeted training recommendations and recommendations for events relevant to career growth.	01-02 Years	1. Leadership/VC 2. QEC or relevant department 3. Dean, Chairperson/ HoD	Gap analysis from Departmental/Dean level. A platform at University level to manage the professional development database and mechanism. Financial resources for the availing out of University career growth events/conferences/workshops or trainings.

6.	The department currently has limited engagement with alumni, industry partners, professional organizations, and external stakeholders.	Develop formal institutional linkages with targeted industrial units, research organizations, and professional bodies. Establish a structured alumni tracking network immediately following the graduation of the inaugural cohort.	01–02 Years	ORIC (Formal Industry Linkages) Chairperson/Head of Department Relevant faculty for Coordination and Follow-up for Alumni Network	External stakeholder database, communication infrastructure, and networking event resources.
7.	The decentralized campus structure has been identified as a contributing factor to several operational and administrative challenges faced by the department. The distribution of facilities across multiple locations has created difficulties in coordination, resource sharing, communication, and efficient service delivery.	This strategic/infrastructure-level challenge has been formally discussed with the university executive leadership for consideration within long-term master planning and spatial consolidation frameworks.	Strategic / Ongoing	University Executive Leadership / Competent Authority	Institutional policy alignment and long-term infrastructural capital planning.
8.	There is a need to strengthen curriculum review processes, and faculty feedback mechanism, to ensure comprehensive documentation, and establish more effective systems for collecting and utilizing feedback from students and stakeholders.	Conduct systematic periodic curriculum reviews. Actively collect, analyze, and document institutional feedback loops from students, faculty, and external stakeholders to formulate actionable recommendations for the Board of Studies (BoS) toward Continuous Quality Improvement (CQI).	Annual (Continuous)	QEC (Analysis & Feedback Loops), Chairperson/HoD for Board of Studies (BoS)	Standardized feedback records, evaluation metrics, and updated curriculum documentation templates.

9. There should be a state-of-the-art research laboratory that could be jointly utilized by the Physics and Chemistry departments. The current lack of advanced research infrastructure limits opportunities for high-quality research, interdisciplinary collaboration, and external partnerships.	Formulate a detailed baseline blueprint of essential interdisciplinary research laboratory requirements and forward it to the Vice Chancellor for inclusion in the university's future strategic capital expenditure plans.	2-3 Years (Subject to availability of Resources)	University Executive Leadership / Worthy Vice Chancellor, HoDs of Physics & Chemistry	Strategic central development funding and external capital infrastructure grants.
HoD/Chairperson Signatures: 	Comments (if any): Director QEC to keep all relevant department onboard where facilitation required beyond departmental resources.			
In-charge Faculty Signatures: 	Comments (if any):			
Director QEC Signatures: 	Comments (if any):			
Vice Chancellor Signatures: 	Comments (if any):

Implementation Plan against Assessment Team (AT) Finding during PRE Cycle 2025-26 (BS English)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	Establish an International Research Network (IRN) by compiling contact details of all international collaborators and supervisors (PhD, MS/MPhil) and engaging them during QS and other global ranking surveys.	International Research Network (IRN) would be compiled with contact details of international supervisors and collaborators	01 Year	ORIC, QEC, Academic Office	Researchers Data from Academic Office
2.	The program lacks a structured Continuous Quality Improvement (CQI) mechanism to systematically use feedback for academic enhancement. There is no clearly defined process for closing the loop between evaluation, curriculum improvement, and program learning outcomes (PLOs).	The department intends to Institutionalize a departmental mechanism for CQI through regular assessment of academic processes and stakeholder feedback. The department will periodically evaluate PLO attainment, analyze feedback received from relevant stakeholders, implement appropriate improvements, and ensure proper documentation of the quality enhancement process for future	01 Year	HoD, QEC, Departmental CQI Committee	Student feedback data, survey forms, QEC guidelines, meeting records

		monitoring.			
3.	The faculty structure appears to be contract-based without a long-term strategic plan for academic growth.	The department intends to advertise regular faculty positions to strengthen its permanent academic workforce. Following the recruitment process, a structured faculty development and succession plan will be implemented to support mentoring, transparent workload distribution, and sustained academic excellence.	02 Years	University Administration, Registrar Office, HoD	Recruitment approvals, budget allocation, HR support
4.	There is no structured academic advising or student support system in place, and career guidance services are largely informal. Students do not benefit from systematic mentoring, counseling, or career planning frameworks.	The department will establish a formal student advising and mentoring system aimed at improving academic success and career readiness. Faculty members are designated as advisors to provide continuous academic guidance, counseling, and mentoring, while the department will organize orientation and career development activities and maintain comprehensive advising records.	01 Year	HoD, Departmental Faculty, Student Affairs Office	Advising policy, counseling records, workshop budget, career resource material
5.	Faculty development processes are not formally structured, and there is limited evidence of continuous professional development (CPD) initiatives.	The department will institutionalize a Faculty CPD framework to support continuous professional growth through training, workshops, and research development initiatives.	01 Year	HoD, QEC, ORIC	Training budget, workshop schedules, CPD records, online learning resources

6.	There is a need to strengthen curriculum review processes, and faculty feedback mechanism, to ensure comprehensive documentation, and establish more effective systems for collecting and utilizing feedback from students and stakeholders.	The department would establish a systematic curriculum review process through regular stakeholder feedback and periodic Board of Studies meetings.	01 Year	Board of Studies, HoD, QEC	Feedback forms, meeting minutes, curriculum documents
7.	Curriculum design and documentation processes lack systematic CLO (Course Learning Outcomes) and PLO (Program Learning Outcomes) mapping. There are no clear revision protocols or structured mechanisms for incorporating stakeholder feedback into curriculum updates.	The department will soon develop a structured mechanism for CLO-PLO mapping to ensure effective alignment of course and program outcomes. In addition, regular curriculum reviews, document revisions, and stakeholder feedback will be taken regularly to improve the relevance and quality of the academic programme.	01 Year	Departmental Curriculum Committee, Board of Studies, QEC	CLO-PLO mapping templates, curriculum documents, stakeholder feedback
8.	The department currently has limited engagement with alumni, industry partners, professional organizations, and external stakeholders.	The Department of English is developing a structured stakeholder engagement framework with alumni, employers, academic institutions, and professional organizations. Direct industry collaboration is not applicable to the programme; therefore, the department will prioritize academic and professional partnerships to enhance student learning and career opportunities.	02 Years	HoD, Alumni Office, ORIC, Career Services Office	Alumni database, stakeholder contacts, communication platform, event budget
HoD/Chairperson Signatures:		Comments (if any):

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Media & Communication)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	Establish an International Research Network (IRN) by compiling contact details of all international collaborators and supervisors (PhD, MS/MPhil) and engaging them during QS and other global ranking surveys.	International Research Network (IRN) would be compiled with contact details of international supervisors and collaborators	01 Year	ORIC, QEC, Academic Office	Researchers Data from Academic Office
2.	The department should facilitate student access to essential media equipment, including cameras, audio recorders, lighting kits, and editing resources. This initiative will help bridge the gap between academic instruction and professional media practice.	The Department of Mass Communication & Media Studies offers specialization courses to students in the 7th and 8th semesters. Currently, 7th-semester students have been provided with access to a podcast studio, and some students have already gained practical experience in podcasting. However, in the 8th semester, these students are required to complete production projects. Therefore, essential media equipment will be provided to	Spring-2026 to Fall-2026 One Year	Treasure Office Purchase & Store Office	Budget required from university

		students individually to enable them to gain professional-level media production experience.			
3.	The department should establish or liaison with some functional FM Radio facility in accordance for Media and Communication Studies programs. The FM Radio station will provide students with practical exposure to broadcasting, scripting, anchoring, and radio production. It will also serve as a platform for community engagement and university outreach activities.	The Department of Mass Communication & Media Studies has already submitted a proposal, along with the estimated cost, for the establishment of an FM radio station, and the project is currently under process. This FM radio station will not only benefit Media Studies students but will also provide opportunities for students from other departments across the university. Furthermore, it will enhance community engagement through FM radio broadcasting.	1 Year	Treasure Office Purchase & Store Office	Budget required from University
4.	There is no structured academic advising or student support system in place, and career services remain largely undeveloped. Students do not receive systematic guidance regarding academic planning, internships, or career pathways.	The Department of Mass Communication & Media Studies provides students with systematic guidance regarding academic planning, internships, and career pathways. It also recommends various platforms and forums where students can explore internship opportunities and career options. In the coming months, the Department of Mass Communication & Media Studies will organize a series of guest lectures and industrial visits to help students gain practical insights into internships and career pathways.	1 Year	Directorate of Students Affairs, ORIC	Budget required from university for industrial Visit

5.	The formal Departmental Admission Committee, Research Ethics Committee and student Grievance Committee should be constituted.	Due to a shortage of faculty members in the Department of Mass Communication & Media Studies, the department facilitates students by following the committees constituted by the university and properly implementing their directions and guidelines	1 Year	Admission Committee, Research Ethics Committee and student Grievance Committee	Approval Required from competent authorities
6.	A multipurpose studio should be established, or students should be engaged with some external partner studio to support teaching, training, and production activities.	The Department of Mass Communication & Media Studies has a multipurpose studio where students receive hands-on training in media industry practices but need to upgrade. Whereas, In the coming months, the department will also sign Memorandums of Understanding (MOUs) with other universities that have more advanced multipurpose studios. Through these collaborations, students will receive additional professional training, as well as opportunities and to visit those universities students will participate in training sessions there. Moreover, MOU will be helpful for teaching training.	1 Year	Treasure Office Purchase & Store Office	Budget required from university

7.	The curriculum lacks systematic documentation, particularly in relation to CLO (Course Learning Outcomes) and PLO (Program Learning Outcomes) mapping. There are no clear revision protocols or structured mechanisms for incorporating stakeholder feedback into curriculum updates.	In the upcoming Board of Studies meeting of the Department of Mass Communication & Media Studies, clear revision protocols and structured mechanisms for incorporating stakeholder feedback into the revised curriculum developed through the National Curriculum Review Committees (NCRCs) will be added and implemented.	1 Year	Director Academics or Additional Director Academics	Approval Required from competent authorities for nominations of members for BOS
8.	A specialized Editing Lab should be established with industry-standard hardware and software for audio, video, and digital content editing.	The Department of Mass Communication & Media Studies also has an editing lab, which needs to be upgraded for industry-standard hardware and software for audio, video, and digital content editing. A case for upgradation has already been submitted and is awaiting budget allocation	1	Treasure Office Purchase & Store Office	Budget required from university
9.	There should be student outreach program at departmental level. The Department lack Career Counselling Sessions, Job Fairs and similar outreach and projection activities.	Faculty members in the Department of Mass Communication & Media Studies regularly guide students regarding career counselling and share any available opportunities with them. Moreover, through the Directorate of Students Affairs, various opportunities are also communicated to students, and they	1	Directorate of Students Affairs & Transport Office	Approval Required from competent authorities for Job Fairs and projection activities.

are informed about job fairs held at other universities. In addition, during semester breaks, students will be taken to visit other universities and industry-related job fairs.

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS Psychology)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	Establish an International Research Network (IRN) by compiling contact details of all international collaborators and supervisors (PhD, MS/MPhil) and engaging them during QS and other global ranking surveys.	International Research Network (IRN) would be compiled with contact details of international supervisors and collaborators	01 Year	ORIC, QEC, Academic Office	Researchers Data from Academic Office
2.	The program lacks a structured Continuous Quality Improvement (CQI) mechanism to systematically use feedback for academic enhancement. There is no clearly defined process for closing the loop between evaluation, curriculum improvement, and program learning outcomes (PLOs).	Develop and implement a formal CQI framework linked with PLO assessment, curriculum review, stakeholder feedback and action plans.	02 Year	QEC, BOS Experts, HoD, Faculty Members	Student evaluation reports, feedback forms, CQI forms

3.	The department faces a shortage of essential subject-specific infrastructure required for effective psychology education. This includes the absence of a dedicated departmental library, well-equipped psychology laboratory, licensed software, and modern psychological assessment and experimental tools.	Establish psychology laboratory, procure psychological tests, software, experimental tools and strengthen departmental library resources.	02-03 Years	Administration, Finance Office, Library, HoD, Faculty	Budget allocation, laboratory equipment, software licenses
4.	There is no structured academic advising or student support system in place, and career guidance services are largely informal. Students do not benefit from systematic mentoring, counseling, or career planning frameworks.	Establish student advising, mentoring, counseling and career guidance system and get benefit from already existing relevant offices.	02 Year	Student Career Counseling and Placement Office, Student Affairs, HoD, Faculty Advisors	Advising manuals, Career counseling resources, Industry contacts
5.	Faculty development processes are not formally structured, and there is limited evidence of continuous professional development (CPD) initiatives. In addition, promotion pathways and incentive systems are unclear or inconsistently implemented. A more transparent and structured framework for training, recognition, and career progression is required.	Develop annual CPD plan, training workshops, transparent promotion and recognition mechanisms.	02-03 Year	HR Office, HoD, Administration	Training budget, CPD policy documents

6.	Learning resources, including library collections and academic support materials, are not clearly defined or systematically managed. It is also unclear whether dedicated staff and proper space have been allocated for these resources.	Develop inventory, allocate dedicated space/staff and establish resource management procedures.	02 Year	Library, HoD, Faculty, Administration	Library resources, dedicated space, support staff
7.	Curriculum design and documentation processes lack systematic CLO (Course Learning Outcomes) and PLO (Program Learning Outcomes) mapping. There are no clear revision protocols or structured mechanisms for incorporating stakeholder feedback into curriculum updates.	Implement systematic CLO-PLO mapping, curriculum review cycle and stakeholder feedback integration.	02 Year	QEC, BoS Experts, HoD, Faculty,	Mapping templates, curriculum review records
8.	Collaborate with Central Library to procure updated resources, digital databases (e.g., JSTOR, EBSCO), and e-books. Set up a departmental reading room for students. Assign a Library Liaison Officer to regularly update material and coordinate with the library.	Coordinate with central library for updated books, databases and establish departmental reading room.	01 Year	Library, IT Directorate, HOD, Faculty	Budget allocation, Library records, Software Licenses, ICT Infrastructure, database subscriptions
9.	Establish a Program Advisory Board (PAB) involving alumni, employers, and subject experts. Create a departmental alumni database and initiate guest lectures and alumni mentorship sessions.	Establish Program Advisory Board, alumni database, mentorship and guest lecture series.	02 Year	Student Affairs, Student Career Counseling and Placement Office, ORIC, HoD	Alumni database, event resources & funds, Industry contacts

10.	Advocate for new faculty positions in areas organizational psychology, cognitive psychology. Encourage university authorities to allocate teaching assistant roles to ease faculty workload. Align recruitment strategy with HEC guidelines on qualification and faculty–student ratios.	Advocate recruitment in specialized psychology areas and teaching assistants according to HEC standards.	02 Years	Administration, HR Office, HoD	Recruitment budget, approval from the competent authority
HoD/Chairperson Signatures: 		Comments (if any): The Department of Psychology values the recommendations provided by the Assessment Team. Despite limited infrastructure, learning resources, laboratory facilities, and supporting staff, the department has demonstrated strong commitment toward academic excellence and continuous quality improvement. The faculty members are highly motivated to implement the proposed corrective actions; however, additional institutional support in terms of funding, infrastructure development, library resources, laboratory equipment, and administrative staff will be essential for achieving the desired outcomes and sustaining quality standards.

Implementation Plan against Assessment Team (AT) Finding during PREE Cycle 2025-26 (BS T&HM)

Sr. No.	Assessment Team Findings and Recommendations	Intended Corrective Actions	Intended Implementation Period	Responsible Body	Resources Needed
1.	The program lacks a structured Continuous Quality Improvement (CQI) mechanism to systematically use feedback for improving academic delivery. There is no clearly defined feedback loop to support ongoing program enhancement or ensure alignment between outcomes and institutional goals.	Design and implement a formal, standardized CQI Framework that establishes an annual/semester-based feedback loop. Develop systematic evaluation tools tailored specifically for tourism and hospitality outcomes and action plans	01 Year	QEC (Quality Enhancement Cell), Head of Department (HoD) and Faculty Members.	Systematic student evaluation reports to be generated through QEC, feedback forms,
2.	The department faces significant shortages in essential academic infrastructure, including a departmental library, licensed software, and access to modern digital learning tools such as LMS and Turnitin.	Procure essential tourism/hospitality licensed software and establish a dedicated departmental library resource center. Integrate modern digital learning tools by standardizing LMS usage and provisioning Turnitin access for all faculty and students. Dedicate a section of library for Tourism.	01 Years	IT Department, Main Library Administration, And Hod Faculty	Procurement budget for software licenses, digital tool subscriptions (LMS/Turnitin), and physical/digital library catalog assets.

3.	There is no structured academic advising or student support system in place, and career services remain largely undeveloped. Students do not receive guidance regarding academic planning, internships, or career pathways.	Assign a dedicated faculty academic advisor to every student to guide academic planning and degree pathways.	01 Year	Head of Department (HoD), Departmental Faculty, and Student Affairs / Placement Office	Academic advising manuals/tracking sheets, an internship portal or database.
4.	Faculty development mechanisms are limited, with no documented Continuous Professional Development (CPD) plan, incentive system, or clear promotion pathway.	Draft and implement a formal Continuous Professional Development (CPD) policy and Design a clear, performance-linked incentive system and transparent promotion pathways.	01 Years	Human Resources (HR) Department, Registrar Office, and Head of Department (HoD)	CPD budget, professional training modules, and documented institutional HR/promotion guidelines.
5.	Learning resources and library collections are not clearly documented or systematically managed within the department.	Audit and document all current learning resources; implement a digital inventory system for systematic resource tracking and management.	02 Year	Main Library Administration	digital cataloging tools, dedicated space, support staff
6.	The curriculum lacks systematic documentation, particularly in relation to CLO (Course Learning Outcomes) and PLO (Program Learning Outcomes) mapping. There are no clear revision protocols or structured mechanisms for incorporating stakeholder feedback into curriculum updates.	Document and standardize CLO-to-PLO mapping across all courses; establish a formal protocol and timeline for curriculum revisions based on stakeholder feedback.	02 Year	QEC, BoS Experts, Chairperson, Faculty.	More human resource is required to assist in developing the required document. Existing limited faculty resources are unable to cope with such activities. Outcome mapping templates, curriculum revision guidelines, and compiled stakeholder feedback reports.

7.	The department shows limited or undocumented engagement with industry partners, alumni, and professional bodies.	The department has effective linkages with the industry however better documentation is needed that shall be done.	01 Year	The department, ORIC, External linkages, international office.	Effective role of international office to develop international linkages, authorization to the departments to sign MoUs directly as well with the permission of the honorable vice chancellor.
HoD/Chairperson Signatures: 		Comments (if any): The Department of Tourism and Hospitality Management values the recommendations provided by the Assessment Team. Despite limited infrastructure, learning resources, specialized software, and supporting staff, the department has demonstrated a strong commitment toward academic excellence and continuous quality improvement. The shortcomings shall be addressing in due time to improve the quality standards further.
